## International Markets

### Country risk dropped to 194 basis points

In September 3-10, the country risk indicator, measured by the **EMBIG Peru** spread, dropped from 204 to 194 basis points.

Likewise, the EMBIG Latin America spread fell 14 basis points due to signals of a greater recovery of the world economy and to lower fears of a military intervention in Syria.

### Price of gold at US\$ 1,358.3 per troy ounce

In the same period, the price of **gold** fell 2.9 percent to US\$ 1,358.3 per troy ounce.

The price of gold decreased due to the lower demand for this metal as a hedge as a result of declining fears about a military intervention in Syria and due to ETF's net liquidation of their gold positions in the first days of September.

Between September 3 and 10, the price of **copper** declined 0.2 percent to US\$ 3.25 per pound.

The decline in the price of copper is associated with the higher level of copper inventories registered in the major metal exchange markets. This price decline was offset by China's positive economic data, which have contributed to improve confidence in the demand for metals.

In the week of September 3 to 10, the price of **zinc** fell 1.6 percent to US\$ 0.83 per pound.

The decline in the price of zinc was associated basically with reports of the International Zinc and Lead Study Group (ILZSG) indicating a surplus in the world market of refined zinc in the first semester of 2013.

In the same period, the price of **WTI crude oil** fell 1.1 percent to US\$ 107.4 per barrel.

Factors accounting for this price fall included lower fears of a military intervention in Syria and the increase of U.S. inventories of gasoline and distillate fuels. In addition to this, the OPEC assured that there is a good global supply of crude oil in the market.

## US dollar depreciated against the euro

Between September 3 and 10, the **dollar** depreciated 0.7 percent against the **euro**.

The depreciation of the dollar against the euro was associated with signals of a greater recovery in the Eurozone and with the negative employment data reported afterwards, which generated increased expectations that the FED's withdrawal of quantitative easing (QE) would be limited.

Between September 3 and 10, the **3-month Libor** remained at 0.26 percent, while the yield on the **10-year US Treasury bonds** rose from 2.86 to 2.97 percent.

The yield on the US Treasuries rose due to lower demand for hedge assets as a result of lower concerns about Syria and due to expectations that the withdrawal of the FED's QE will be limited.
