ANNEX 1: GLOSSARY OF TERMS

Gross International Reserves (GIR).- Central Bank's GIR¹ are composed mainly of deposits in foreign banks, foreign securities and bonds, gold holdings and any other internationally recognized means of payments such as coins and bills. It also includes subscriptions to international organizations, and the credit balance from the financial agreement signed with other Latinoamerican central banks as part of the Asociación Latinoamericana de Integración, ALADI².

Liquid International Assets.- The international assets which are under management and can be rapidly converted into cash. They are the result of excluding from the GIR subscriptions of capital to international financial organizations, such as Fondo Latinoamericano de Reservas (FLAR), credit balances from ALADI, and holdings of gold in Central Bank of Peru's vaults.

Total return based on actual book entries.- It is calculated as a quotient, in which the numerator considers interest earnings and profit/loss from securities sales and the denominator, the average daily balances of deposits, securities and gold (abroad and in vaults), excluding the valuation effect from changes in exchange rates and the price of gold.

^{1/} Euros, sterling pounds y canadian dolars.

^{2/} Average rating from Fitch, Standard & Poor's and Moody's.

¹ The concept used by the Central Bank is consistent with the paragraph 424 of the Manual of the Balance of Payments, IMF, 5th Edition.
