COMMENTS ON THE FINANCIAL STATEMENTS AS OF DECEMBER 31, 1999

# 1. Main Central Bank accounting practices

- a) The Central Bank's accounting system is based on generally accepted accounting principles, in what is applicable to central banking (Central Bank Organic Law, article 88°). The Bank's financial and accounting statements —based on information processed in automated form— are used to write the statistical analyses and reports submitted regularly to the Board of Directors and the Superintendency of Banking and Insurance.
- b) In compliance with article 89° of the Organic Law, differences originating in variations of the domestic-currency valuation of the Bank's assets and liabilities in gold, silver, foreign currencies, Special Drawing Rights or other monetary units used internationally, are not considered as gains or losses, and are credited to a special account.
- c) Gold and silver holdings are registered at a value established by the

Board of Directors not exceeding the international market price (article 72° of the Organic Law). The price per troy ounce for both is updated on the last working day of each month.

d) Foreign-currency investments are registered at their acquisition cost. On the last day of each month, book value is compared with market value. If the latter is smaller, a provision accounting for value fluctuation is entered.

The share of premium or discount amortizations, calculated from the date of acquisition until the maturity date of securities, is registered monthly.

- e) Peru's International Monetary Fund subscriptions and liabilities in domestic currency are valued monthly, registered in transitory accounts and canceled at the end of the Fund's financial year (April).
- f) In compliance with Resolution No.2 of the Accounting Regulation Council, the following items have been adjusted by a correction factor (the average wholesale price index): urban property, furniture and equipment, museum collection, mint warehouse, capital, reserves, cumulative

inflation exposure and statement of gains and losses. The adjustment factor used in the financial statements was 1,055. Depreciation of fixed assets was calculated using the historic and adjusted balance sheet values of buildings, furniture and equipment as of December 31, 1999.

#### 2. Available Assets Abroad

The Bank's financial statements show an available assets abroad balance amounting to S/. 31 554,8 million, equivalent to US\$ 9 002,8 million, a US\$ 979,4 million (9,8 percent) decrease from 1998.
