Net International Reserves at US\$ 8 989 million

As of December 4, the net international reserves (NIR) of the Central Reserve Bank of Peru amounted to US\$ 8 989 million, up US\$ 221 million from end-November and US\$ 809 million from end-2000. The increase of NIR during December obeys to higher financial system deposits (US\$ 217 million) and net purchases of foreign currency (US\$ 12 million), which were partially offset by the withdrawal of public sector deposits (US\$ 4 million), net interest payments (US\$ 2 million) and valuation changes (US\$ 2 million). On the other hand, the foreign exchange position amounted to US\$ 2 828 million, up US\$ 10 million from end-November.

As of November 30, the net international reserves (NIR) of the Central Reserve Bank of Peru amounted to US\$ 8 768 million, down US\$ 27 million from end-October. The decrease of NIR during November is due to lower financial system deposits (US\$ 66 million), the withdrawal of public sector deposits (US\$ 47 million), lower Insurance Deposit Fund deposits (US\$ 2 million), investment yields and other operations (US\$ 2 million), which were partially offset by net purchases of foreign currency (US\$ 90 million). On the other hand, the foreign exchange position amounted to US\$ 2 828 million, up US\$ 98 million from end-October and mainly explained by purchases of foreign currency through the Over-the-Counter.

Monetary Program for 2001- Information Note: December 2001

1. For the month of December, the Board increased the range for its operating target at **S/. 150 - S/. 160 million as a daily average**. In November, the said balance was S/. 146 million, which fell slightly above the announced range (S/. 135 – S/. 145 million), as a consequence of a higher liquidity requirement reflected in higher temporary purchase of CDBCRP on November 30
2. The Central Bank Board of Directors also established that the following interest and commission rates would be used in domestic-currency Central Bank operations since December 6:
 - a. For monetary regulation credits in domestic currency, the effective interest rate would be **the weighted average of the interbank interest rates, or 5,0 percent, whichever is highest**. Formerly, the said rate was 6,0 percent.
 - b. For overnight deposits in domestic currency held by banks at the Central Bank, the effective interest rate will be **2,0 percent**. Formerly, this rate was 2,5 percent.
 - c. For foreign exchange temporary purchase operations (swap operations), the commission implies an effective annual cost of **5,0 percent**. The latter cost was 6,0 percent.
3. The following interest rates will be used in foreign-currency operations:
 - a. The effective annual rate for monetary regulation credits will be **4,5 percent**. This rate rules since November 9.
 - b. For overnight deposits held by banks at the Central Bank, the rate is equivalent to the average obtained by the Central Bank for similar deposits abroad.
4. The Central Bank grants monetary regulation credits in domestic and foreign currency on a regular basis. Besides, the Central Bank operations will be oriented to reduce volatility in the exchange market.
5. If justified by financial conditions, the values mentioned above could be modified in order to ensure the attainment of the objective to preserve monetary stability, which mean avoiding inflationary or deflationary pressures.
