## WEEKLY REPORT N° 01 – January 10, 2003

### Net International Reserves: US\$ 9 734 million

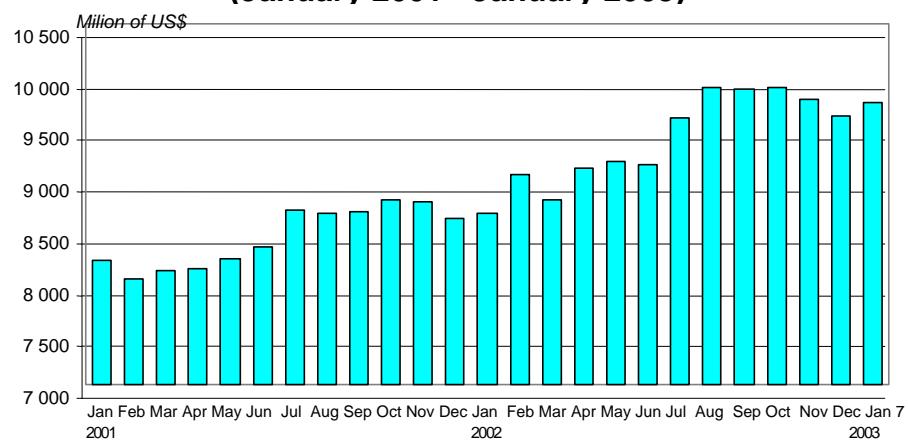

As of January 7, the net international reserves (NIR) of the Central Reserve Bank of Peru amounted to US\$ 9 734 million, up US\$ 136 million from end-December due to the increase in financial system deposits (US\$ 73 million) as well as the increase of public sector deposits (US\$ 57 million) and net investment yield (US\$ 6 million).

In December, the NIR decreased US\$ 169 million to US\$ 9 598 million, reflecting the withdrawal of financial

system deposits (US\$ 410 million) that was partially offset by the repayments of credits to banks granted by the BCR (US\$ 100 million), the increase in public sector deposits (US\$ 40 million), the net purchase of foreign currency (US\$ 50 million) and the valuation effect and net investment yield (US\$ 57 million).

In 2002, NIR increased US\$ 985 million, whereas the international position grew US\$ 426 million.

## December inflation: -0,03 percent

In December, the Consumer Price Index (CPI) decreased 0,03 percent, recording a 1,52 percent increase in 2002 (versus -0,13 percent in 2001). Therefore, the rate of inflation fell within the target range announced by the BCR.

December inflation reflected the decrease in the prices of fish, papaya, onion, tomato, bread, leasing and telephone. These factors contributed to a 0,3 percent points decrease in the CPI, that offset the in price increments in

goods and services such as poultry, citric, carrot and domestic transportation.

Excluding high variability components, the core component of inflation, named core inflation fell 0,13 percent in December, reflecting the correction in the price of bread as well as the effect of domestic currency appreciation against the US dollar on several goods and services.
