## September trade surplus: US\$ 80 million

In September, the trade balance recorded an US\$ 80 million surplus. Exports totaled US\$ 777 million, up US\$ 83 million (12 percent) from a year ago. Traditional exports amounted to US\$ 542 million, registering an US\$ 46 million (9 percent) increase against September 2002, thanks to the growth in gold exports, whereas non-traditional exports grew 19 percent, reflecting higher exports of textile and fisheries (28 percent in both cases).

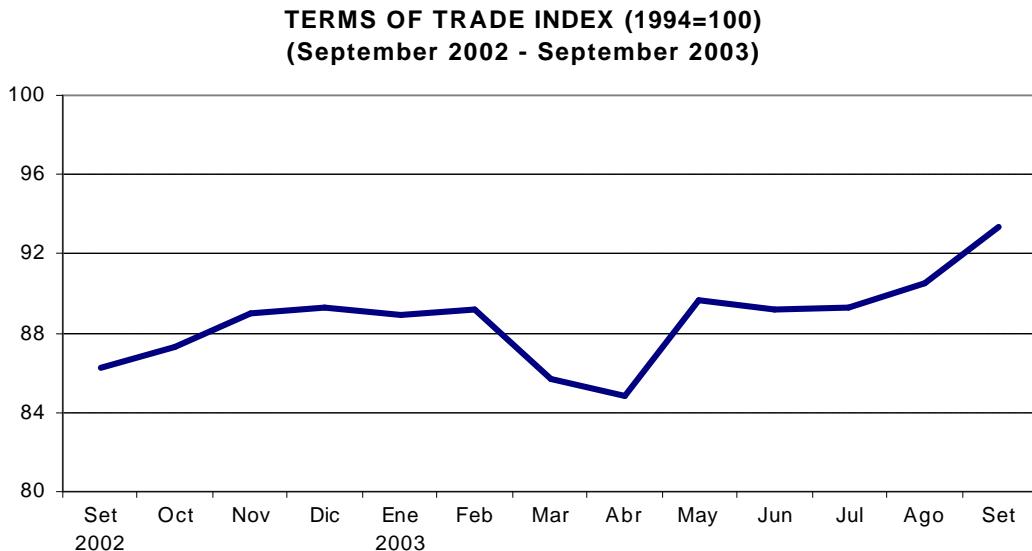

Imports amounted to US\$ 697 million, up 3 percent from a year ago. The increase in the acquisition of capital and consumer goods (14 and 5 percent) was partially offset by lower imports of intermediate goods (2 percent). It should be noted that Camisea related imports were US\$ 5 million this month and US\$ 14 million in September 2002. Excluding this purchases imports would grow 4 percent, where capital good acquisition would have grown 22 percent.

The cumulative trade surplus in the period January-September was positive in US\$ 412 million, with exports amounting to US\$ 6 522 million (up 15 percent from a year ago), of which traditional exports recorded a 16 percent increase and non-traditional 14 percent. On the other hand, Imports totaled US\$ 6 110 million, 12 percent higher than in the same period in 2002. Acquisitions of intermediate-, capital- and consumer-goods grew 14, 13 and 6 percent, respectively.

Terms of trade increased 8,3 between September this year and September 2002. Export prices grew 10,9 percent against the 2,4 percent increase in imports. In the period January-September, terms of trade increased 0,3 percent, since export prices' increase (6,6 percent) exceeded the rise in import prices (6,3 percent).

## Spread of Global bond at 2,82 percent

As of November 12, the spread of the **Global 2012** bond was 2,82 percent, lower than that recorded on end-October (2,93 percent), whereas the EMBI+ spread fell from 3,04 to 2,90 percent, in line with the

overall trend of emerging economies spreads, which obeys to the lower yield of US Treasury bonds and the improvement in Fitch's Brazilian rating (from B to B+).

### International markets

Between November 5 to 12, the **gold** quotation increased 2,9 percent to US\$ 389,7 per Troy ounce, due to the weakening of the US dollar and higher

demand from European and Japanese investors as well as Indian and Indonesian jewelry manufacturers.

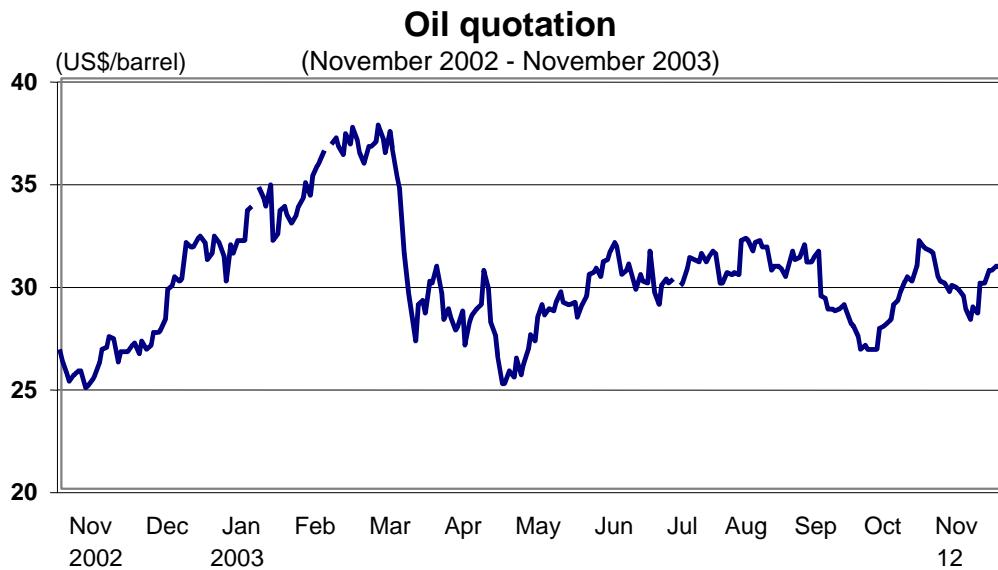

Over the same period, the **copper** quotation decreased 0,6 percent to US\$ 0,9471 per pound, however it is expected that the higher demand from China will lead the recovery in its quotation.

On the other hand, the **zinc** quotation fell 0,4 percent to US\$ 0,4166 per pound. In the year, the copper quotation has increased 35,9 percent and the zinc quotation 22,5 percent.

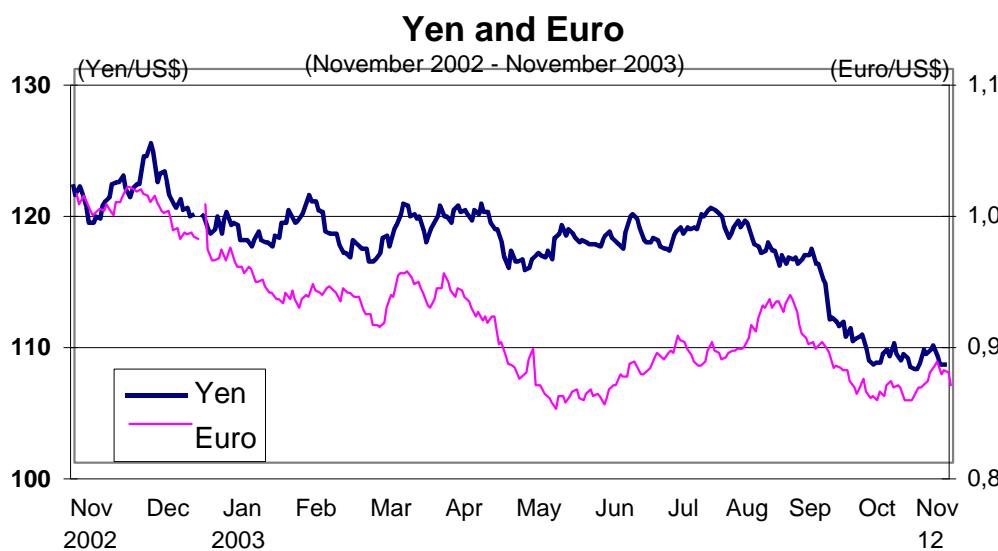

Over this week, the **WTI oil** quotation grew 2,3 percent to US\$ 31,3 per barrel due to

the unexpected gas supply in the Northern Hemisphere.

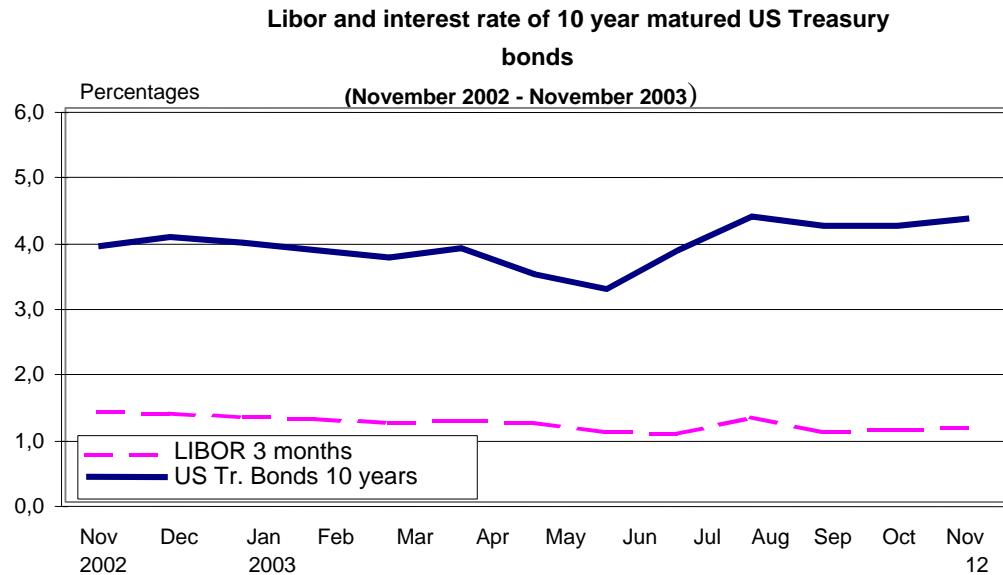

The **US dollar** depreciated 1,7 percent against the **euro** and 1,1 percent against the **yen**, reflecting recent terrorist attacks in

Saudi Arabia and Japanese Prime Minister statement on the continuation of reforms.

Between November 5 and 12, the **Libor** passed from 1,17 to 1,18 percent, whereas the **yield of US Treasury bonds** with a 10 year maturity increased from 4,354 to 4,402

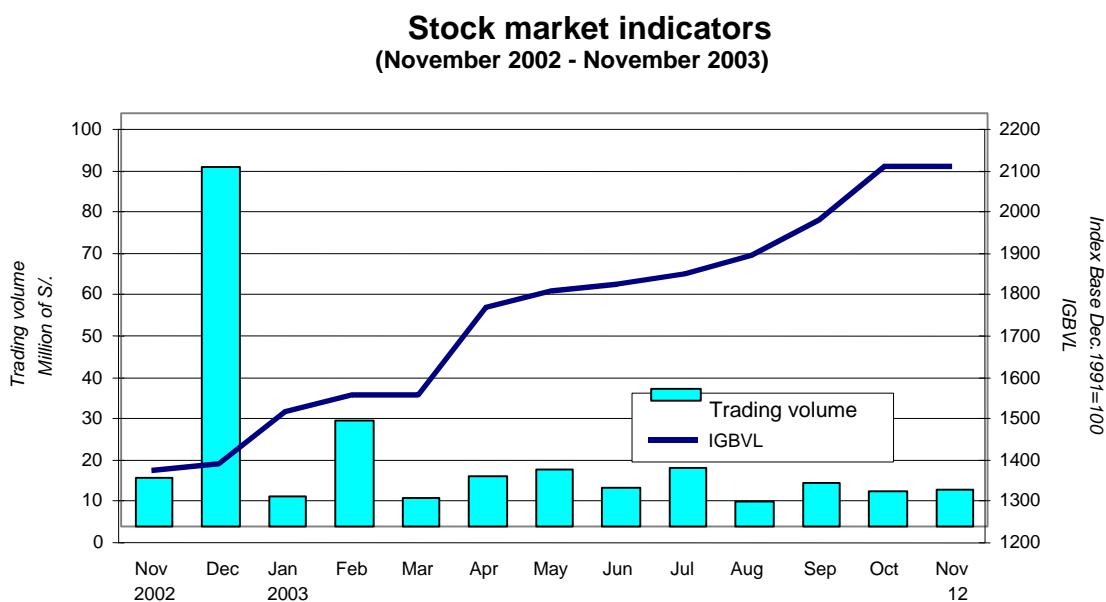

percent reflecting favorable news in the US (lower unemployment, higher production and the growth in the service sector).

## Lima Stock Exchange

As of November 12, the General Index and Blue Chip Index of Lima Stock Exchange (LSE) increased 0,03 and 1,5 percent,

respectively.. The cumulative increase in the year is 51,6 percent for the General Index and 52,5 percent for the Blue Chip.
