

CENTRAL RESERVE BANK OF PERU

WEEKLY REPORT

Nº 14 – April 2, 2004

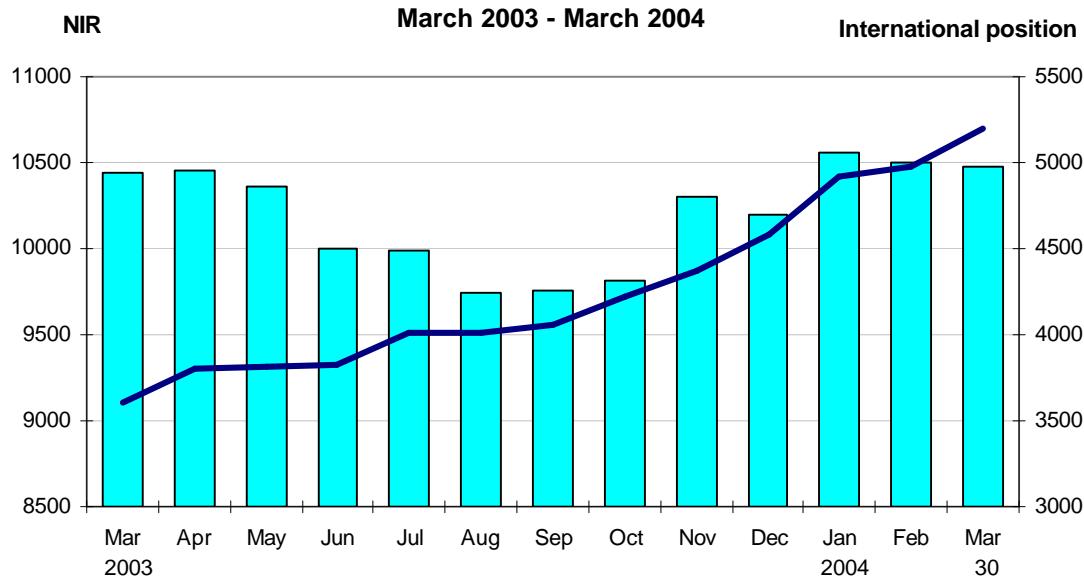

Net international reserves at US\$ 10 475 million

As of **March 30**, net international reserves (NIR) of the Central Reserve Bank amounted to US\$ 10 475 million, down US\$ 28 million from end-February. This decrease is mainly due to lower public sector and financial system deposits (US\$ 163 and US\$ 109 million, respectively), partially offset by net purchases of foreign currency (US\$ 208

million) and investment yield (US\$ 37 million).

In the year, NIR have increased US\$ 281 million, whereas the **Central Bank international position** expanded US\$ 620 million, reaching a balance of US\$ 5 203 million.

**Net international reserve and international position of the
Central Reserve Bank
March 2003 - March 2004**

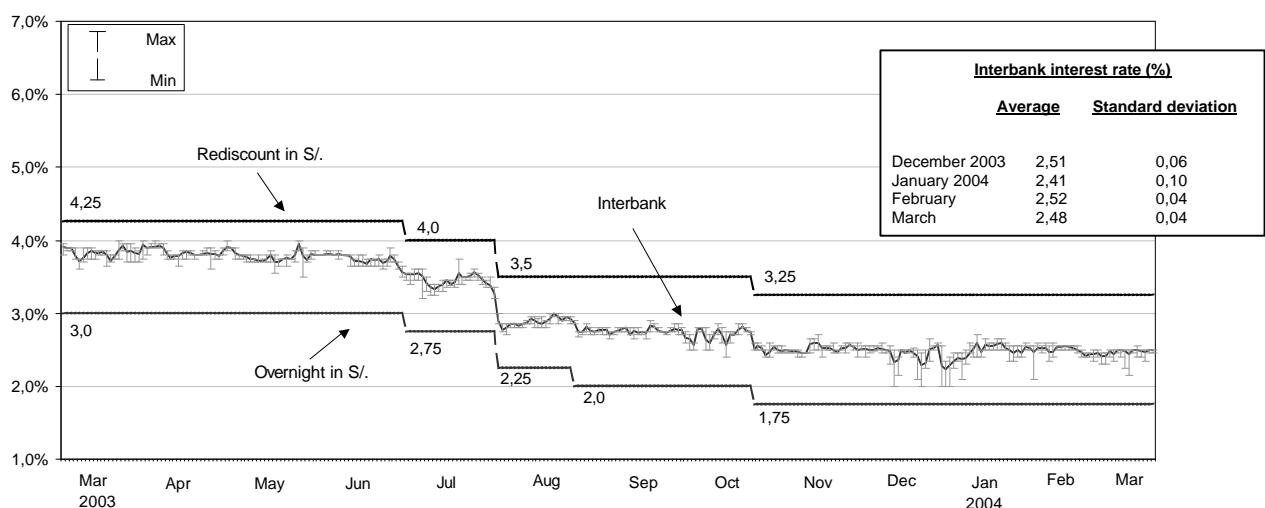

Tasa de interés interbancaria en 2,48 percent

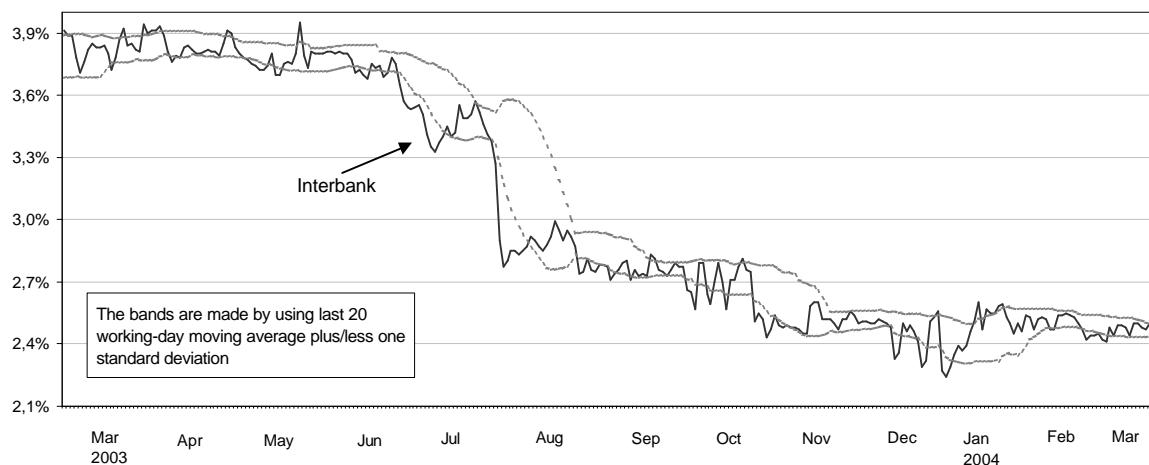

In **March**, the interbank interest rate in domestic currency averaged 2,48 percent, lower than in February (2,52 percent). On

the other hand, March's standard deviation of the interbank rate was similar to February's (4 basis points).

Interest rates in domestic currency (March 2003 - March 2004)

Interbank interest rate in domestic currency (March 2003 - March 2004)

Monetary operations

In **March**, the daily average balance of banks' liquidity at the Central Bank was S/. 182 million, within the projected range for that month (S/. 170 to S/. 190 million). Between **March 25 and 31**, the Central Bank made the following operations:

- Auctions of CDBCRRP with a i) 7-day maturity by S/. 100 million at an average interest rate of 2,59 percent and ii) 1-year amounting to S/. 40 million at 3,40 percent.

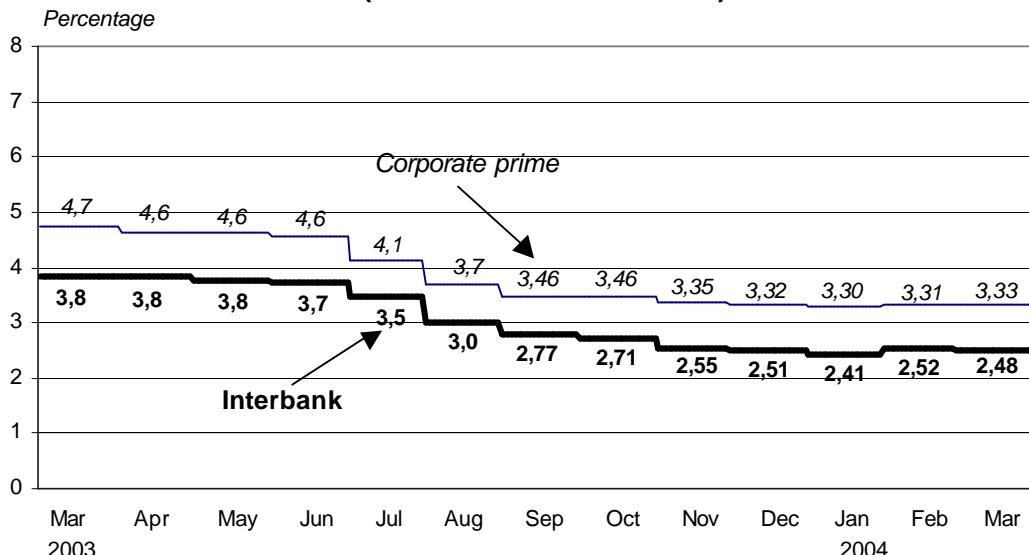

- Auctions of temporary purchase of CDBCRRP and BTP with a 1-day maturity amounting to S/. 180 and S/. 70 million at interest rates of 2,52 and 2,55 percent, respectively.
- Purchases of foreign currency over the counter by US\$ 60 million, at an average exchange rate of S/. 3,461.
- Overnight deposits on March 26, 29, 30 and 31 amounting to S/. 69; 16; 41 and 18 million, respectively.

Corporate prime interest rate at 3,33 percent

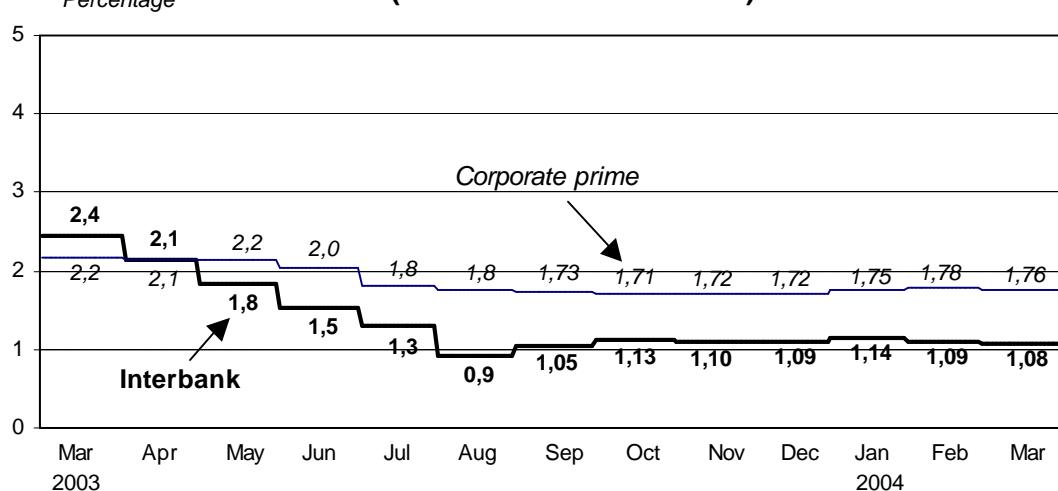

In March, the average corporate prime interest rate in domestic currency increased to 3,33 from 3,31 percent in February. Over

the same period, the rate in dollars passed from 1,78 to 1,76 percent.

**Monthly average interest rates in domestic currency
(March 2003 - March 2004)**

**Monthly average interest rates in foreign currency
(March 2003 - March 2004)**

Exchange rate: S/. 3,466

In March, the average exchange rate was S/. 3,466 per US dollar, down 0,5 percent from the previous month (S/. 3,484) and 0,2 percent from the average level of December 2003 (S/. 3,472). Excluding

February, the domestic currency keeps the appreciatory trend started in October 2003.

The appreciatory trend observed in most of March obeys to low depreciation expectations (1,8 percent according to

3-month forward operations), as a result of regional stability a latest surpluses in the trade balance. Therefore, there was a higher supply of foreign currency in the spot market and a lower demand in the forward market.

Higher foreign currency supply is observed as larger banks' purchases to the public (from US\$ 55 to US\$ 205 million), together with the redemption of non-delivery net sales operations (US\$ 182 million this month against US\$ 121 million in February) as well as lower pacts of net sales, which

(once swaps are excluded) fell from US\$ 157 million in February to US\$ 134 million in March.

In this context, the Central Bank made net purchases of foreign currency by US\$ 255 million. In the year, Central Bank's net purchases amounts to US\$ 668 million.

In March, the **balance of net forward sales** dropped US\$ 87 million, whereas the **banks' exchange position** increased US\$ 38 million.

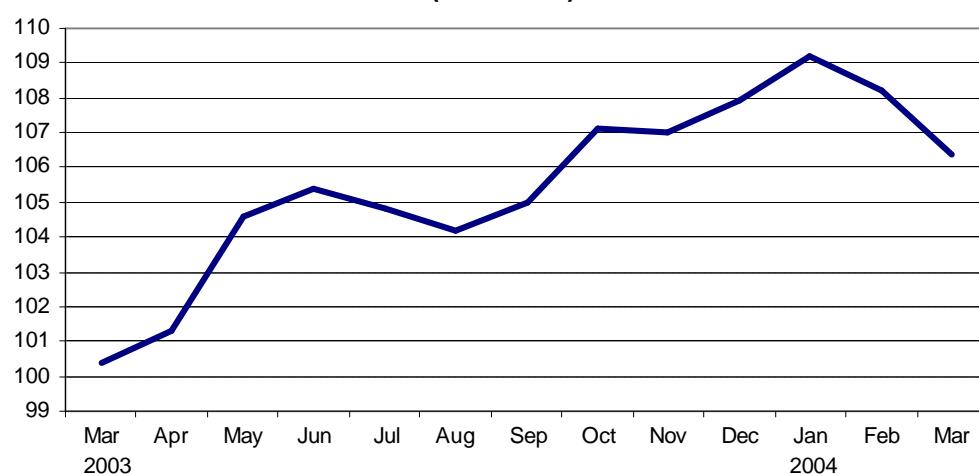

BANKS' EXCHANGE POSITION
(Millions of US\$)

	December 2002	December 2003	February 2004	March
a. Net sales to the public (i-ii)	905	607	591	504
i. Forward sales to the public	1 141	834	1 005	927
ii. Forward purchases to the public	236	227	414	423
b. Banks' exchange position	642	530	550	588

In March, the **real exchange rate** was 1,7 percent lower than in February. The difference between domestic inflation (0,5 percent) and external inflation (-0,8 percent) as well as a nominal 0,5 percent appreciation explained this decrease. It should be noted that external inflation reflects the dollar appreciation against our

main trade partners' currencies for a second consecutive month since last September. The US dollar increased 3 percent against the euro, 2 percent against the yen and the sterling pound, 4 percent against the Venezuelan bolívar and 3,5 percent against the Chilean peso.

MULTILATERAL EXCHANGE RATE INDEX
(1994=100)

March inflation: 0,46 percent

The rate of **inflation** reached 0,46 percent in March and 2,8 percent through last 12 months. It should be noted that this result mainly obeys to the imported component of inflation which rose 0,52 percent in March and 6,6 percent through last 12 month.

Core inflation was 0,44 percent this month (2,3 percent in annual terms), whereas the non-component of inflation was 0,51 percent and 3,7 percent respectively. When inflation and its components are measured as last 12

month averages, February and March figures are similar.

The March figure of inflation is accounted for by the price increases of rice and sugar, school tuitions and fuels, which contributed with 0,22 percent points in the case of rice and sugar and 0,16 and 0,09 ppt in the case of tuitions and fuels, respectively. On the other hand, the decrease in the prices of non-durable goods such as potato, vegetables and poultry, among others explained -0,24 percent points of March inflation.

Monetary base as of March 31, 2004

The balance of **monetary base** as of March 31 was S/. 7 055 million, up 0,7 percent from end-February (S/. 47 million). In average terms, the year on year growth of the monetary base was 15,7 percent compared with 15,5 percent in February, due to the higher public's currency requirement.

The expanding operations of the monetary base were the purchases of foreign

currency (US\$ 255 million or S/. 883 million) and the withdrawal of overnight financial system deposits (S/. 7 million). These operations were partially offset by the net issuance of CDBCRP (S/. 509 million), higher public sector deposits (S/. 245 million), net sales of foreign currency to the public sector (US\$ 32 million or S/. 111 million) and the net redemption of temporary purchases of securities (S/. 15 million).

Banking system monetary accounts as of March 7, 2004

As of March 7, last 4-week liquidity in **domestic currency** rose 0,5 percent (S/. 102 million) to a balance of S/. 20 623 million. In annual terms this aggregate rose 12,3 percent. On the other hand, credit to the private sector increased 3,5 percent (S/. 353 million) to S/. 10 429 million, up 8,3 percent from a year ago.

In **foreign currency**, liquidity decreased 2,0 percent (US\$ 193 million) through last 4 weeks and 4,3 percent over last 12 months, reaching a balance of US\$ 9 256 million. Credit in the same currency (US\$ 9 502 million) was 1,0 percent (US\$ 94 million) lower than 4 weeks ago and down 4,5 percent from a year ago.

A US\$ 211 million trade surplus in February

In February 2004, the **trade balance** recorded a US\$ 211 million surplus, US\$ 70 million higher than a year ago. Last 12 month trade balance records a surplus of US\$ 1 014 million.

Over February, **exports** amounted to US\$ 868 million, up US\$ 180 million from February 2003, a 26 percent increase for overall exports, 25 percent for traditional

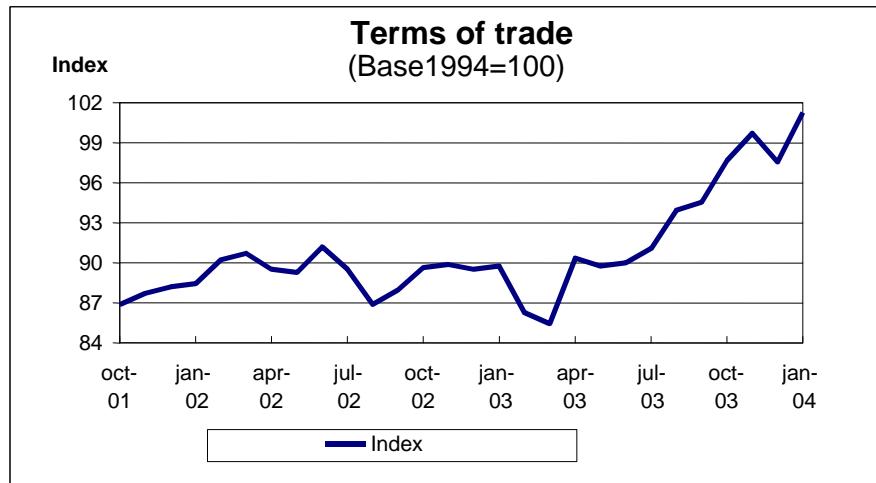

and 30 percent for non-traditional. This growth is mainly accounted for by the US\$ 180 million (55 percent) expansion in mining exports as well as the US\$ 20 million (29 percent) and US\$ 12 million (30 percent) increases in garments and farm products. Compared with the previous month, February exports are US\$ 30 million higher due to the higher dynamism of traditional products.

**Trade Balance
(Millions of US dollars)**

3. TRADE BALANCE	70	211		365	873	1014	177,9	16,2

Imports amounted to US\$ 657 million in February 2004, up 6 percent from a year ago. Larger acquisitions of intermediate and capital goods for the industry accounted for this increase. On the other hand, Camisea related imports were only US\$ 2 million, against US\$ 22 million in February 2003. Excluding this project, imports of capital goods grew by 27 percent, whereas total imports would be 10 percent higher. Regarding the acquisition of consumer goods, there was a reduction in both imports of durable and non-durable goods.

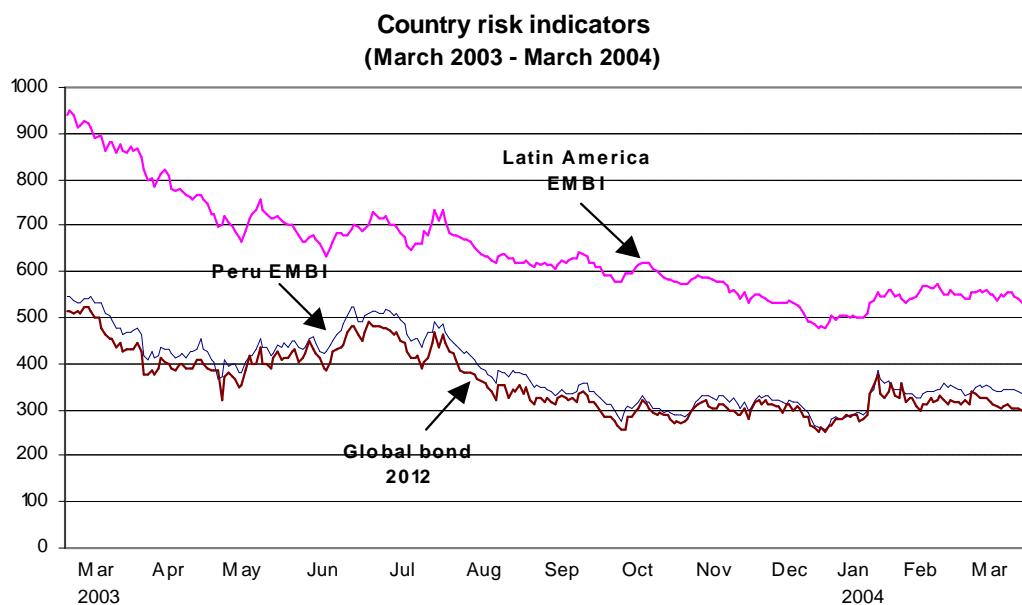

Terms of trade grew by 12,8 percent in February, thanks to the 15,9 percent increase of export prices that exceeded the increase of import prices (2,8 percent). The former was mainly due to the growth in the quotations of copper (47,5 percent), tin (42 percent), iron (13,3 percent) and gold (12,8 percent), whereas the latter due to the variation in wheat (20,9 percent), soybean (10,1 percent), meat (7,3 percent), dairy products (5,6 percent), rice (52,8 percent) and sugar (20 percent).

Spread of Global bond 2012 at 3,15 percent

In March, the spread of the **Peruvian Global bond 2012** averaged 3,15 percent, down from February (3,28 percent), whereas the EMBI+ of the **sovereign bond** fell from 3,56 to 3,44 percent over the

same period. The market reacted positively to the FED decision to maintain its interest rate at 1 percent and the announced IMF decision to support Argentina through a US\$ 3 billion loan.

International markets

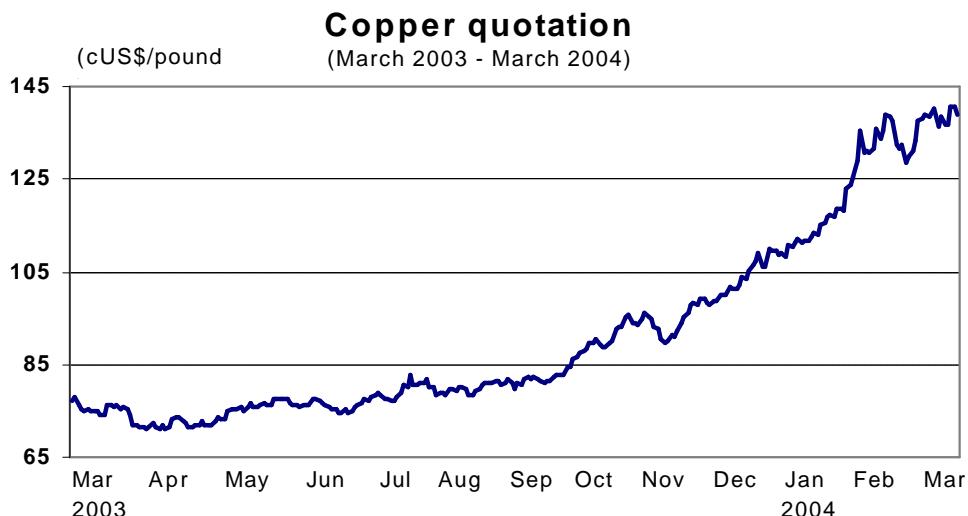

In March, the **gold** quotation increased 0,4 percent to US\$ 406,7 per Troy ounce due to the higher preference for gold as an strong

asset after the March 11 attack in Madrid and the tense situation in the Middle East.

The **copper** quotation increased 9 percent in March to US\$ 1,36 per pound. According to the International Cooper Study Group world copper demand would excess supply by 600 thousand metric tons, compared with

the 312 thousand MT deficit in 2003. On the other hand, LME inventories decreased from 210 to 189 thousand MT between March 24 and 31.

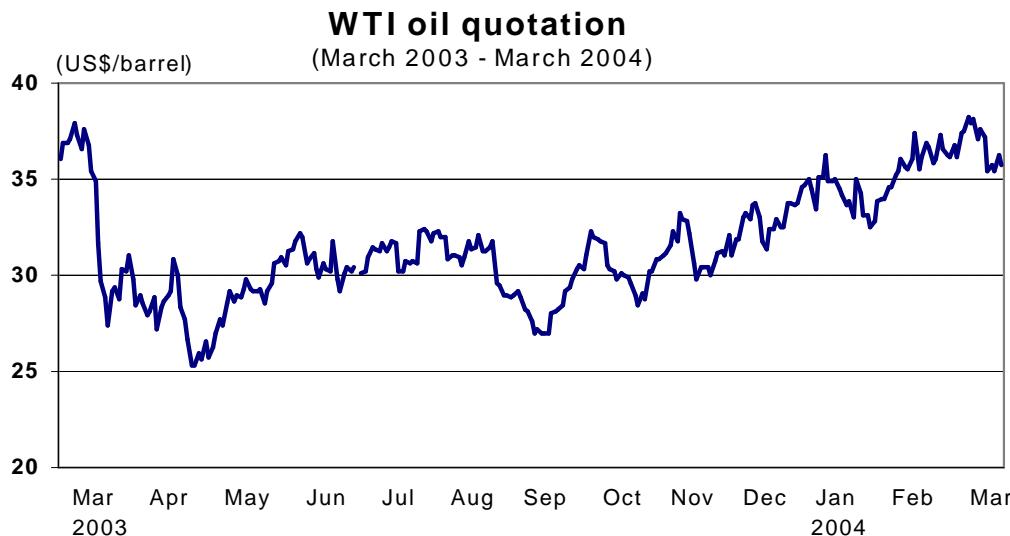

In March, **zinc** quotation increased 1,7 percent in line with the general trend observed in other mining quotations.

However, LME inventories rose from 690 to 716 thousand MT over last week.

The **WTI oil** price increased 5,8 percent to US\$ 36,7 per barrel, reflecting the announced OPEC decision to cut quotas as from April, the greater world demand

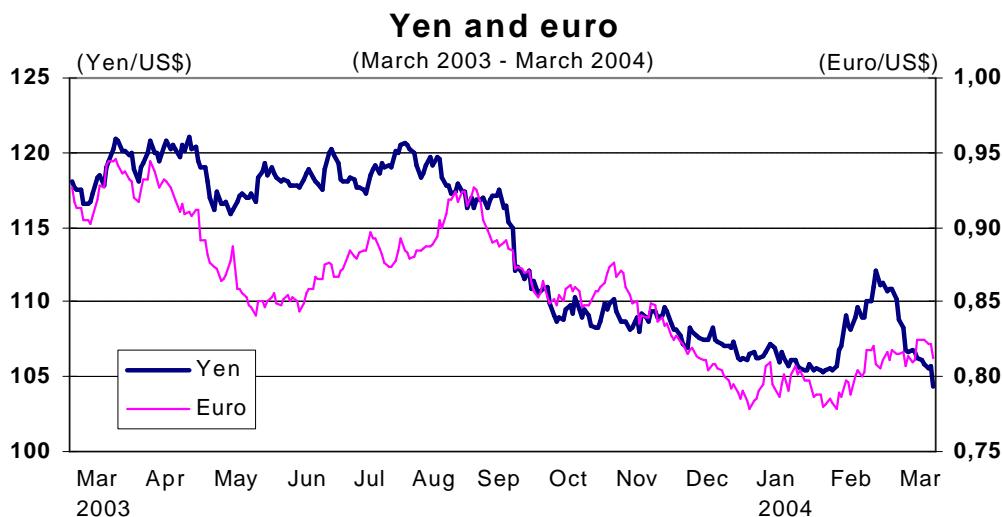

expected for 2004 and likely delays of Venezuelan oil shipments to the US due to the political problems in this Andean nation.

resumen informativo

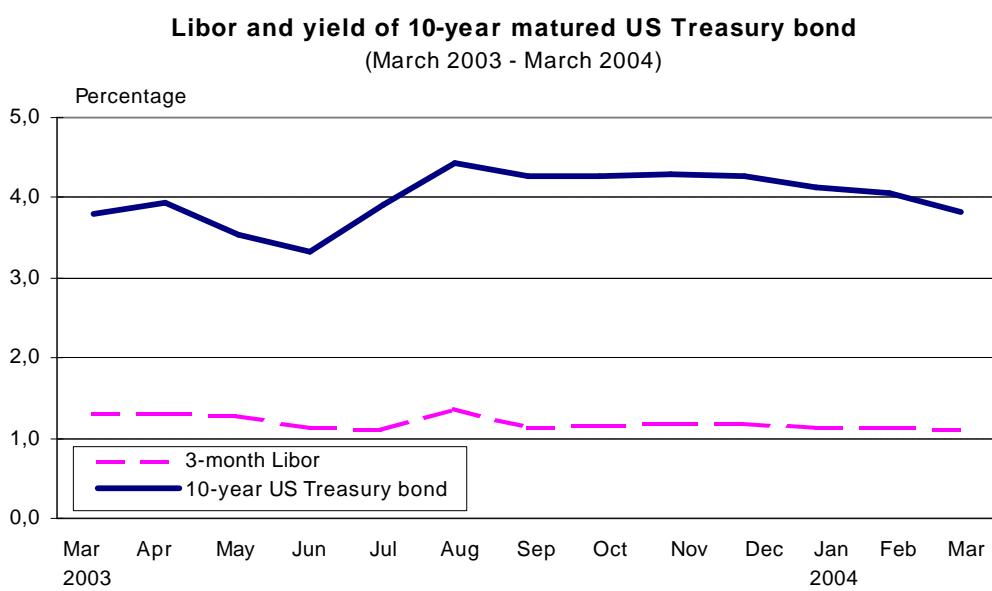

The **US dollar** appreciated 1,5 percent against the **euro** and depreciated 4,3 percent against the **yen**. The yen was favored by the improvement in Japanese

economy fundamentals and the lower intervention of Bank of Japan in exchange markets.

Between **February 29 and March 31**, the **3 month Libor** decreased from 1,12 to 1,11 percent, whereas the **yield of US Treasury bonds with a 10 year maturity** passed from 3,97 to 3,86 percent. The higher

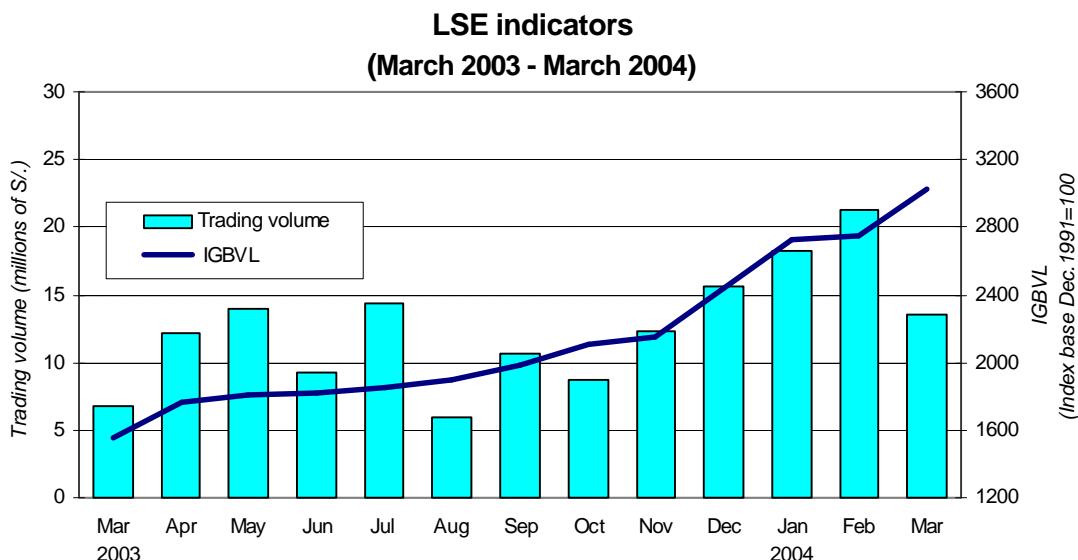

demand for low-risk assets, low February inflation and lower than expected growth in non-farm payrolls explained the fall in US Treasury yields.

Lima Stock Exchange (LSE)

In March, the LSE recorded a 10,2 percent growth in the General Index and a 11,9 percent one in the Blue Chip Index. Cumulative increase in the year is 24,4 percent for the General Index and 30

percent for the Blue Chip. This daily average trading volume in stocks was S/. 13,5 million, down from February (S/. 21,3 million), but higher than in 2003 (S/. 11,9 million).
