Net international reserves at US\$ 14 057 millions

As of **May 24**, net international reserves (NIR) amounted to US\$ 14 057 millions, up US\$ 428 millions from end-April. This increase was mainly due to net purchases of foreign exchange by US\$ 127 millions (purchases over-the-counter mechanism by US\$ 217 millions and sales to the public sector by US\$ 90 millions), higher financial system and public sector deposits in US\$ 361 and US\$ 8 millions, respectively,

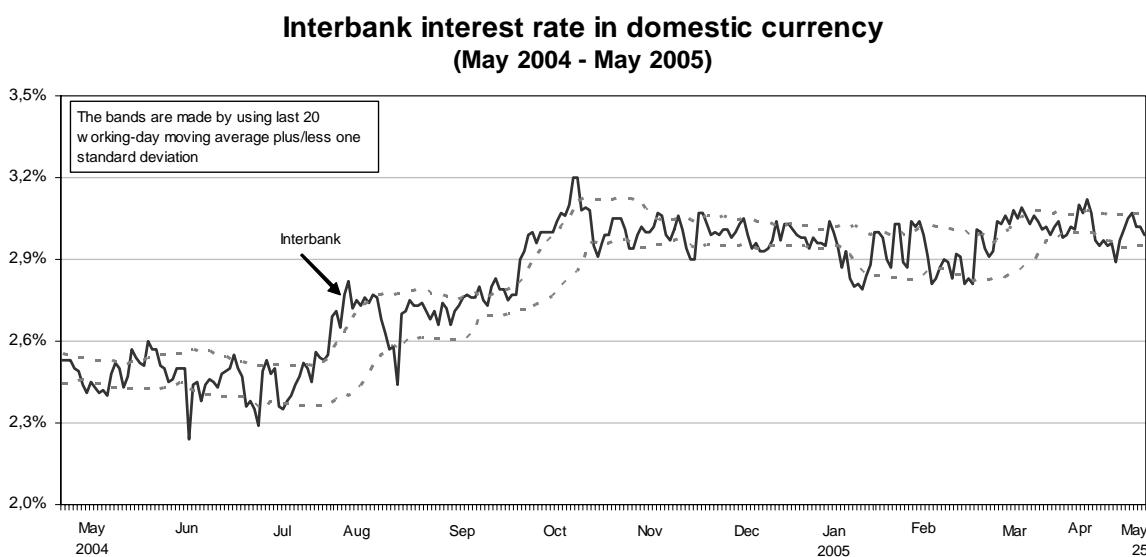

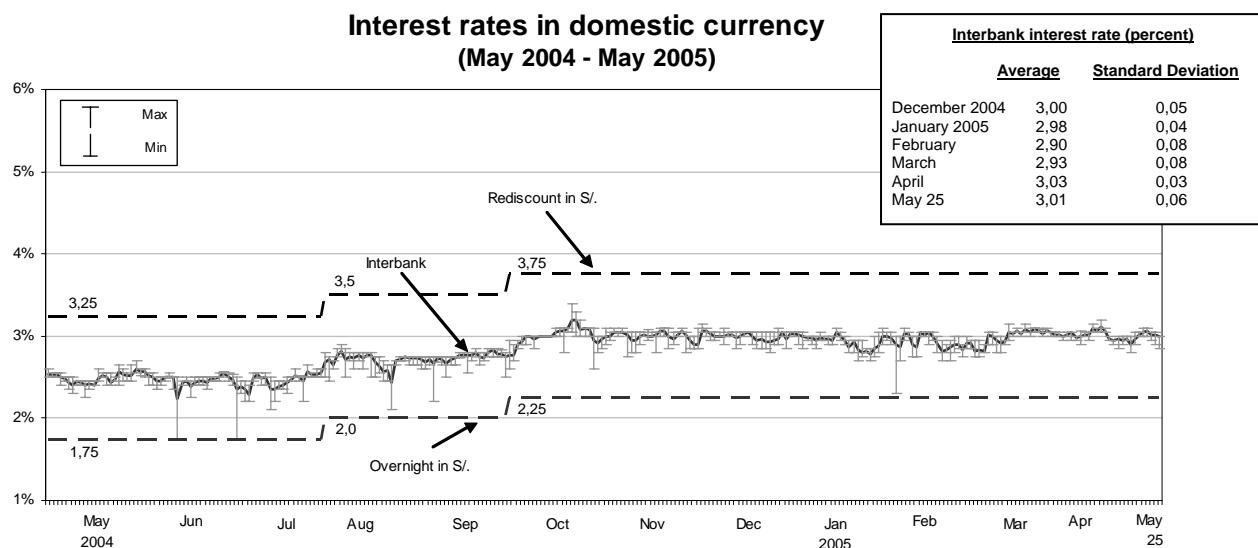

and investment yield in US\$ 6 millions. This evolution was partially offset by changes in the value of currencies and gold in US\$ 73 millions.

Monetary base as of May 22, 2005

The **monetary base** balance as of May 22 was S/. 9 514 millions, up 2,0 percent (S/. 186 millions) from end-April. In average terms, the year on year rate of growth of the monetary base in this period was 27,6 percent (25,5 percent in April).

The main explanations for this result were purchases of foreign currency over-the-counter mechanism (US\$ 207 millions or

S/. 674 millions), CDBCRP's net redemptions (S/. 219 millions) and lower financial system *overnight* deposits (S/. 58 millions). These operations were partially offset by higher public sector deposits (S/. 464 millions), sales of foreign currency to the public sector (US\$ 90 millions or S/. 293 millions) and by the redemption of temporary purchases of securities (S/. 35 millions).

Banking system monetary accounts: April 2005

In April, liquidity in **domestic currency** decreased 1,1 percent (S/. 304 millions), to a balance of S/. 27 392 millions. Central Government surplus of S/. 1 767 millions in April 2005

Over the period May 2004 - April 2005, the **central government** recorded a primary surplus of S/. 3 258 million (compared to S/. 1 492 million of the period May 2003 – April 2004). In April 2005, the central government primary surplus was S/. 1 767 million, up S/. 1 426 million from a year ago, mainly due to higher income tax clearance and a lower current expenditure, since the school bonus, usually granted in April, was given two months earlier.

Current revenue totaled S/. 4 756 million this month, up 46 percent from a year ago, reflecting higher income tax -clearance (139 percent) and payments in advance (41 percent)-; the former reflected better enterprises' profitability, mainly in the mining sector, as well as the higher corporate rate (from 27 to 30 percent). The Valued added Tax and tariffs also increased due to higher imports. On the other hand, a temporary corporate tax on

net assets was introduced this month –recording first quota and full year payments-. Non-tax revenue increased 38 percent to S/. 426 million due to greater gas & oil royalties and canon (110 percent) as well as to the increase in mining royalties (S/. 37 million).

Non-financial expenditure totaled S/. 2 830 million in April 2005, similar to the amount recorded a year ago, since the

payment of the school bonus in February and not in April, was offset by higher outlays in wages and salaries, goods and services and transfers to local governments.

Financial expenditure amounted to S/. 179 million, up S/. 71 million (66 percent) from a year ago, reflecting both higher external (S/. 59 million from Global bonds and Paris Club) and domestic

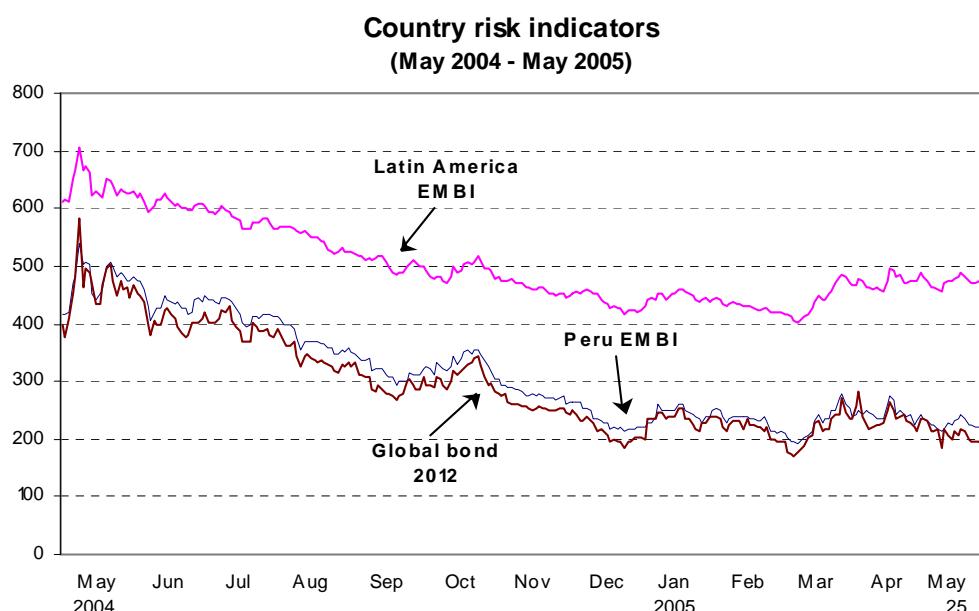

service (S/. 12 million from Sovereign bonds).

External financing was negative in S/. 94 million (US\$ 29 million), disbursements of US\$ 59 million minus amortization of US\$ 88 million. Similarly, **domestic financing** was negative in S/. 1 677 million, with placements of Sovereign bonds by S/. 163 million.

2012 Global bond spread at 1,85 percent

Over the period **May 18 to 25**, the **2012 global bond** spread fell to 1,85 from 2,14 percent; whereas the **EMBI+ Peru** spread decreased from 2,36 to 2,11 percent. The

fixed income market reacted positively to the US core inflation release (0 percent in April), which lowered the possibility of an aggressive rise of the federal funds rate.

International markets

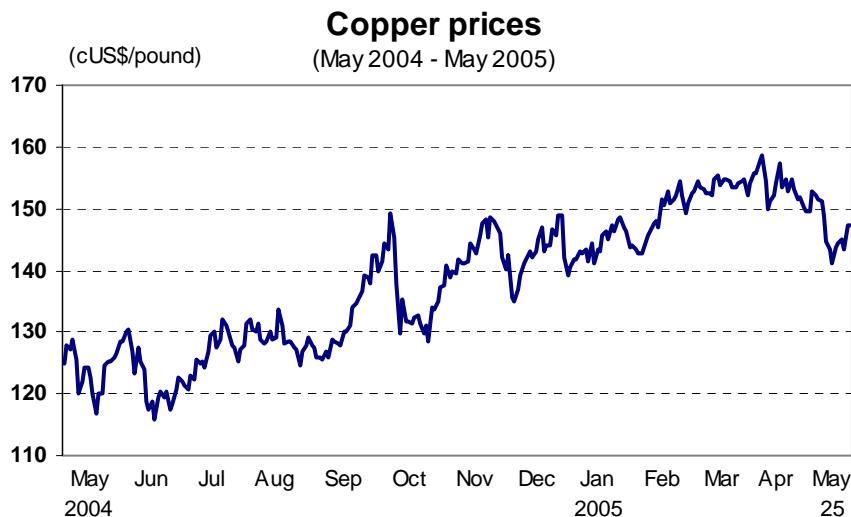

From **May 18 to 25**, the **gold** price dropped 0,4 percent to US\$ 419 per Troy

ounce, due to the strengthening of the US dollar.

During this period **copper** price increased 2,5 percent to US\$ 1,47 per Troy ounce. Last week, London Metal Exchange -LME-inventories decreased from 53 to 49 thousand MT, close to the minimum record

of January 21 (43 thousand MT, the lowest since 1988). The temporary halt of Tintaya mine operation (property of BHP Billiton) due to local dweller claims also pressured for a price rise.

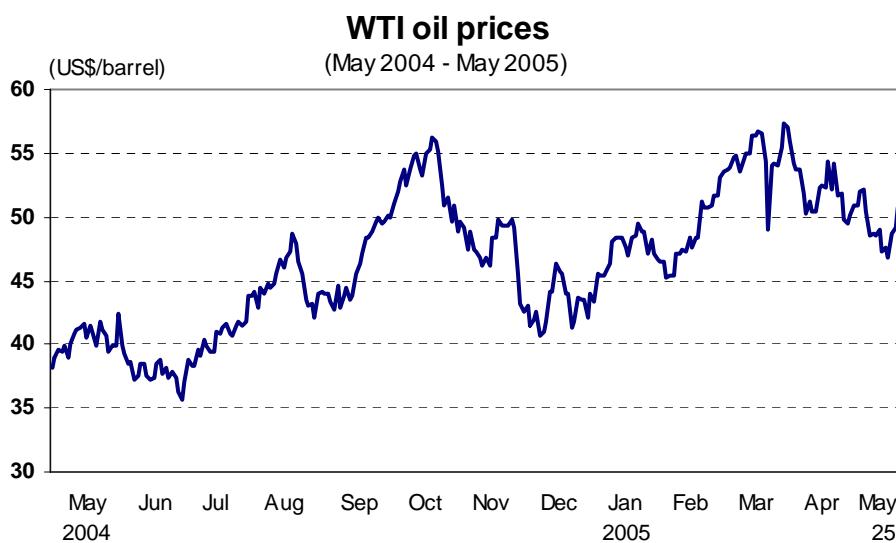

Over similar period, **zinc** price rose 1,8 percent to US\$ 0,57 per ounce, reflecting the fall in LME inventories, from 534 to 528 thousand MT, the lowest since the

second quarter of 2002, given the higher demand of consumers and institutional investors.

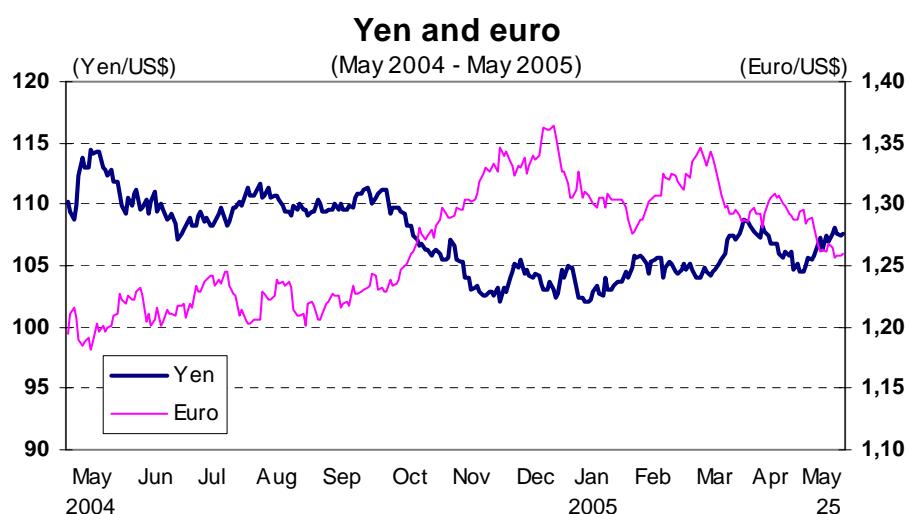

The WTI **oil** price increased 7,5 percent to US\$ 50,8 per barrel. Later report of the US Energy Agency stressed an unexpected

fall in crude oil inventories of 1,6 million barrel to 332 million.

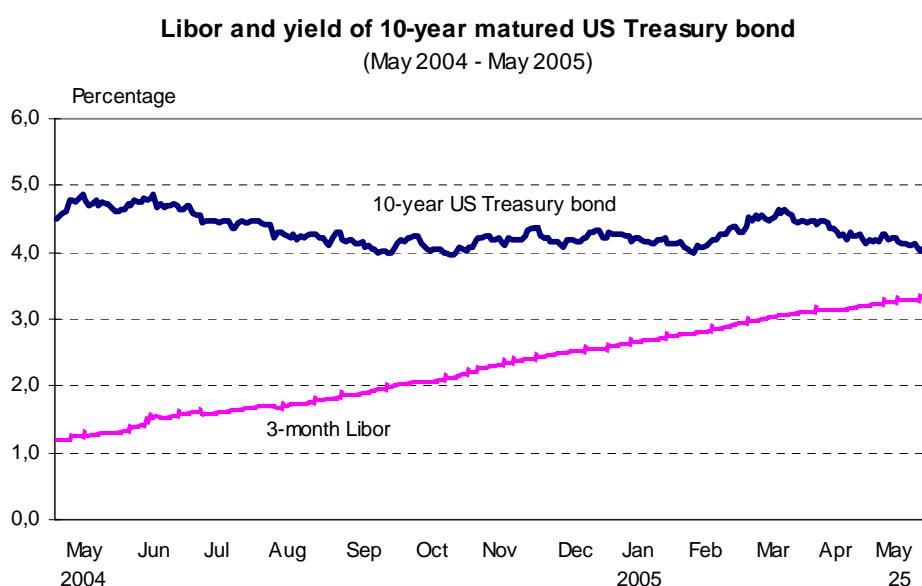

Over the period under analysis, the **US dollar** appreciated 0,6 percent against the euro and yen. The weakness of euro was attributed to the uncertainty of the referendum in France and the Netherlands upon the adoption of an European Constitution, a lower than expected growth

in France and the fall of the business confidence in Germany. Also, the differential between the growth rate and the interest rate in the US and Euro was on the main factors explaining the US dollar appreciation against the euro (7,1 percent year-to-date).

3-month Libor increased from 3,28 to 3,31 percent, whereas the **yield of the 10-year maturity US Treasury** remained at 4,09 percent. It should be noted that in

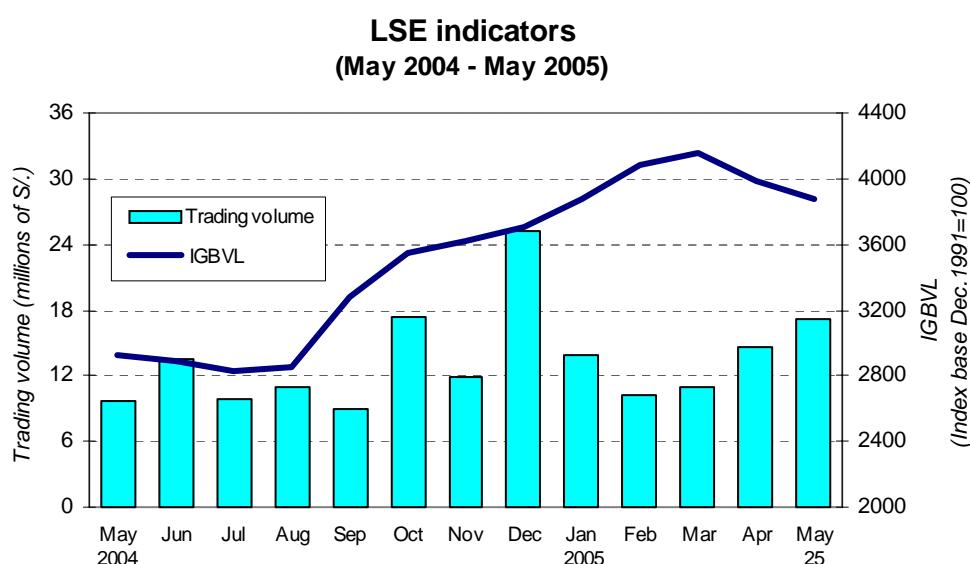

the last days, the demand for these securities increased due to the low risks of a rising inflation according to the FED.

Lima Stock Exchange

As of May 25, the **General** and **Blue Chip** indices of the Lima Stock Exchange fell 2,7 and 2,4 percent, respectively. After showed an accumulated monthly fall in the stock-exchange indices of 7,1 and 7,3 percent, respectively at May 13; a recovery is observed due to the

improvement of the base metals prices. It emphasized specially, the perform of the shares of the mining company El Brocal. Year-to-date, these indices have increased 4,5 and 4,0 percent, respectively.
