

BANCO CENTRAL DE RESERVA DEL PERÚ

WEEKLY REPORT

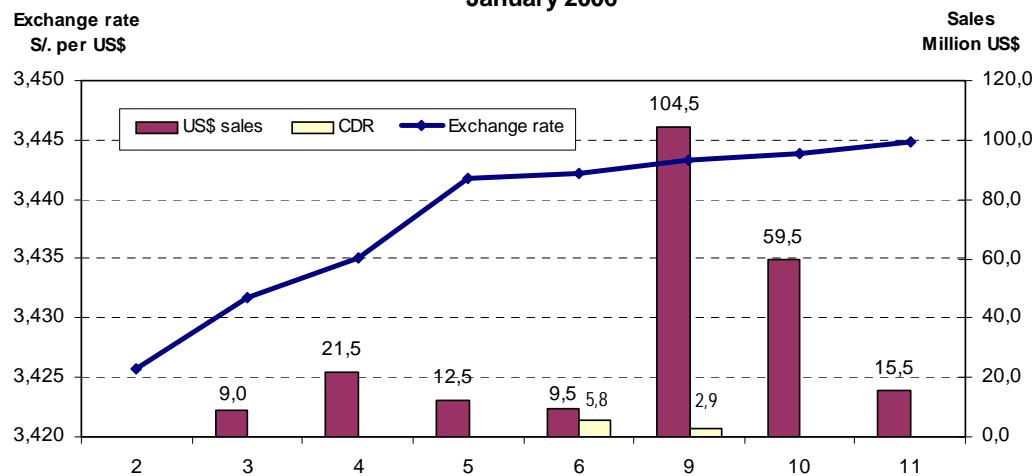

Nº 2 – January 13, 2006

■ Year to date the CRBP sales US\$ 232 million	xiii
■ Interbank interest rate rise to 3,50 from 3,34 percent	xiv
■ Decreases the differential between the corporate rates	xv
■ Liabilities subject to reserve requirement increase in soles and dollars	xv
■ CRBP sales foreign currency by US\$ 202 million between January 5 and 11	xv
■ NIR covers 2,8 times external debt due in one year	xvi
■ Monetary base as of January 7	xvii
■ Banking system credit in soles increased 7,8 percent	xvii
■ International markets	xviii
■ Country risk fell to 194 basis points	xviii
■ Metal prices at new maximums	xix
■ US dollar fell against euro and yen	xxi
■ 10 year matured US Treasury yield rose to 4,45 percent	xxii
■ LSE dropped 2,6 percent in the year	xxii

Year to date the CRBP sales US\$ 232 million

The average exchange rate of the day increased from S/. 3,430 per dollar in December 30 to S/. 3,445 per dollar in January 11 on the interbank market. In the month, there were demand pressures in the spot market (US\$ 120 million) and forward market (US\$ 74 million), and an increased of the bank's exchange position (US\$ 42 million). These pressures were covered basically with the intervention of the Central Reserve Bank of Peru (CRBP) with sales of foreign currency over-the-counter mechanism and with placements of Adjustable Certificates of Deposits (CDRBCRP). The CRBP sales US\$ 232 million in exchange market and auctions Adjustable Certificates of Deposits by US\$ 9 million.

1/ Bidder with negative sign / Supplier with positive sign.

2/ As of January 11, 2006.

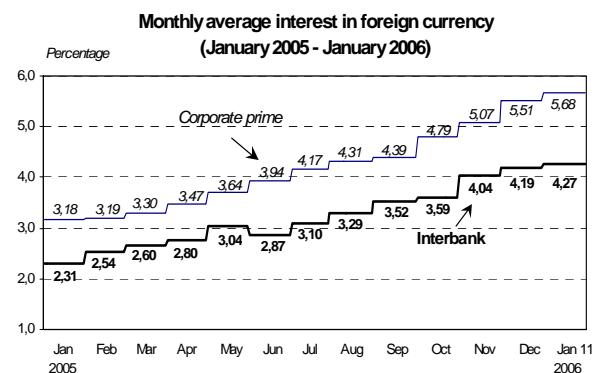

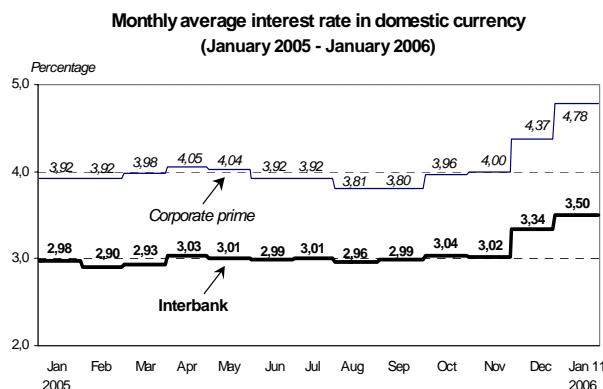

Interbank interest rate rise to 3,50 from 3,34 percent

In line with the raise in the reference interest rates from 3,25 to 3,50 percent in the January Monetary Program, the average **interbank rate** in **domestic currency** increased from 3,34 percent in December to 3,50 percent on January 11.

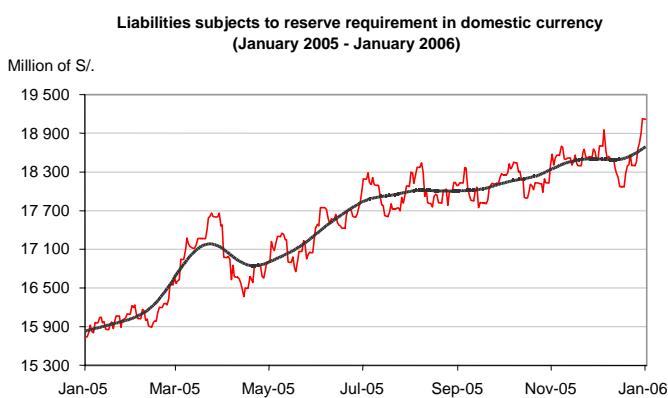

Decreases the differential between the corporate rates

As of **January 11**, the 90-day average corporate prime interest rate in domestic currency augmented from 4,37 percent in December to 4,78 percent and the rate in dollars from 5,51 to 5,68 percent. Thus, the differential between the mentioned rates diminished from 114 to 90 basis points, owed partly to the increase of the reference interest rate of the CRBP to 3,50 percent in January's Monetary Program.

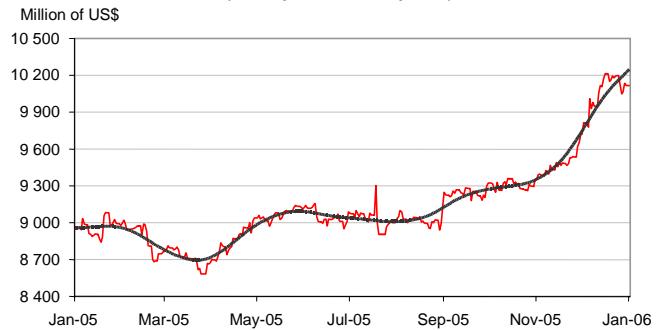

Liabilities subject to reserve requirement increase in soles and dollars

On January 10, the liabilities subject to reserve requirement in **soles** was S/. 19 102 million; up S/. 701 million from December 31, 2005. Meanwhile the liabilities subject to reserve requirement in **dollars** was US\$ 10 252 million, up US\$ 56 million from December 31, 2005.

**Liabilities subject to reserve requirement in foreign currency
(January 2005 - January 2006)**

CRBP sales foreign currency by US\$ 202 million between January 5 and 11

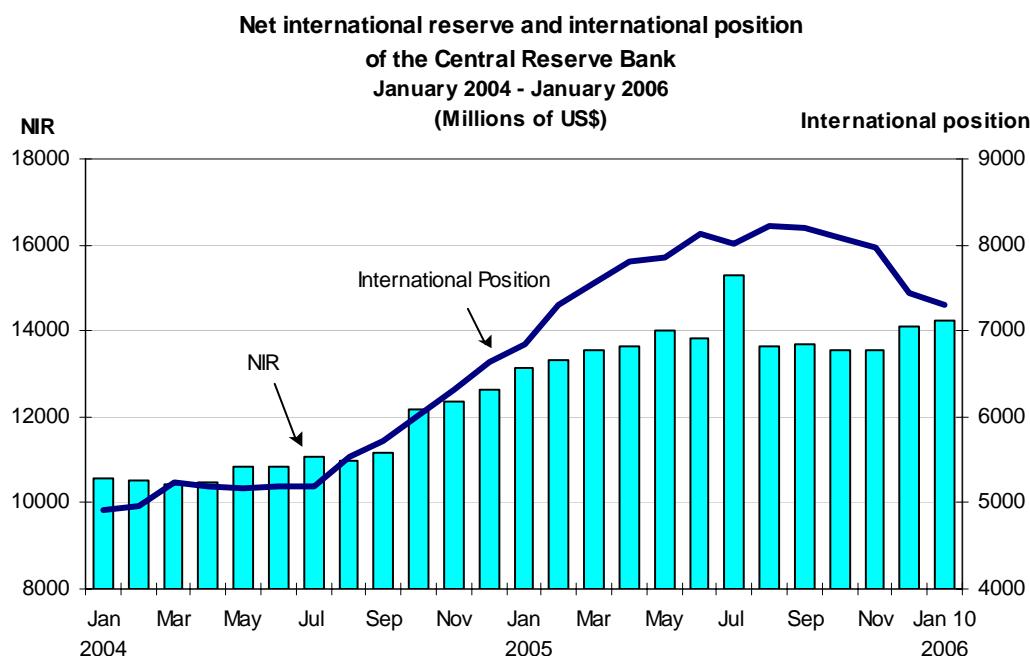

Between **January 5 and 11**, the Central Bank made the following operations:

- Auctions of temporary purchase of CDBCRP and BTP at an average daily of S/. 2 357 million and at an average interest rate between 3,53 and 3,64 percent.
- Auctions of Adjustable Certificates Deposits (CDRBCRP) with a 6 month maturity by S/. 2, S/. 18 and S/. 10 million at an average interest rate of 4,55; 4,59 and 4,60 percent, respectively.
- Foreign currency sales over-the-counter mechanism by US\$ 202 million at an average exchange rate of S/. 3,443 per dollar.
- Overnight deposits on January 11 by S/. 7 million.

NIR covers 2,8 times external debt due in one year

As of **January 10**, the **net international reserves (NIR)** amounted to US\$ 14 253 million, up US\$ 156 million from end-2005. This increase is explained mainly by higher financial system deposits in US\$ 273 million, changes in the value of currencies and gold in US\$ 78 million and higher public sector deposits in US\$ 27 million. This evolution was partially offset by sales over-the-counter mechanism by US\$ 217 million, net paid of interests by US\$ 2 million and lower deposits of the Insurance Fund's Deposit by US\$ 2 million.

As of **January 10**, NIR cover 2,8 times external debt due in one year, 14 months of imports and 0,7 times the total monetary aggregate in soles, which is a high level of coverage. The **Central Bank's international position** amounted to US\$ 7 312 million, that is equivalent to 1,4 times external debt due in one year, 7 months of imports, 2,1 times the monetary base and 0,4 times the total monetary aggregate in soles.

Monetary base as of January 7

The **monetary base** balance as of January 7 was S/. 12 138 million up 3,5 percent (S/. 414 million) from end-2005. In average terms, the year on year rate of growth of the monetary base in this period was 30,7 percent (26,9 percent in December 2005).

The main explanations for this result were lower public sector deposits (S/. 587 million), CDBCSP's net redemptions (S/. 430 million) and lower financial system overnight deposits (S/. 60 million). These operations were partially offset by the lower temporary purchase of securities (S/. 482 million), sales of foreign currency over-the-counter mechanism (US\$ 53 million or S/. 180 million) and net placements of Adjustable Certificates Deposits (S/. 20 million).

Banking system credit in soles increased 7,8 percent

Through last 4 weeks, liquidity in **domestic currency** increased 5,9 percent (S/. 1 715 million) to a balance of S/. 30 715 million. Credit to the private sector in the same currency augmented 7,8 percent (S/. 1 091 million) to S/. 15 047 million. However, in annual terms this aggregates grew by 16,9 and 29,7 percent, respectively.

Liquidity in **foreign currency** increased 5,5 percent (US\$ 570 million) to a balance of US\$ 10 840 million (an annual growth rate of 12,6 percent). Credit to the private sector in the same currency augmented 1,6 percent (US\$ 159 million) to US\$ 10 398 million (an annual growth rate of 5,3 percent).

1/ Short term external liabilities of banking enterprises.

International markets

The Peruvian economy saw a favorable international context due to: i) new historic minimums which made possible a decrease in Peru's country risk and ii) new records on main mining exports. For instance, the copper quotation reached a new historic maximum, the gold achieved its maximum level in 25 years and the zinc its maximum in 17 years.

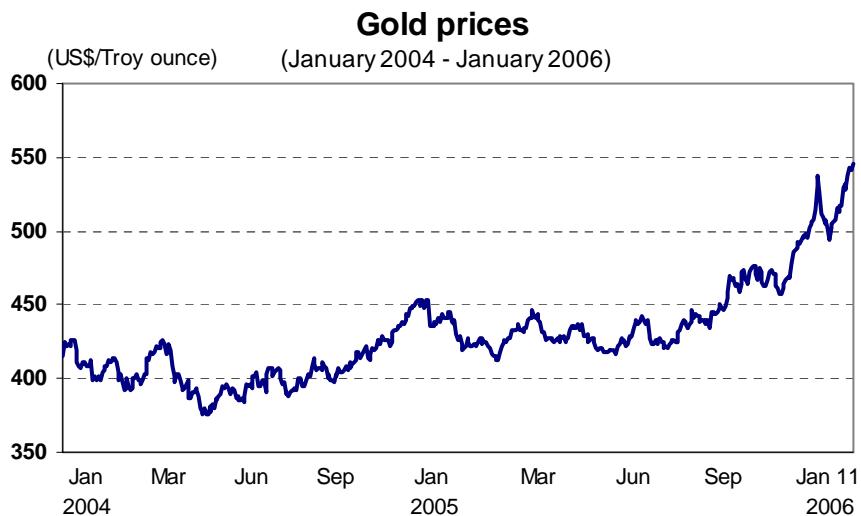

Country risk fell to 194 basis points

After the December pick up due to the electoral uncertainty-, the country risk dropped from 206 to 194 bps, in line with the global and regional trend in the emerging markets. Thus, on January 11 the EMBI+ Global and the EMBI+ Latin recorded new historic minimums: 226 and 258 bps, respectively. This path is in line for the expected end in FED's interest rate raise cycle and the relatively scarcity in the supply of emerging bonds.

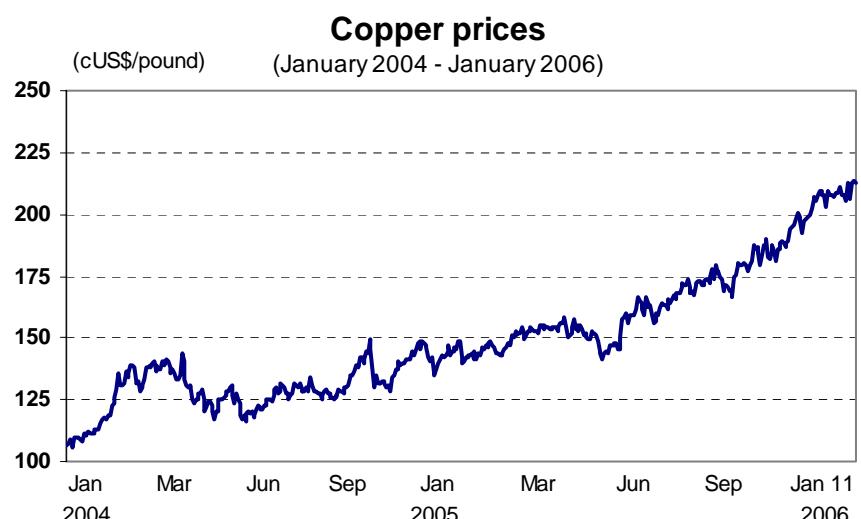

Metal prices at new maximums

Between January 1 to 11, the **gold** quotation soared 5,3 percent to US\$ 545 per troy ounce, a maximum in 25 years, due to the weakening of the US dollar, the increase in oil prices and a higher demand of investment funds in response to portfolio criteria.

On January 10, the copper quotation picked a new maximum: US\$ 2,14 per pound, reflecting the strike in Chilean mine Codelco (the largest world producer). On the other hand, investment bank CSFB forecasted a global deficit of 200 thousand MT for this year. In the year, the **copper** quotation has increased 2,4 percent.

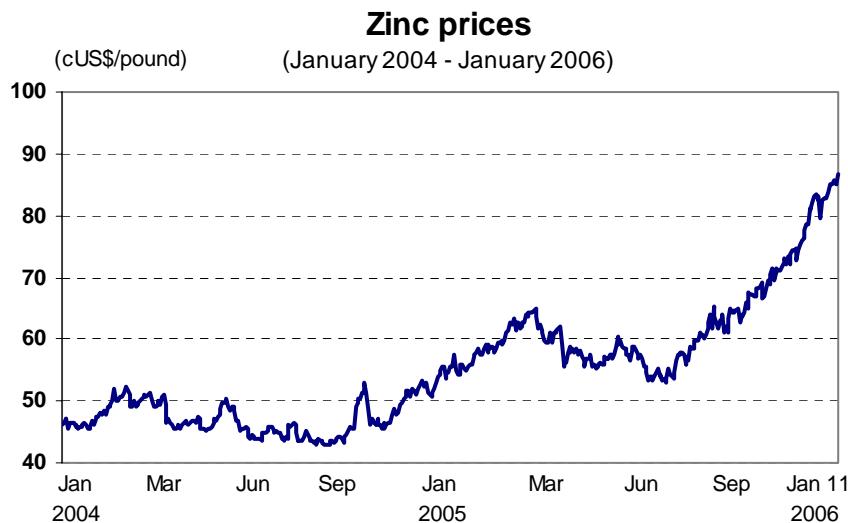

resumen informativo

On January 9, the **zinc** quotation recorded a maximum of last 17 years. The outlook for 2006 shows an increase in the demand from Asia (52% of world demand), mainly due by China which has become a net importer since 1988; and constraints in supply due to the absence of new projects, excluding mine San Cristobal in Bolivia which would start to operate in mid-2007. These factors determined a new decrease in LME inventories –from 637 thousand MT in early 2005 to 389 thousand as of January 11, 2006 (the lowest level since September 2001). For this year, specialists point out a global deficit of 300-400 thousand MT, which would fueled prices further.

resumen informativo

In the year, the **WTI oil** price grew by 4,8 percent to US\$ 63,9 per barrel, due to the concern upon the stability of main suppliers, such as Iran which menaced to resume its nuclear program, attacks to pipelines in Nigeria, the quarrel on natural gas prices between Russia and Ukraine and the closing of a Iraqi refinery regarding security problems.

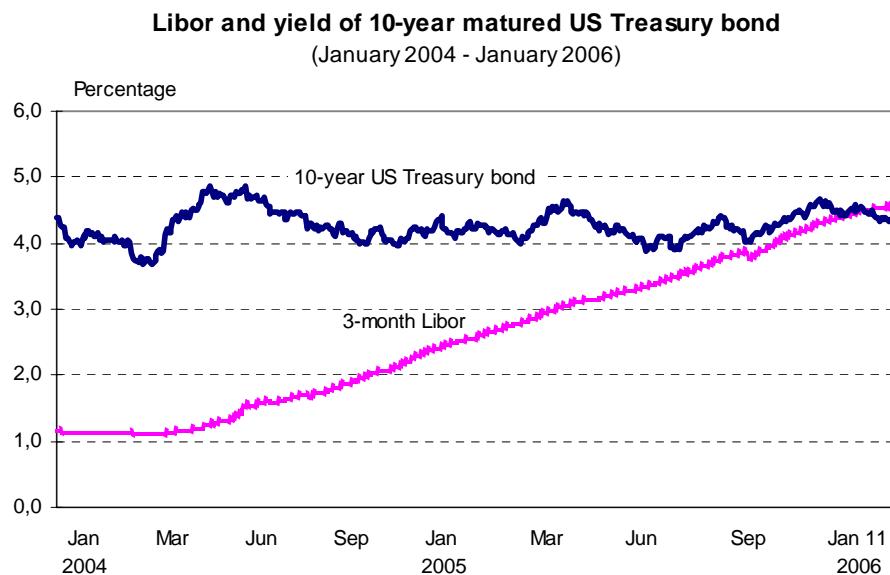

US dollar fell against euro and yen

In the period under analysis, the **US dollar** depreciated 2,5 percent against the **euro** and 3,3 percent against the **yen** due to the expected end on FED's interest rate raise cycle. The euro was also favored by retail sales and consumer confidence in the euro region. On the other hand, the statement of Japanese Minister of Finance who said he is not concerned about yen appreciation.

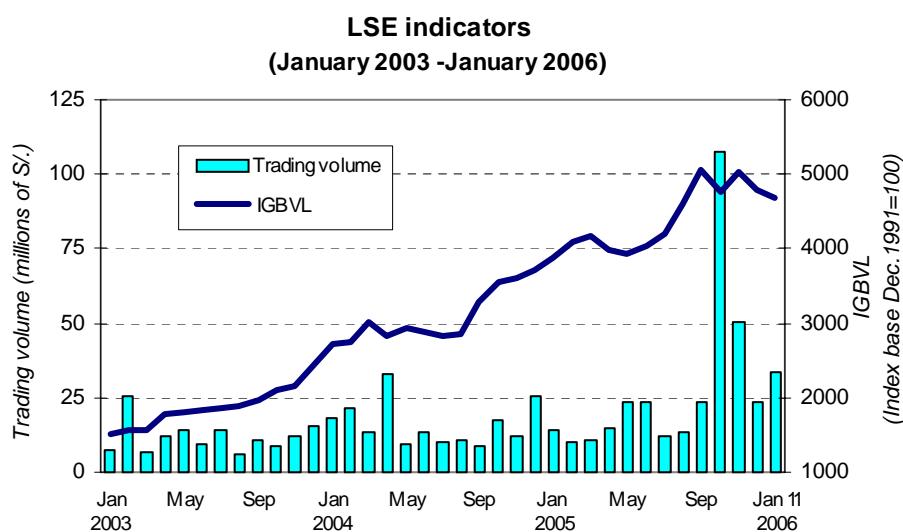

10 year matured US Treasury yield rose to 4,45 percent

Between December 31 and January 10, the **3-month Libor** increased from 4,53 to 4,58 percent, whereas the yield of **10 year matured US Treasury yield** rose to 4,45 from 4,37 percent. The forward market is expecting new raises in FED interest rate of 25 bps each one in next meetings of January 31 and March 28, which would bring FED's interest rate to a final level of 4,75 percent.

LSE dropped 2,6 percent in the year

Over the period under analysis, LSE main indices IGB and ISB dropped 2,6 and 2,3 percent respectively, despite new records on mining quotations (for gold, copper, zinc and lead) and the favorable financial statements of the fourth quarter of 2005, it prevailed the electoral uncertainty among the investors.
