Corporate prime interest rate in soles increased to 6,00 percent

As of **March 29**, the average 90-day corporate rate in soles augmented from 5,38 in February to 6,00 percent and the rate in dollars from 5,79 to 5,86 percent. Net international reserves at US\$ 14 278 million

As of **March 28**, **net international reserves** (NIR) amounted to US\$ 14 278 million, up US\$ 290 million from end-February. This increase is explained by higher financial system deposits in US\$ 363 million, investment yield by US\$ 45 million and changes in the value of currencies and gold in US\$ 19 million. This evolution was partially offset by lower public sector deposits in the Central Bank by US\$ 139 million.

Year-to-date, NIRs have increased US\$ 181 million. On the other hand, the **Central Bank's international position** (US\$ 7 200 million) dropped by US\$ 250 million.

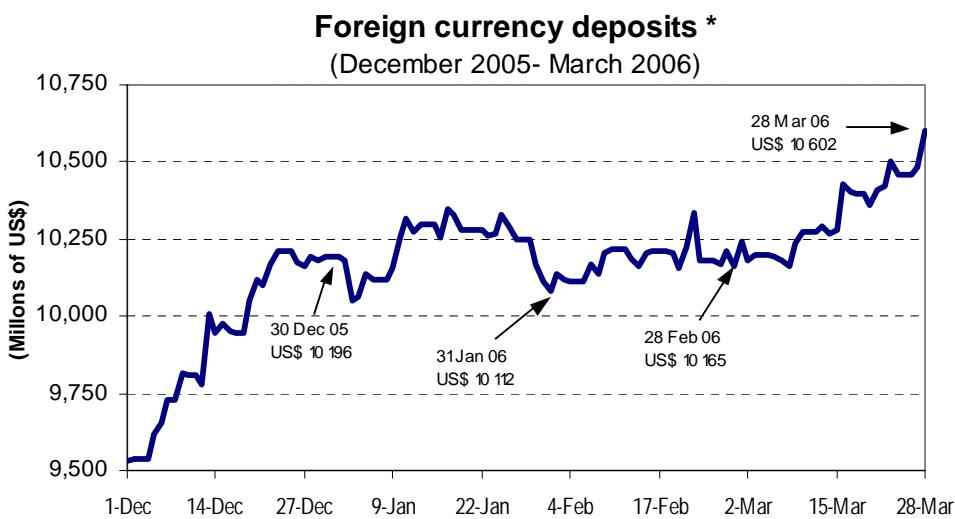

Exchange rate decreased from S/. 3,369 to S/. 3,350 per dollar

Between **March 23 and 30**, the interbank **exchange rate** appreciated 0,6 percent from S/. 3,369 to S/. 3,350 per dollar, explained in part by the results of the last electoral polls and the higher demand for soles for the payments' regularization of income tax. Year-to-date, the nuevo sol accumulates an appreciation of 2,2 percent.

Dollar deposits increased in US\$ 437 million

As of March 28, the total foreign currency liabilities required to have reserves (TOSE) was US\$ 10 602 million, higher in US\$ 437 million with respect to February 28. This increment in the banking system's foreign currency availability reflects in an increment of the current account deposits, mainly.
