

BANCO CENTRAL DE RESERVA DEL PERÚ

WEEKLY REPORT

Nº 14 – April 7, 2006

■ Interbank interest rate increased to 4,76 percent	xi
■ Corporate prime rate in soles rises to 6,12 percent	xii
■ Monetary operations	xiii
■ Growing Net International Reserves Reached US\$ 14 533 million	xiii
■ Average Exchange Rate at S/. 3,340 in March	xiv
■ Real Exchange Rate Depreciated 1,5 Percent in March	xv
■ 0,46 Percent Inflation in March	xvi
■ Macroeconomic Expectations	xvii
■ Monetary Base as of March 31, 2006	xviii
■ Cuentas monetarias del Sistema Bancario al 15 de marzo de 2006	xviii
■ Trade Surplus of US\$ 384 Million in February and Favorable Prospects for March	xix
■ Country Risk increases to 218 basic points	xxi
■ Copper and zinc reach again historic highs	xxi
■ Bolsa de Valores de Lima	xxiv

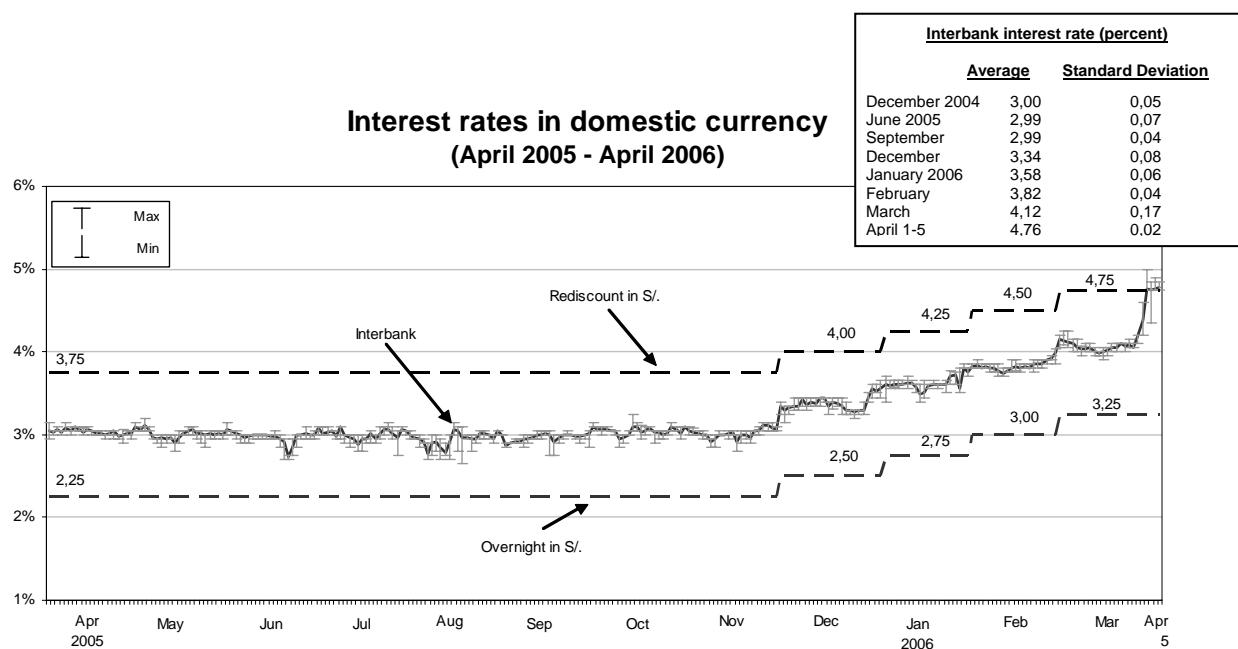

From now on (Weekly Report N° 14), the Central Reserve Bank of Peru (BCRP) will calculate the core inflation following a new methodology. This indicator on the tendency of inflation consists of the Consumer Price Index (CPI), excluding the prices of those products showing a great variability, e.g. some food products, fuels, utilities, and transport.

This new way of measuring the core inflation not only involves good statistical properties in terms of anticipation, but also provides a better response when used in structural projection models such as the ones used by the BCRP.

A historical series of core inflation measurements, as well as a Working Paper on evaluation indicators on the underlying inflation may be found on the Central Bank's website (<http://www.bcrp.gob.pe>).

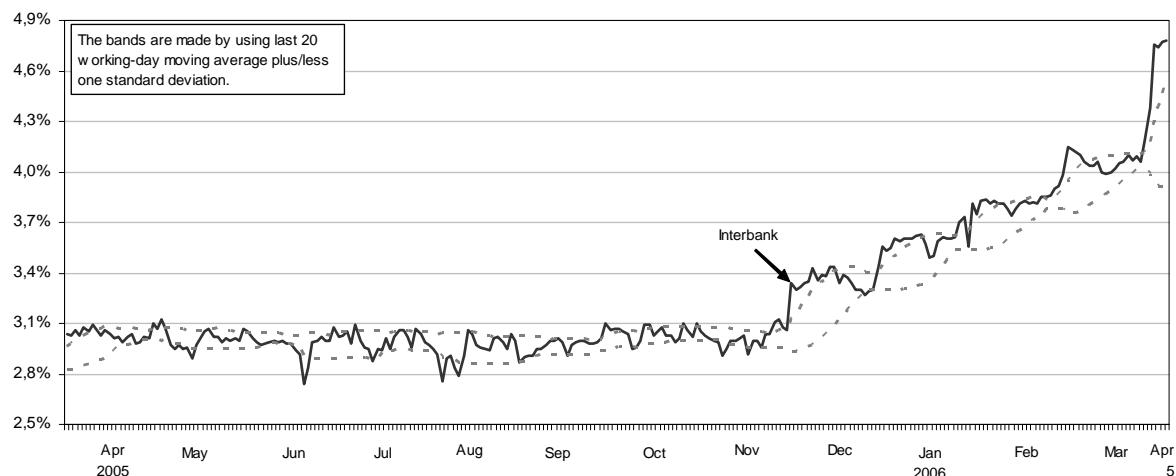

Interbank interest rate increased to 4,76 percent

In line with the increase in the Central Bank reference interest rate (3,75 to 4,0 percent), the average interbank rate in domestic currency rose from 3,82 percent in February to 4,12 percent in March. Due mainly to a lower liquidity in the financial system associated with income tax payments, the interbank rate increased 4,76 percent as of April 5.

resumen informativo

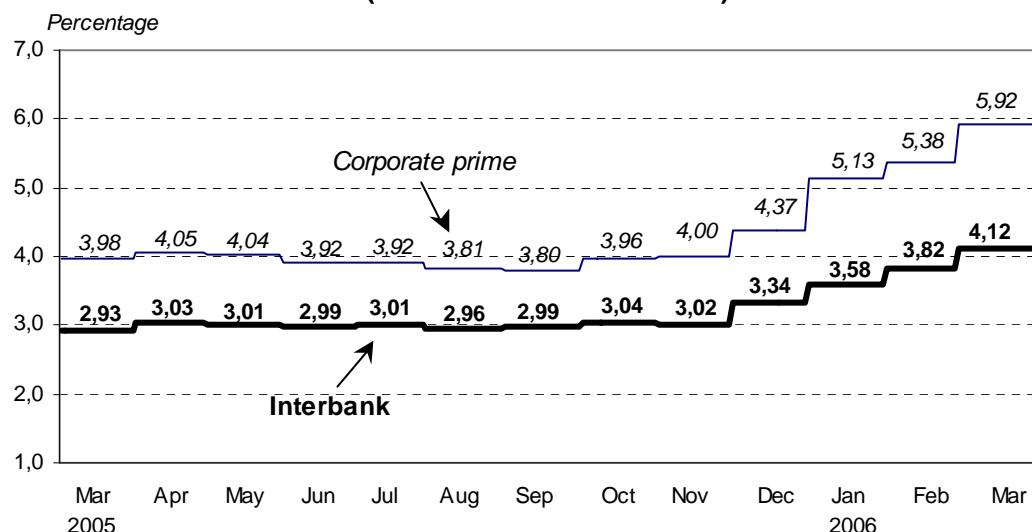

**Interbank interest rate in domestic currency
(April 2005 - April 2006)**

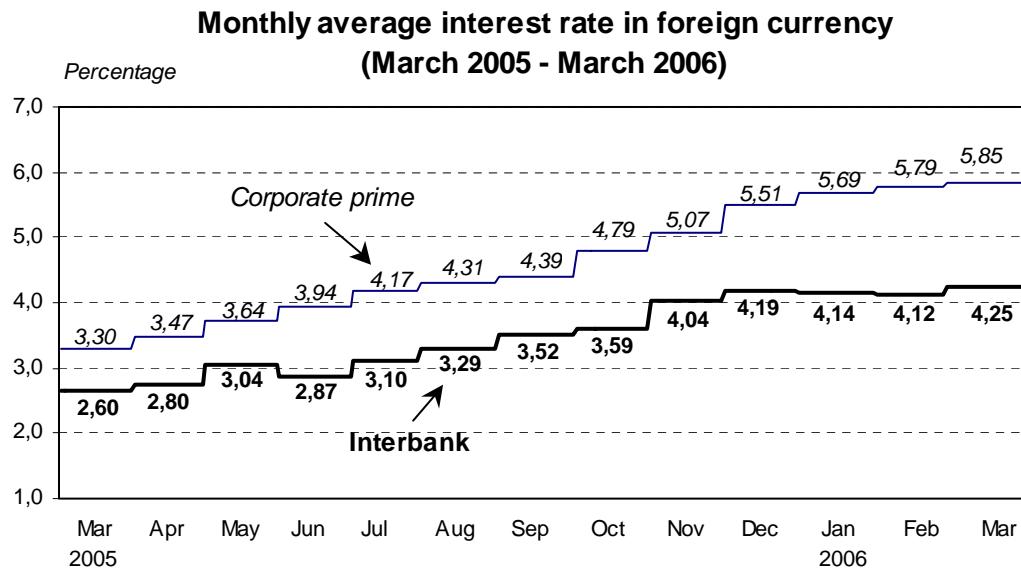

Corporate prime rate in soles rises to 6,12 percent

In **March**, the average 90-day corporate prime rate in soles increased with respect to February from 5,38 to 6,12 percent and from 5,79 to 5,88 percent in dollars. This development is explained mainly by the higher demand of liquidity in domestic currency by banks to finance dollars purchases, in order to cover their forward operations. This evolution is partially explained by the increase in the CRBP reference interest rate which rose from 3,75 percent in February to 4,0 percent in March of 2006.

**Monthly average interest rate in domestic currency
(March 2005 - March 2006)**

Monetary operations

Between **March 30 and April 5**, the Central Reserve Bank made the following operations:

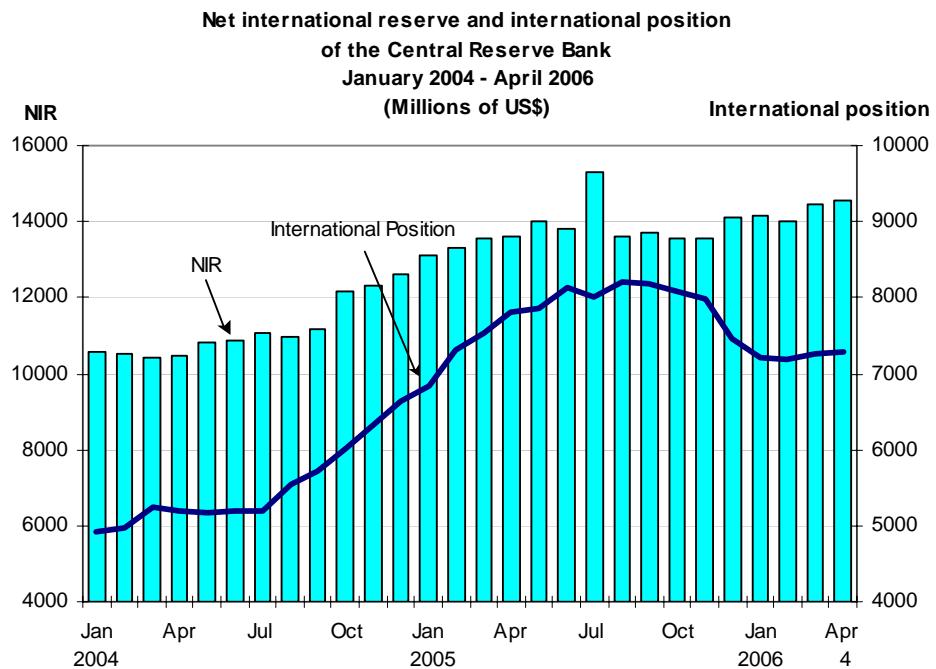

- Auctions of temporary purchases of BCRP and BTP Certificates of Deposits for a daily average of S/. 1 021 million involving 1 day, 3 day, 1 week, 2 weeks and 1 month. The average interest rate ranged between 4,34 and 5,58 percent.
- Overnight deposits on March 30 and 31 for S/. 19,5 million, in both opportunities.

Growing Net International Reserves Reached US\$ 14 533 million

In **March**, net international reserves (NIR) reached US\$ 14 472 million, increasing by US\$ 484 million the level recorded as of February 28, 2006. This is explained by a US\$ 500 million increase in deposits, by variations in the price of gold and currencies (US\$ 55 million), by a US\$ 43 million increase in investment yield, and by higher deposits in the Deposit Insurance Fund (US\$ 3 million). This evolution was partially offset by lower public sector deposits in the Central Bank which decreased by US\$ 117 million.

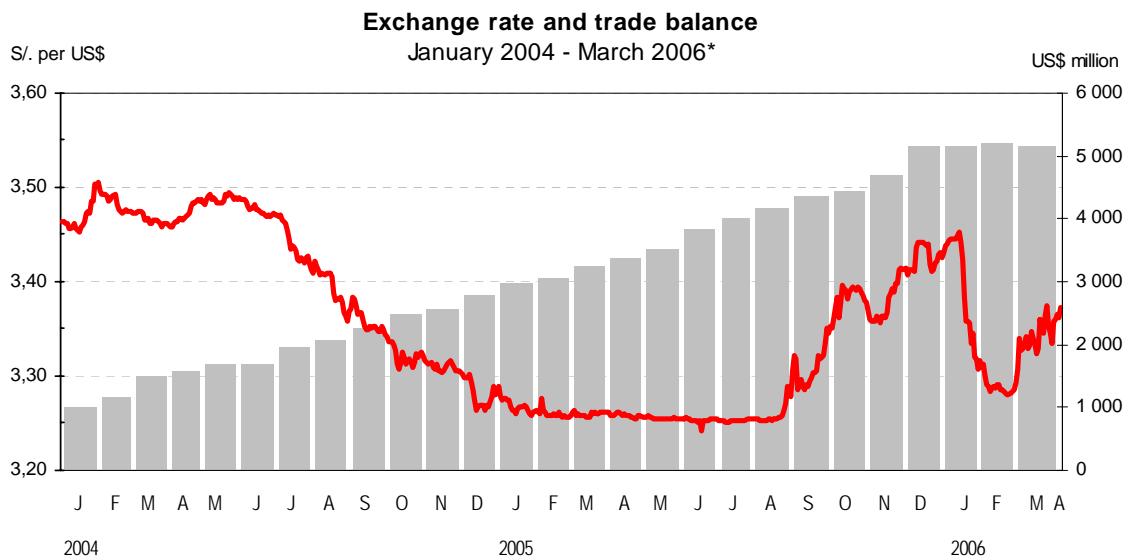

As of **April 4**, NIR reached US\$ 14 533 million, which represents a US\$ 61 million increase vis-à-vis March 31. This evolution is mainly explained by variations in the price of gold and currencies (US\$ 36 million), higher deposits (US\$ 18 million), and higher public sector deposits in the BCRP (US\$ 12 million). This evolution was partially offset by lower deposits in the Deposit Insurance Fund (US\$ 4 million) as well as by net interests paid (US\$ 3 million).

Year-to-date, NIRs have increased by US\$ 436 million. On the other hand, the Central Bank's **international position** (US\$ 7 292 million) dropped by US\$ 158 million.

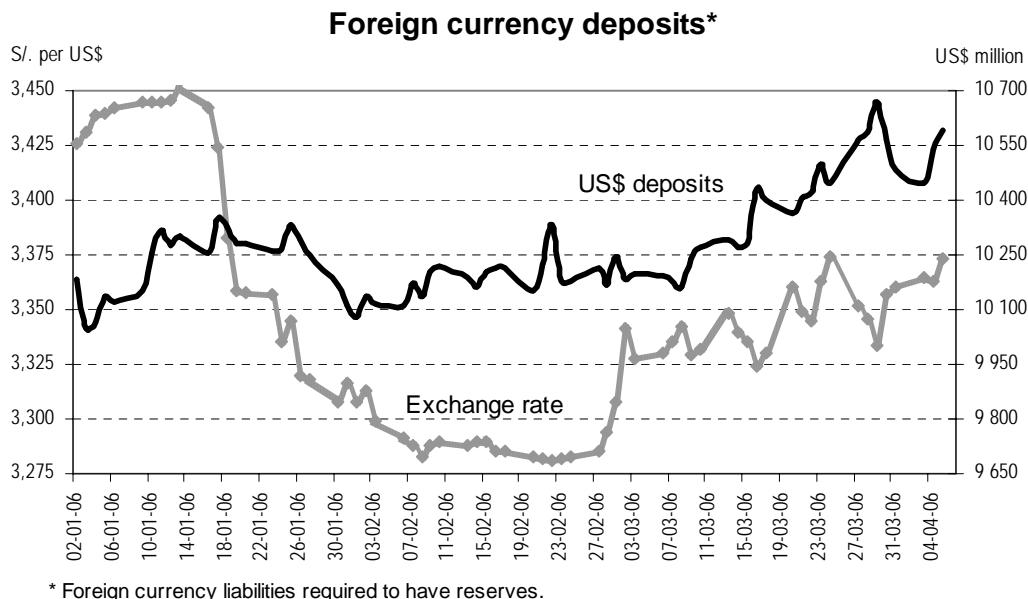

Average Exchange Rate at S/. 3,340 in March

In **March**, the average exchange rate depreciated in 1,5 percent with respect to February and went from S/. 3,290 to S/. 3,340 per dollar, despite the good performance of external accounts (trade surpluses for 34 consecutive months and net international reserves for over US\$ 14 billion). This evolution in the exchange rate, similar to that of the country risk and other financial markets, is associated with the electoral process.

On April 6, the exchange rate reached S/. 3,385 per dollar. This depreciation of 1 percent vis-à-vis the end of March (S/. 3,358 per dollar) is partly explained by the uncertainty generated by the electoral process. However, so far this year the nuevo sol has accumulated a depreciation of 1,3 percent. It is worth noting that the total of liabilities subject to statutory reserve requirements in foreign currency (which mainly reflect the deposits in dollars) increased in US\$ 293 million between March 1 and April 5.

From late February to April 4, the balance of net forward sales grew in US\$ 461 million, and the banks foreign exchange position increased in US\$ 100 million. This evolution in the exchange rate is partly explained by the greater demand for foreign currency in this period.

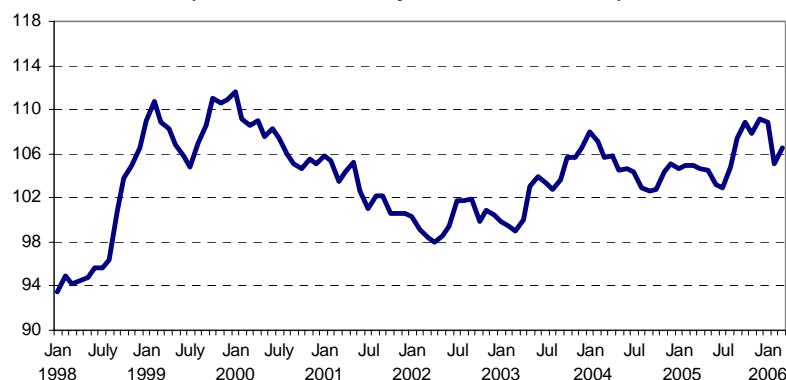

**BANK'S EXCHANGE POSITION
(Millions of US\$)**

	December 2004	December 2005	January 2006	February	March	Apr 4
a. Net sales to the public (i-ii)	699	1 027	1 229	1 109	1 579	1 570
i. Forward sales to the public	1 163	1 813	2 092	1 880	2 426	2 329
ii. Forward purchases to the public	464	785	863	771	847	759
b. Bank's exchange position	340	480	411	485	581	585

Real Exchange Rate Depreciated 1,5 Percent in March

In **real terms**, the domestic currency depreciated 1,53 percent in March, reflecting a 1,5 nominal depreciation of the nuevo sol and a differential between domestic inflation (0,5 percent) and external inflation (0,4 percent). In annual terms, the real depreciation was 1,6 percent.

**MULTILATERAL EXCHANGE RATE INDEX
(1994=100 , January 1998 - March 2006)**

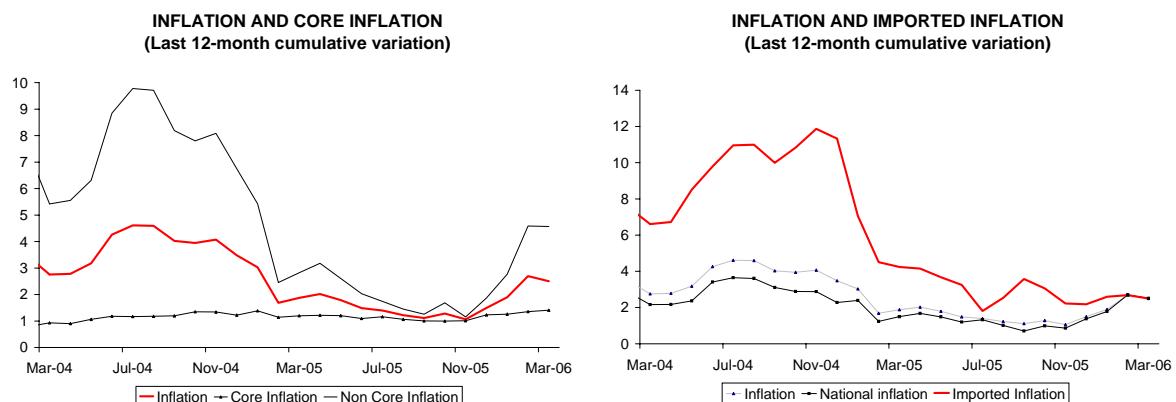

0,46 Percent Inflation in March

The **inflation** rate in March was 0,46 percent, with an accumulated 12-month variation of 2,50 percent. Three items contributed with 0,26 percentage points to inflation this month: school tuition fees (0,12 pp), sugar (0,08 pp), and other vegetables (0,06 pp). Conversely, three items contributed with -0,12 percentage points: papaya (-0,09 pp), poultry, and eggs (-0,04 pp each).

Monetary Base as of March 31, 2006

The **monetary base** balance as of March 31 (S/. 11 010 million) increased in 0,8 percent (S/. 92 million) from end-February. In average terms, the annual growth rate of the monetary base in this period was 21,9 percent (24,3 percent in February).

By sources, the operations that contributed to the expansion of the monetary base included the maturities of BCRP Deposit Certificates (S/. 830 million) and BCRP Re-adjustable Deposit Certificates (S/. 35 million, as well as higher temporary purchases of securities (S/. 746 million). Conversely, the monetary base was reduced by higher public sector deposits (S/. 1 570 million).

Cuentas monetarias del Sistema Bancario al 15 de marzo de 2006

In the last four weeks, liquidity in **domestic currency** decreased in 0,6 percent (S/. 182 million), reaching a balance of S/. 29 075 million (5,8 percent of annual growth). Credit to the private sector in this currency increased 1,6 percent (S/. 252 million), as a result of which the balance was S/. 16 145 million (annual growth of 39,5 percent).

Liquidity in **foreign currency** increased 0,8 percent (US\$ 88 million), reaching a balance of US\$ 11 297 million (16,5 percent of annual growth). Credit to the private sector in foreign currency rose in 0,6 percent (US\$ 56 million), reaching a balance of US\$ 9 925 million (annual growth of 0,7 percent).

Trade Surplus of US\$ 384 Million in February and Favorable Prospects for March

Continuing with its positive performance over the past consecutive 34 months, Peru's **trade balance** recorded a surplus of US\$ 384 million in **February** this year. This positive trade balance was US\$ 53 million (16 percent) higher than that of February 2005.

A trade surplus of US\$ 5 210 million was recorded **over the past 12 months** –March 2005 to February 2006–, representing a 70 percent improvement with respect to the same period of analysis last year: exports reached US\$ 17 687 million, while imports totaled US\$ 12 477 million.

The Central Bank anticipates US\$ 1 619 million for exports and US\$ 1 252 million for imports in **March**, which would determine a trade surplus of US\$ 366 million. Exports are expected to increase in 20 percent (traditional and non-traditional exports would rise in 19 and 22 percent, respectively). Imports, on the other hand, would increase in 34 percent with respect to March 2005 given the higher purchases of raw materials (31 percent), capital goods (63 percent), and consumer goods (13 percent).

Trade Balance

Trade Balance	<u>331</u>	<u>416</u>	<u>384</u>	<u>366</u>	<u>-49</u>	<u>-11,8</u>

Exports

Exports amounted to US\$ 1 418 million in February, and as a result of the increase experienced in both traditional (US\$ 264 million or 33 percent) and non-traditional exports (US\$ 17 million or 6 percent), grew in US\$ 280 million (25 percent) with respect to exports in February 2005.

Traditional exports accounted for US\$ 1 073 million, rising in 33 percent with respect to the previous year due to better export prices for gold (31,1 percent), copper (46,9 percent), oil and oil-derived products (31,8 percent), and iron (72,5 percent), although the price of molybdenum declined by 27 percent. Export products which stood out in this period included gold (US\$ 75 million or 34 percent), copper (US\$ 96 million or 50 percent), zinc (US\$ 32 million or 48 percent), and fish meal (US\$ 56 million or 136 percent), the latter of which compensated for the decline in the prices of fish oil (US\$ 12 million or 56 percent) and molybdenum exports (US\$ 11 million or 15 percent).

Non-traditional exports totaled US\$ 337 million, increasing in US\$ 17 million (6 percent) with respect to the same month last year as a result of both higher volumes (1,1 percent) and higher prices (4,4 percent). Outstanding non-traditional exports in this month included steel and metallurgical, jewelry, agricultural, and textile products, as well as non-metallic minerals. The main decline in the period corresponded to fishing exports given a lower availability of this resource.

3. TRADE BALANCE	331	384	53	15,9	674	721	47	6,9

Imports

Imports reached US\$ 1 034 million in February, showing a 28 percent increase compared to the same month last year. This evolution is explained by higher purchases abroad of raw materials (29 percent), capital goods (40 percent), and consumer goods (10 percent).

This period was marked by an increase in imports of fuels and lubricants, imports which rose in US\$ 93 million (70 percent) with respect to the same month last year. This evolution is explained by higher average prices (43 percent). At the business level, total imports were associated with purchases carried out by Refinería La Pampilla (US\$ 134 million), Petroperú (US\$ 59 million), and Empresa Siderúrgica del Perú (US\$ 12 million).

Despite this, February's **terms of trade** increased 16,9 percent with respect to February 2005. The average prices of exports rose in 23,3 percent, while those of imports grew 5,5 percent.

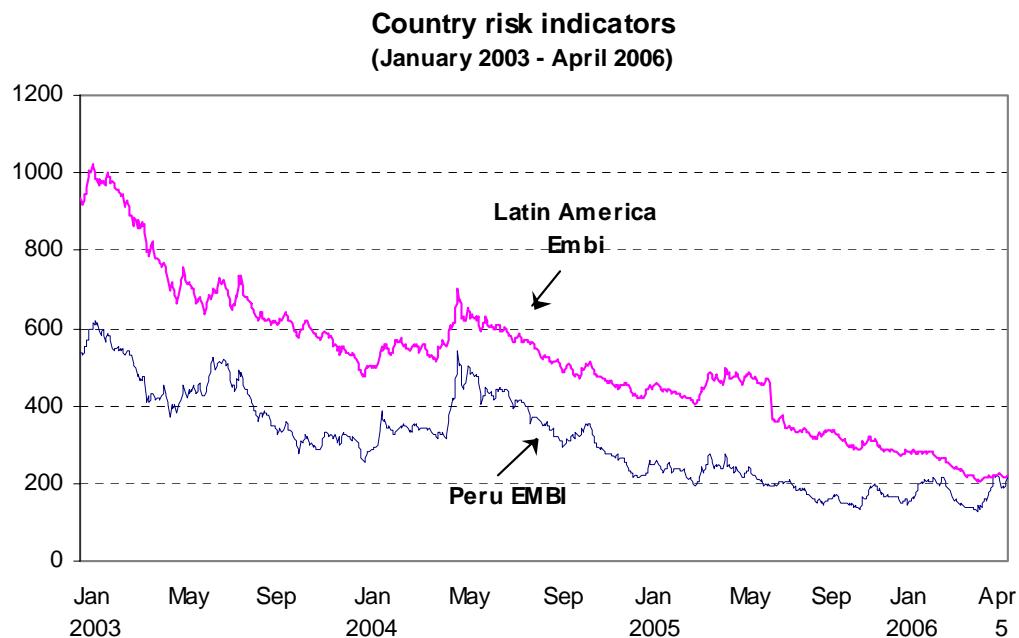

TERMS OF TRADE
(1994=100)

International markets

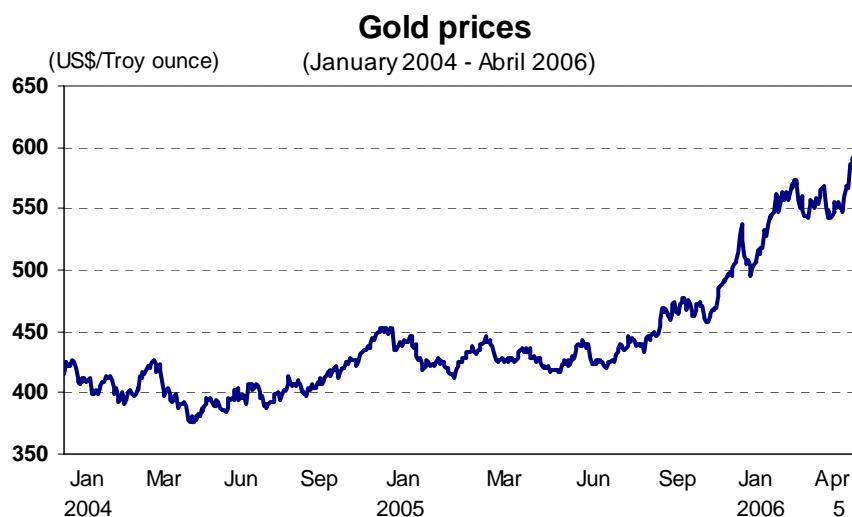

Country Risk increases to 218 basic points

In **March**, the country risk measured by the **EMBI+ Peru** spread increased from 141 basic points in February to 189 basic points, due to the uncertainty associated to the next electoral process and caution recommendation by some investment banks. As of **April 5**, the country risk has elevated to 218 basic points.

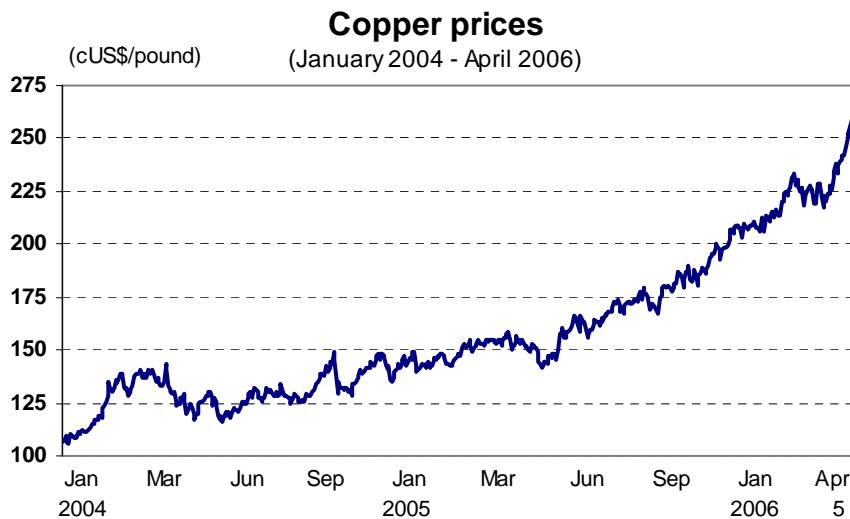

Copper and zinc reach again historic highs

In **March**, the **gold** quotation increased 0,5 percent passing from US\$ 555 to US\$ 558 per ounce troy due to the investment funds' higher commodities demand, the US dollar weakening and higher oil prices. As of **April 3**, the oil price reached a new high in 25 years being located at US\$ 591 per ounce troy.

resumen informativo

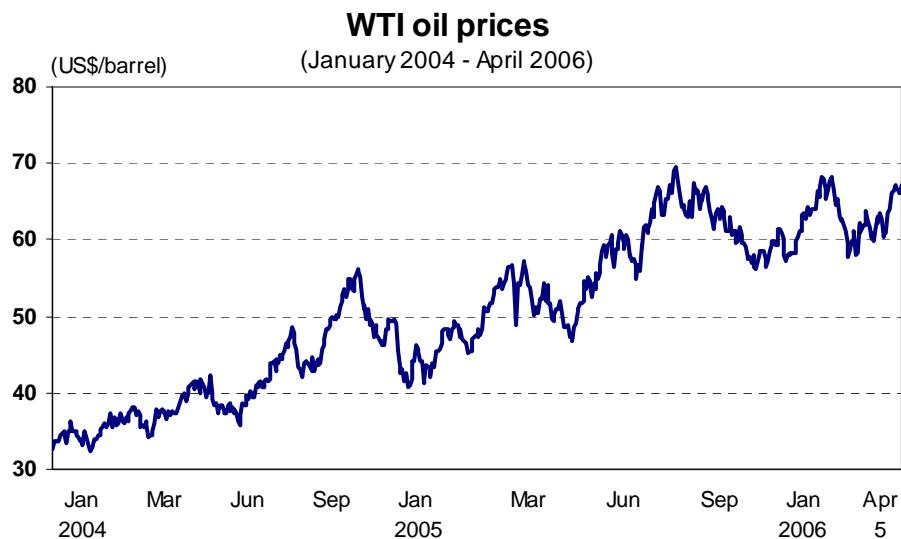

In similar month, **copper's** average price rose 2,4 percent from US\$ 2,26 to US\$ 2,31 per pound reaching as of April 5 a new historic high of US\$ 2,59 per pound explained by: the strikes and other problems in the main mines, the inventories fall in the last 2 weeks from 135 thousand MT to 114 thousand MT and investment funds' profit takings both in industrial metals and investment assets.

In **March**, the **zinc** average quotation had an important increment (9,0 percent) from US\$ 1,0 to US\$ 1,09 per pound. Besides, as of April 5 it reached a new historic high of US\$ 1,28 per ounce troy. This rise was explained by the expectations of world market's deficit for this year and the next. Year-to-date, this imbalance is reflected in an uninterrupted fall of LME inventories from 394 thousand MT to 276 thousand MT.

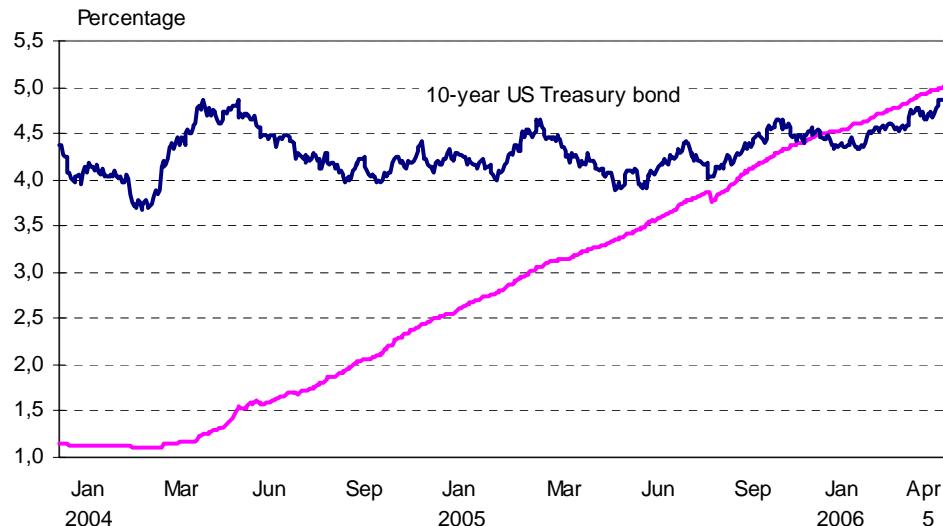

In **March**, the **WTI oil** average price rose (2,4 percent) from US\$ 61,3 to US\$ 62,8 per barrel due to the continuous geopolitics tensions in important producer countries as Iran, Iraq, Nigeria and Venezuela. In the first days of April the WTI oil price reached US\$ 67 per barrel.

Between February 28 and April 5, the **3-month Libor** increased from 4,82 to 5,01 percent whereas the **yield of the US Treasuries with a 10-year maturity** did it from 4,55 to 4,85 percent.

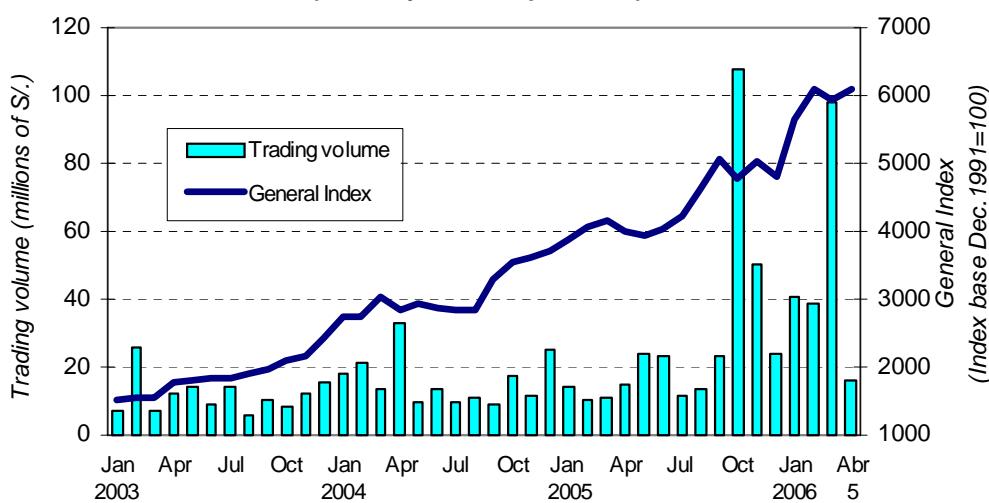

Libor and yield of 10-year matured US Treasury bond
(January 2004 - April 2006)

Bolsa de Valores de Lima

In March, the **General** and **Blue Chip** indices of Lima Stock Exchange (BVL) diminished by 2,6 and 2,4 percent, respectively. Nevertheless, during the first 3 business days of April the indices of the BVL experienced an increment of 2,7 and 3,4 percent due to the performance of the mining shares prompted by significant metal rises.
