Economic surplus of S/. 8,304 million in 2008

In 2008, the central government accumulated a surplus of S/. 8,304 million (2.2 percent of GDP).

This surplus, which is S/. 2,120 million higher than the one recorded in 2007, is explained by a higher growth of real current revenue (5.7 percent) compared to the growth of non financial expenditure, due mainly to higher tax revenue (S/. 5,791 million).

The operations of the central government showed a deficit of S/. 1,704 million in December, recording a result that is S/. 1,164 million better than the one observed in December 2007. Expenditure usually increases in this month given that December is the last month of the fiscal year.

The current revenue of the central government (S/. 5,250 million) fell 0.6 percent in real terms compared to December 2007, due to lower non tax revenue (24.3 percent), which was partially offset by increased tax revenue (3.9 percent). The latter, which amounted to S/. 4,612 million, showed an increase of 3.9 percent due to an improvement in the collection of value added tax (14.0 percent), excise tax (16.7 percent), and other tax revenue (7.0 percent). This was partially offset by a 12.6 percent reduction in the collection of income tax.

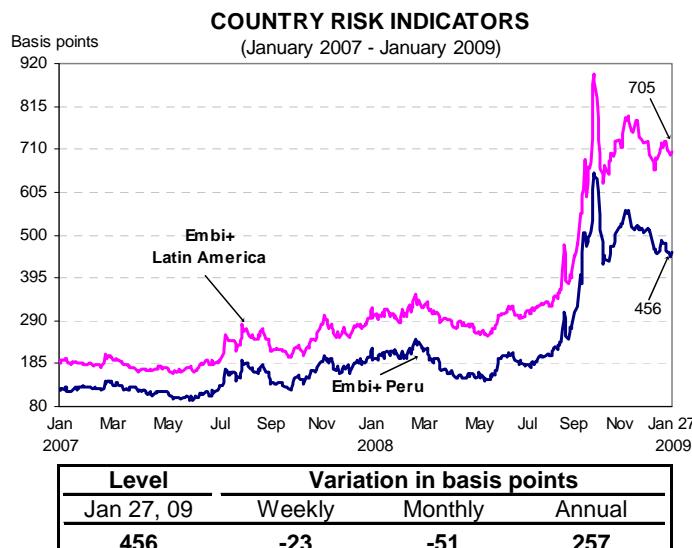

Non financial expenditure net of transfers to other public entities (S/. 5,227 million) declined 19.4 percent in real terms. Capital expenditure fell 26.4 percent, while current expenditure fell 15.8 percent. By group of expenditure, transfers to the public sector declined 39.2 percent (due to extraordinary allocations to the Fuel Price Stabilization Fund and to the Peru-Japan Counter Value Fund), while goods and services, salaries and gross capital formation fell 16.3 percent, 1.8 percent, and 27.9 percent, respectively.

International Markets

Country risk at 456 basis points

Between January 20 and 27, the country risk indicator –measured by the **EMBI+ Peru** spread– dropped from 479 to 456 basis points, showing a similar evolution to the one seen in the region's spread, which fell 24 basis points.

The spreads of the emerging debt declined due to the upward correction of the prices of the main commodities, which prevailed over investors' higher risk aversion due to the global crisis.

Price of copper rose to US\$ 1.51 per pound

Between January 20 and 27, the price of **copper** rose 1.7 percent to US\$ 1.51 per pound, despite the increase of inventories at the London Metal Exchange.

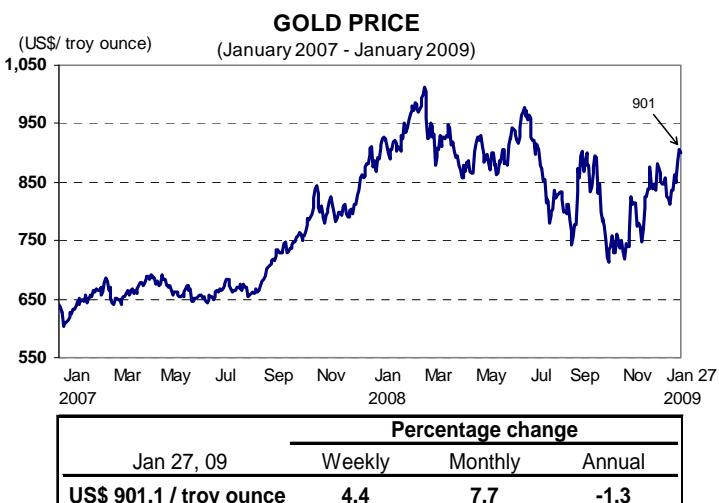

Expectations that China's demand will increase after the new lunar year holiday and problems related to the supply of copper after BHP Billiton, the world's largest mining company, reported that it will close one of its main mines in Australia pushed the price upwards.

In the same period, the price of **gold** increased 4.4 percent to US\$ 901.1 per troy ounce.

This price rise is explained by higher risk aversion which led investors to buy gold as a hedge asset and for speculation. Moreover, the strength of the dollar against the euro also contributed to this rise.

On the supply side, reports indicated that production in South Africa and the USA would have fallen in December 2008.

resumen informativo

Between January 20 and 27, the price of **zinc** dropped 5.6 percent to US\$ 0.51 per pound.

The price of zinc continued to be affected by the lower global demand, reflected in the increase of inventories at the London Metal Exchange (zinc inventories have increased 13.8 percent and reached 314,775 tons).

The current level of prices is probably being maintained by the likelihood that China will increase its imports of this metal (to replace its inventories of metals).

The price of **WTI oil** rose 7.3 percent to US\$ 41.6 per barrel between January 20 and 27, despite the increase of inventories of crude in the USA.

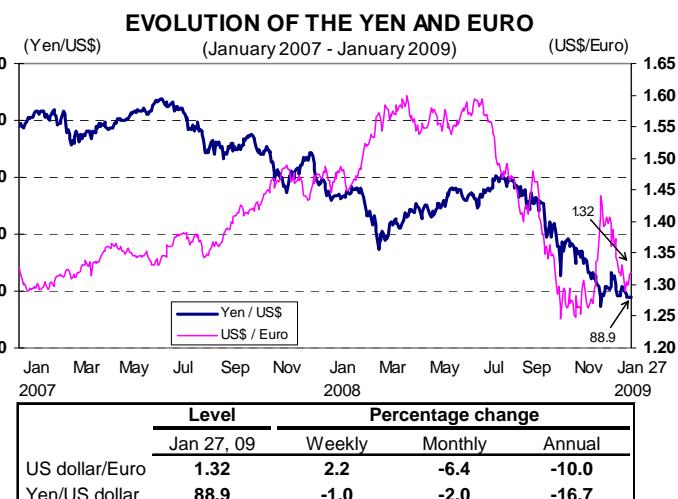

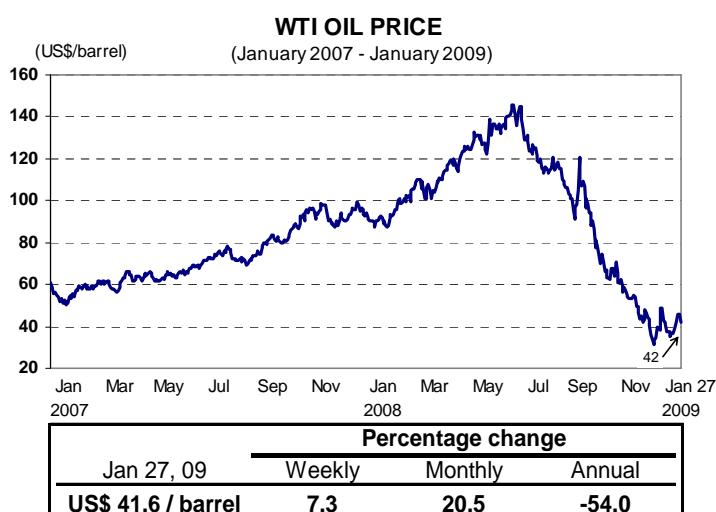

This upward correction in the price of oil is based on the announcement that the OPEC will continue to reduce its production if the price of the barrel continues to stay below US\$ 75.

In addition to this, the current level of oil prices is supported by cold weather in the US, delays in the supply of crude in Canada, and the suspension of operations in Australia given the threat of a cyclone in the northern areas of the country.

Dollar depreciated against the euro and the yen

Between January 20 and 27, the **dollar** depreciated 2.2 percent against the **euro** due to an unexpected increase of business confidence in Germany and to unfavorable indicators of economic activity in the USA.

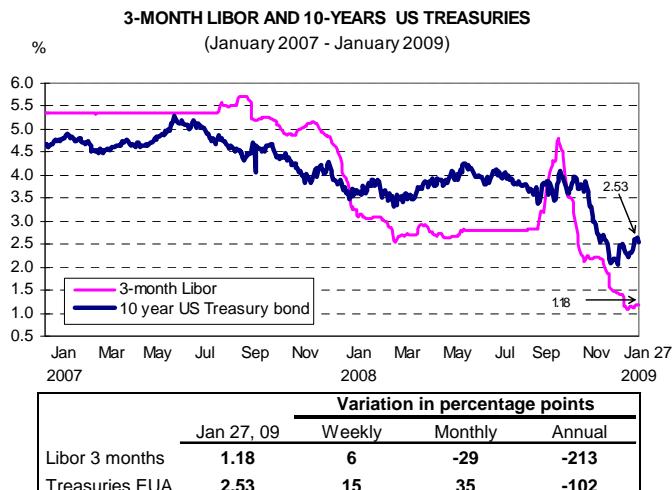

In this period, the dollar depreciated 1.0 percent against the **yen** due to increased risk aversion (which reverses carry-trade).

Yield on the 10-year US Treasuries rose to 2.53 percent

Between January 20 and 27, the **3-month Libor** rose from 1.12 to 1.18 percent and the yield on the **10-year Treasury bond** increased from 2.38 to 2.53 percent.

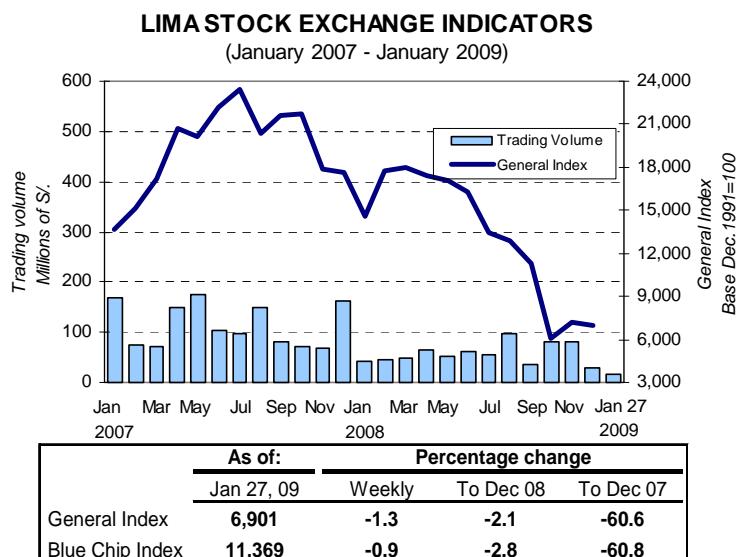

This increase in the yield on the Treasury bond is associated with expectations that the Treasury will issue more bonds to finance the fiscal package.

Lima Stock Exchange has fallen 2.1 percent as of January 27, 2009

As of January 27, the **General** and **Blue Chip** indices of the Lima Stock Exchange (LSE) have fallen 2.1 percent and 2.8 percent, respectively. During the week of analysis (January 20 to 27), both the General index and the Blue Chip index showed losses of 1.3 and 0.9 percent, respectively. This is mainly explained by investors' caution, as investors would be waiting to have more concrete information in order to decide about their investments.

However, the drop of the LSE indices was in part offset by the higher prices of the main metals.

Las tasas de interés para los créditos de regulación monetaria en dólares serán la tasa LIBOR a un mes más un punto porcentual; Desde el 29 de setiembre de 2004, el JP Morgan, de acuerdo a sus criterios de liquidez de mercado, ha incluido dentro de su EMBI+ PERÚ los bonos globales Peru 2025 y 2033. A ser los spreads de dichos bonos cercanos

a los 200 pbs, ello explica el aumento de cerca de 40 pbs en el EMBI+ PERÚ a partir del 29 de setiembre.
