International Markets

Country risk at 303 basis points

Between May 5 and 12, the country risk indicator –measured by the **EMBIG Peru** spread– rose from 209 to 303 basis points.

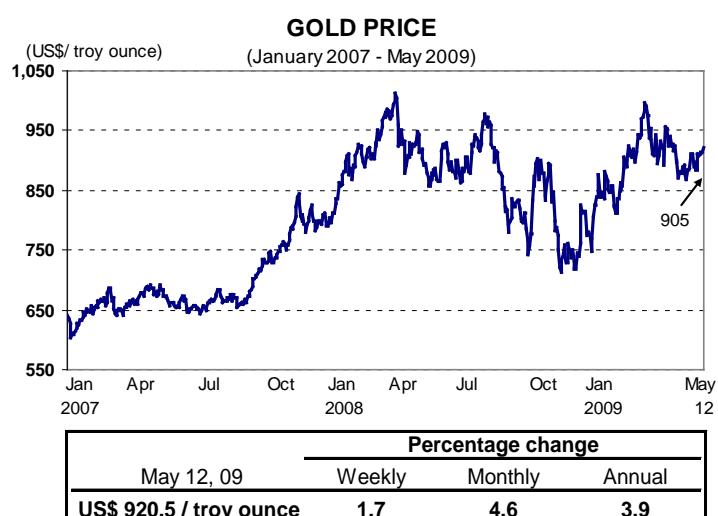

With regard to the spread of the region, it decreased by 4 basis points (EMBIG the Latin America rose from 554 to 550 basis points) amid lower risk aversion associated with improvements in the indicators of activity in the United States.

Price of gold increase to US\$ 920.5 per troy ounce

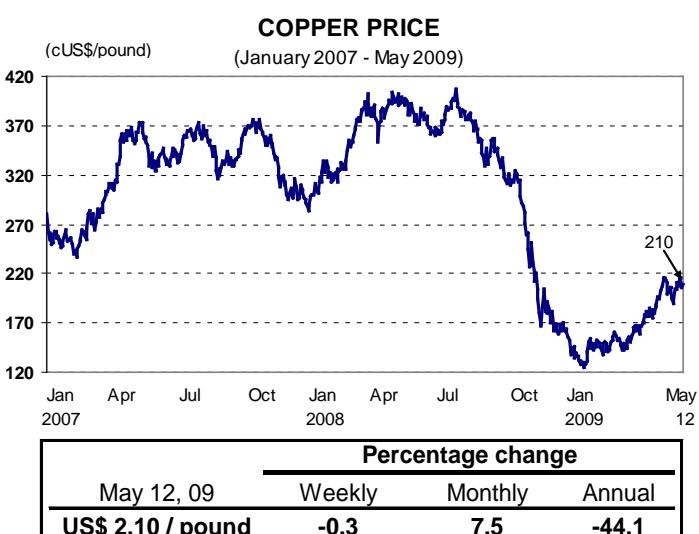

In the same period of analysis, the price of **gold** grew 1.7 percent to US\$ 920.5 per troy ounce.

The weakness of the dollar against the euro and the yen helped to boost the attractiveness of the precious metal as an alternative investment, but the positive performance of Wall Street and a decrease in the risk aversion of the agents partially offset the precious metal gains.

Between May 5 and 12, the price of **copper** dropped 0.3 percent to US\$ 2.10 a pound, despite a decline in inventories in the London Metal Exchange.

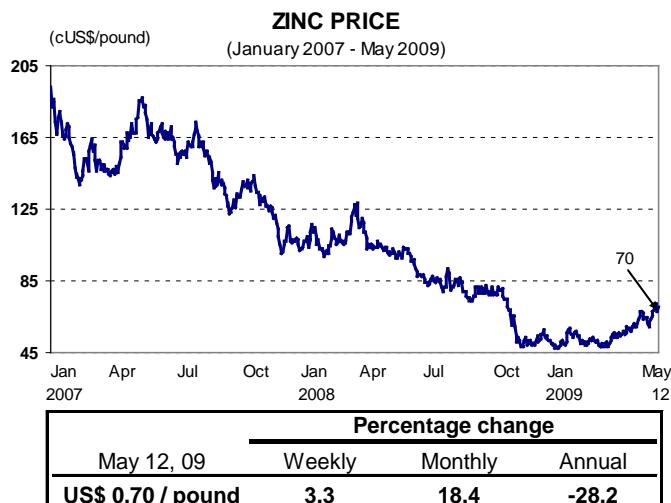

The fall in base metal prices as a result of higher concerns over demand from China, technical corrections and profits taking.

resumen informativo

Between May 5 and 12, the price of **zinc** increased 3.3 percent to US\$ 0.70 a pound, due to lower inventories in the London Metal Exchange.

Also, the improvement in the stock markets, after a better than expected report on the labor sector of United States, was also an important factor that lead to a higher price of the base metal.

The price of **WTI oil** increased 9.3 percent to US\$ 58.9 a barrel between May 5 and 12, despite the US Government data of higher oil inventories last week.

The main factor that influenced the rise was the prospect of improvement in global demand for energy, after an improvement in the indicators of activity especially in United States.

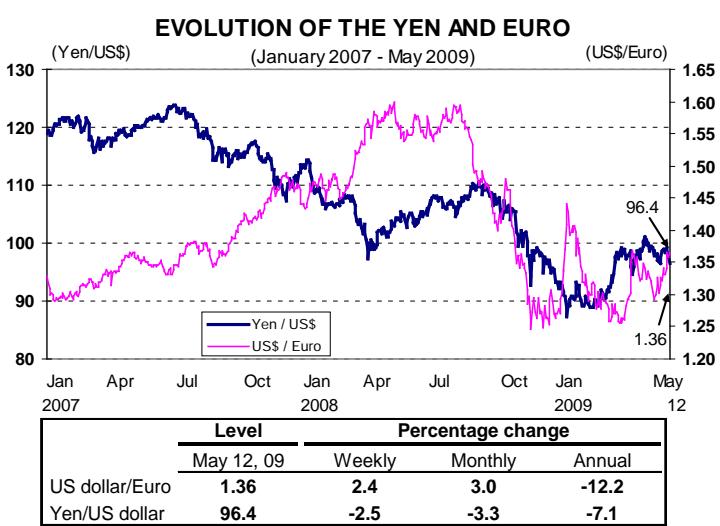

Dollar depreciated against the euro and yen

The **dollar** depreciated 2.4 percent against the **euro** between May 5 and 12.

The lower risk aversion weakened the dollar, which limited the attractiveness of this currency as a safe haven. A report better than expected, employment in United States led to a growing optimism that the global recession will moderate.

Against the **yen**, the dollar depreciated by 2.5 percent.

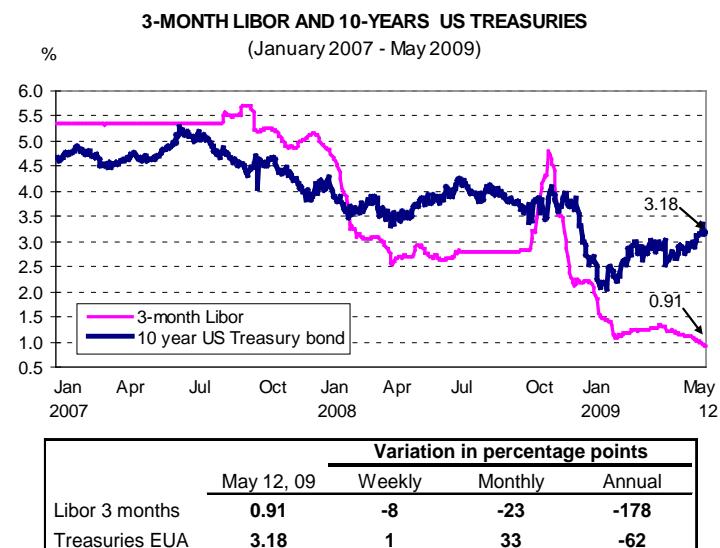

resumen informativo

Yield on 10-year US Treasuries increased to 3.18 percent

Between May 5 and 12, the **3-month Libor** decreased from 0.99 to 0.91 percent, while the yield on the **10-year Treasury bond** increased from 3.16 to 3.18 percent.

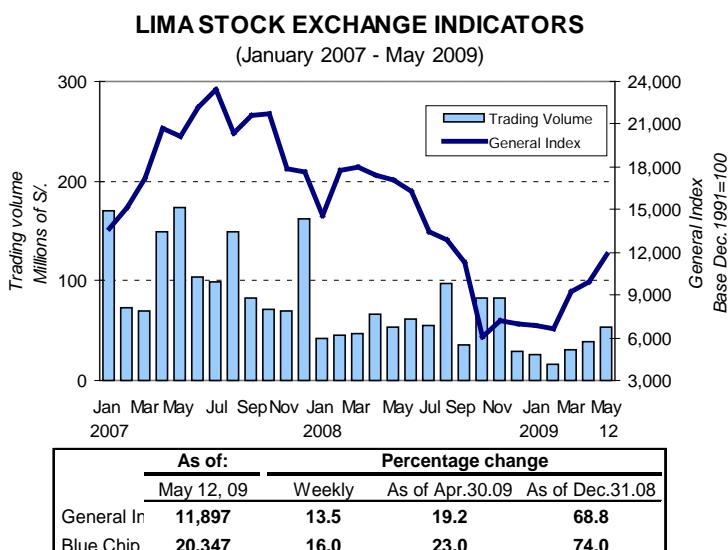

The rise in US bond yields was primarily due to the effect of lower risk aversion after the positive indicators of activity in United States.

Lima Stock Exchange has grown 19.2 percent at May 12, 2009

The **General** and **Blue Chip** indices of the Lima Stock Exchange (LSE) have grown 19.2 and 23.0 percent, respectively, so far this month (at May 12).

During the week (May 5 to 12), both indices had positive performance of 13.5 and 16.0 percent respectively, driven by purchases of mining shares, driven by a sharp advance in prices of metals and positive prospects of the US financial sector.

So far this year, these indices have accumulated gains of 68.8 and 74.0 percent, respectively.
