Monetary operations

Between **September 9 and 15**, the BCRP made the following monetary operations: i) auctions of 1 day, 3-day, and 90-day CDRCRP for a daily average of S/. 1,142.1 million. The average interest rate on these operations, which reached a balance of S/. 9,743.6 million, was 1.09 percent; ii) purchases of 1-year repos of FC for a total of S/. 14 million, with an average interest rate of 1.58 percent, on September 11, and iii) overnight deposits in domestic currency for a total of S/. 306.5 million.

resumen informativo

Currency in circulation: S/. 16, 509 million on September 14

Between September 8 and 14, **currency in circulation** shrank by S/. 253 million and thus accumulated a reduction of S/. 827 million this year. In this way, currency in circulation recorded a growth rate of 5.2 percent in the last 12 months, a higher rate than the one observed at end August (3.4 percent).

** Preliminary data.

Exchange rate: US dollar traded at S/. 2.918

Between September 8 and 15 the average interbank ask price of the dollar fell slightly, from S/. 2.920 to S/. 2.918. This represented an appreciation of the nuevo sol of 0.07 percent. The BCRP has not intervened in the exchange market since May 8.

Between September 8 and 15, banks' balance of net forward purchases of foreign currency decreased by US\$ 90.2 million.

In September, the balance of net forward purchases has accumulated an increase of US\$ 86.7 million.

BALANCE OF NET FORWARD PURCHASES OF FOREIGN CURRENCY
(January 2008 - September 2009)

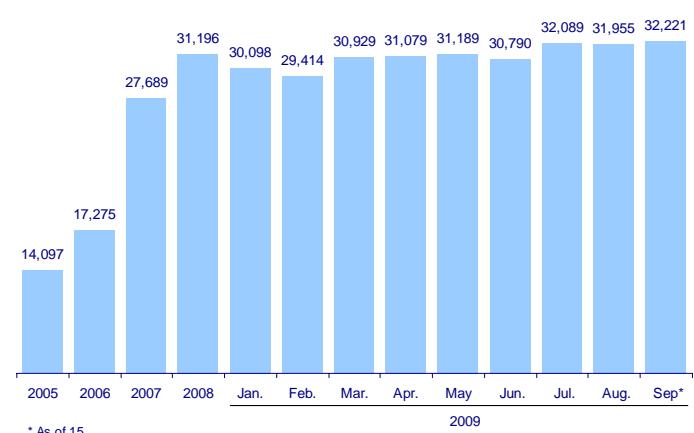

International reserves amounted to US\$ 32,221 million on September 15

Net international reserves (NIRs) amounted to US\$ 32,221 million on September 15, a sum US\$ 266 million higher than the one recorded at end August. This increase is mainly explained by the higher valuation of investments (US\$ 183 million), by banks' higher deposits (US\$ 94 million), and by swap operations (US\$ 13 million). This result was in part offset by lower public sector deposits (US\$ 99 million).

The international investment position of the BCRP on September 15 was US\$ 21,716 million, a sum US\$ 272 million higher than at end August.

NET INTERNATIONAL RESERVES ACCUMULATED
(Millions of US\$)

Slight increase in accumulated GDP as of July: 0.1 percent

Although it recorded a contraction of 1.4 percent in July, GDP has accumulated an expansion of 0.1 percent so far this year. After the negative evolution observed in the last months, a higher output was observed in the construction and agricultural sectors, as well as in the sector of "other services". The latter was led by increased activity in terms of governmental and financial services.

GROSS DOMESTIC PRODUCT
(Real percentage change respect to the same period of previous year)

	Weighted 2008	2009			
		IQ.	IIQ	Jul.	Jan.-Jul.

GDP Global	100.0	1.8	-1.0	-1.4	0.1
Primary	16.8	2.7	0.9	-0.7	1.4
Non-primary	83.2	1.6	-1.5	-1.5	-0.2

The **agricultural sector** grew 1.4 percent relative to July 2008. This result reflects the higher supply of products for the domestic market (e.g. amylaceous maize, potato, and wheat), which compensates the lower production of crops for exports (e.g. olives and asparagus), which recorded high rates of growth during 2008. On the other hand, the production of the livestock sub-sector grew 2.1 percent, reflecting increased demand for poultry. The agricultural sector has accumulated a growth rate of 2.3 percent in the first seven months of the year.

Activity in the **fishing sector** dropped 11.0 percent due to the lower landings of giant squid and Pacific chub mackerel and affected the production of frozen fish and fish conserves, respectively. On the other hand, anchovy catch increased 41.5 percent.

The **mining and hydrocarbon sector** recorded a slight growth (0.2 percent) in July, as a result of which the sector accumulates an expansion of 1.8 percent in the first seven months of the year compared with the same period last year. The higher production of gold, silver, iron, and liquid hydrocarbons observed this month was offset by a lower production of copper, zinc, molybdenum, and lead. As a result of the recovery of global demand, a rebound has been observed in the prices of these metals, which are mainly used for industrial purposes.

The **production of manufacturing based on raw materials** fell 7.9 percent, due to the lower production achieved in terms of refining of non ferrous metals, fish conserves and frozen fish products. This result was compensated by increased activity in the refining of crude and in the

resumen informativo

production of fishmeal and fish oil, and meat products. **Non-primary manufacturing** declined 13.1 percent, reflecting the effects of the international financial crisis. However, some indicators on economic activity showed an advance. For example, the use of installed capacity in non-primary manufacturing reached 69.8 percent in July –its highest value in the year–, while the number of branches recording a negative variation fell from 31 in June to 29 in July.

The **construction sector** recorded a remarkable recovery (6.4 percent) after showing negative variations in the last three months. With this, the sector accumulates an expansion of 2.6 percent between January and July.

Indicators – August 2009

Preliminary data available to date of indicators on the sectors of fishing, mining and hydrocarbons, construction, electricity and water, relevant for economic activity include the following:

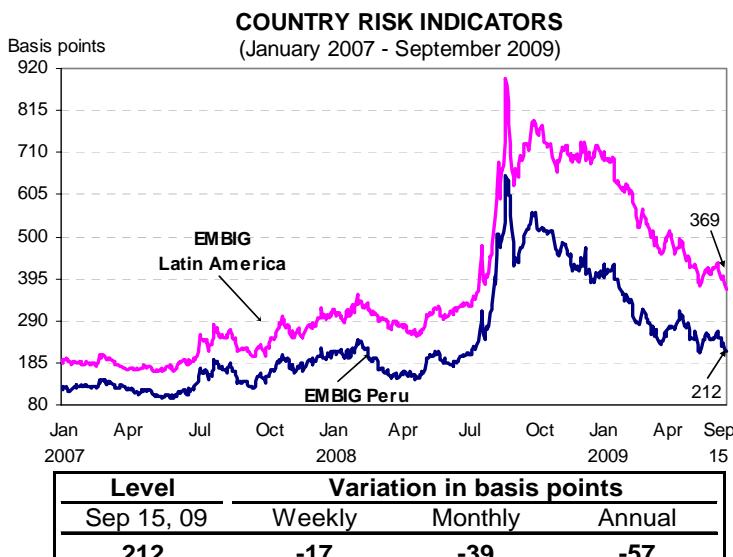

- According to IMARPE, anchovy catch amounted to 10.4 thousand tons, which represents an increase of 274.4 percent compared with the same month last year. With this, the accumulated volume of fish caught as of August amounts to 3,734 thousand tons (the annual target being 5,500 thousand tons).
- According to the Ministry of Energy and Mining, the production of liquid hydrocarbons grew 29.8 percent and the production of natural gas grew 1.9 percent.
- According to ASOCEM, local dispatches of cement grew 6.9 percent, as they increased from 588.6 to 629.1 thousand tons between August 2008 and August 2009.
- According to the *Comité de Operación Económica del Sistema Interconectado Nacional* (COES), the production of electricity as of September 16 showed “nil variation”.

International Markets

Country risk at 212 basis points

Between September 8 and 15, the country risk measured by the **EMBIG Peru** spread, fell from 229 to 212 basis points, showing a similar evolution to the spread of the region, which declined 24 basis points.

This decline in the spread of the debt of emerging markets was associated with lower risk aversion in a context of favorable economic indicators in the U.S.

resumen informativo

Price of gold fell to US\$ 1,002.5 a troy ounce

In the same period, the price of gold fell 0.1 percent to US\$ 1,002.5 a troy ounce.

This fall in the price of gold was associated with investors' take-profit and with a weak physical demand for gold due to the price rise observed last week. However, this fall was offset by the weakening of the dollar.

Between September 8 and 15, the price of copper dropped 4.8 percent to US\$ 2.79 a pound.

The lower price of copper is explained by the constant increase of inventories and by Codelco's announcement of an investment plan that would increase its production by 120 thousand tons.

Copper inventories, which have increased 4.4 percent in the week of analysis, reached 463.4 thousand tons (approximately 10 days of consumption).

Between September 8 and 15, the price of zinc dropped 7.1 percent to US\$ 0.83 a pound.

The price of this metal continued the downward trend it started showing last week due to the increase of inventories at the global exchange markets of metals and due to market fears that the price may have risen beyond its fundamentals.

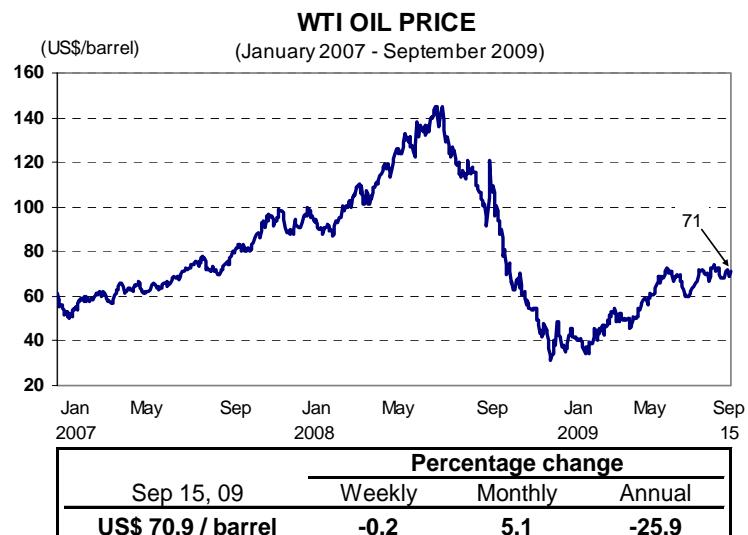

resumen informativo

The price of **WTI oil** fell 0.2 percent between September 8 and 15 and reached US\$ 70.9 a barrel.

This decline in the price of crude was associated with concerns about demand amid high inventories of gasoline and distilled products in the U.S.

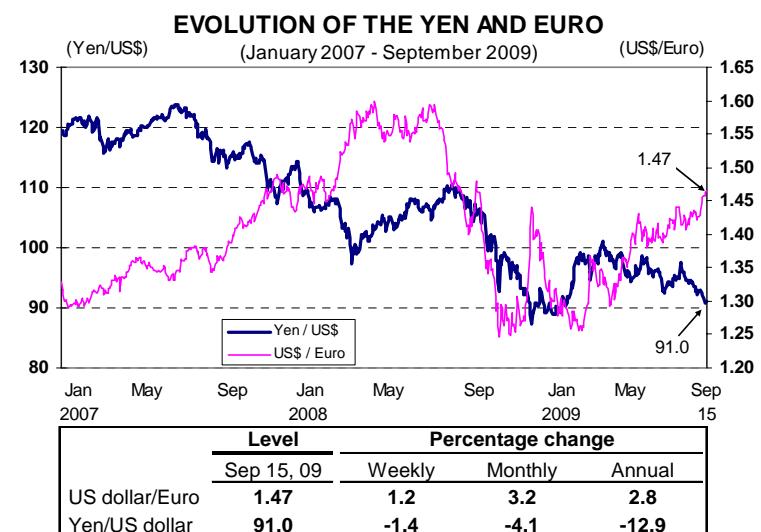

In this context, the U.S. Energy Information Administration reduced its forecasts on the demand for crude for this year and for next year.

US dollar depreciated against the euro and the yen

Between September 8 and 15, the **US dollar** depreciated 1.2 percent against the **euro** and 1.4 percent against the **yen**.

The evolution of the U.S. currency is explained by lower risk aversion (which reduced the safety appeal of the US dollar) and by fears about the role of the dollar as a reserve currency.

Yield on 10-year US Treasuries fell to 3.46 percent

Between September 8 and 15, the **3-month Libor** fell to 0.29 percent from 0.30 percent, while the yield on the **10-year Treasury bond** fell to 3.46 from 3.48 percent.

The yield on US Treasuries declined given the favorable demand for placements of securities with longer maturity terms. This was compensated by encouraging economic data and Wall Street gains this week.

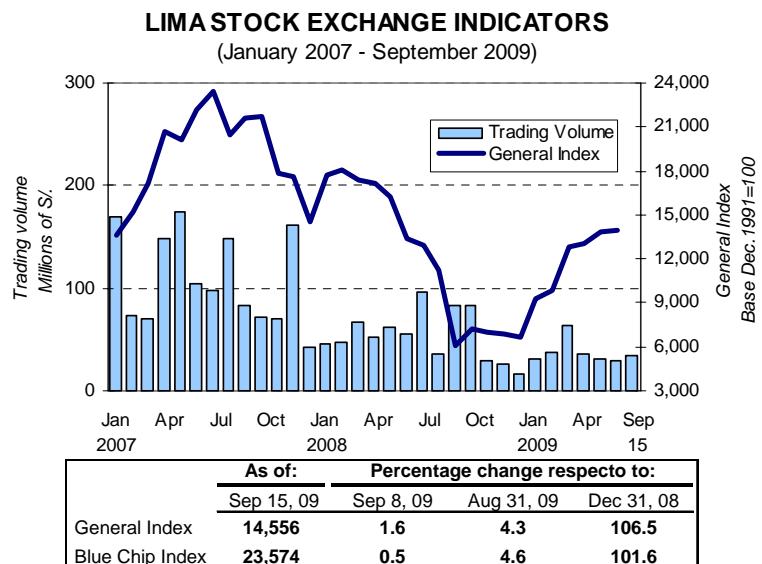

Lima Stock Exchange grew 4.3 percent 2009

So far this month (at September 15), the **General** and **Blue Chip** indices of the Lima Stock Exchange (LSE) have increased 4.3 percent and 4.6 percent, respectively.

During the week of analysis (September 8-15), both the General and the Blue Chip Indices rose 1.6 and 0.5 percent, respectively, driven by the rebound of shares of firms associated with raw materials (the price of gold remains high) and with the agricultural sector. This was also favored by the positive evolution of other stock markets in the region.

So far this year, the indices of the LSE have accumulated gains for 106.5 and 101.6 percent, respectively.
