Average country risk at 144 basis points in April

In **April**, the average country risk measured by the spread of **EMBIG Peru** declined from 158 in March to 144 basis points, similar behavior in the region fell by 21 basis points in this period.

The decline in emerging market debt spreads was explained by the optimism generated the first-quarter corporate results and activity indicators released in the US.

Price of gold recorded to US\$ 1,172.9/troy ounce

In **April**, the average **gold** price increased 2.8 percent from US\$ 1,115.1 in March to US\$ 1,146.6 per troy ounce.

The rise in gold prices was related to increased demand from both investors (portfolio diversification) and jewelry (India). Is worth pointing out that the increase in gold prices came despite a stronger dollar in international markets.

By **May 4** the price of **gold** rose to US\$ 1,172.9 per troy ounce.

By **May 4** the **copper** price was US\$ 3.25 per pound.

resumen informativo

The average price of **WTI oil** rose 3.6 percent to US\$ 81.3 in March to US\$ 84.2 per barrel in **April**.

As of **May 4**, the **WTI oil** price was US\$ 82.7 per barrel

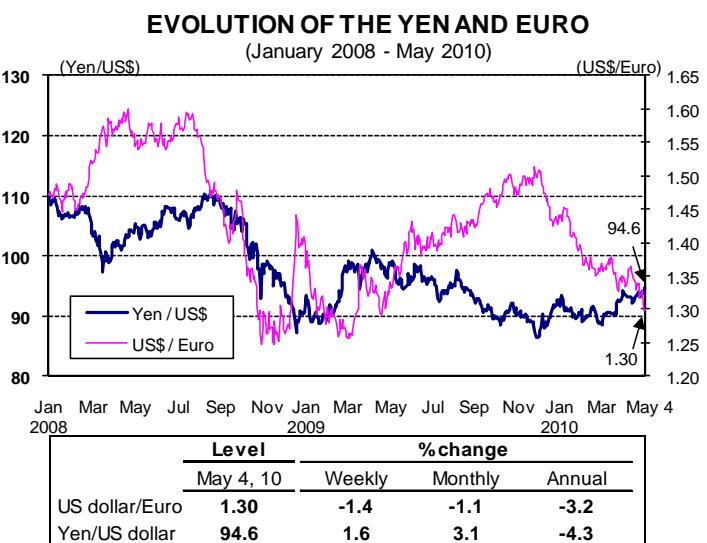

Dollar appreciated against the euro and yen in April

In **April** the average **dollar** appreciated 1.1 percent against the **euro** and 3.1 percent against the **yen**.

By **May 4**, contributions were US\$ 1.30 per euro and 94.6 yen per dollar.

resumen informativo
