International Markets

Average country risk at 155 basis points in August

In **August**, the average country risk, measured by the **EMBIG Peru** spread, fell from 186 basis points in July to 157 basis points.

The spread of the Latin American debt declined by 26 basis points in this period in a context of better-than-expected quarterly corporate results in the United States.

Average price of gold rose to US\$ 1,217.3/troy ounce in August

In **August**, the average price of **gold** increased from US\$ 1,195.9 to US\$ 1,217.3/troy ounce (1.8 percent).

Factors accounting for this rise in the price of gold included fears of a slower recovery of the global economy, which led investors to demand gold as a hedge asset, and the weakening of the dollar in financial markets.

In **August**, the average price of **copper** rose 8.1 percent, from US\$ 3.06 in July to US\$ 3.30 a pound.

The price of copper was influenced by expectations of a strong physical demand in Asia and by the lower availability of inventories at the London Metal Exchange.

resumen informativo

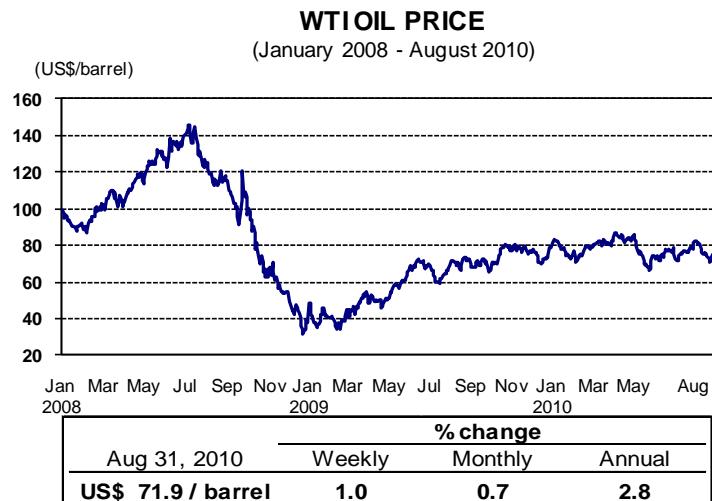

Recording a rise of 10.9 percent, the average price of **zinc** increased from US\$ 0.84 in July to US\$ 0.93/ pound.

Lower inventories of this metal in the major global stock markets and China's increased demand as a result of the growth of its manufacturing sector supported the rise of this basic metal.

The average price of **WTI oil** increased 0.7 percent, moving from US\$ 76.2 in July to US\$ 76.7 a barrel in **August**.

This price rise was supported both by the demand of emerging countries and by the temporary closure of platforms in the North Sea.

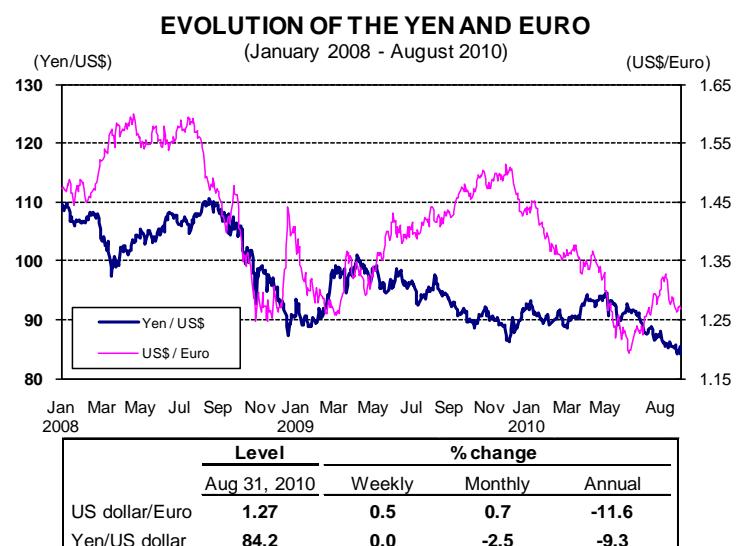

US dollar depreciated on average against the euro in August

In August, the **US dollar** depreciated 0.7 percent on average against the **euro**.

This evolution of the US currency reflected increased evidence of a slowdown of growth in the United States.

Furthermore, the dollar depreciated 2.5 percent on average against the **yen**.

resumen informativo

Yield on US Treasuries fell on average to 2.69 percent in August

On average terms, the 3-month Libor fell from 0.52 percent in July to 0.36 percent in August and the yield on the 10-year Treasury bond fell from 2.99 to 2.68 percent.

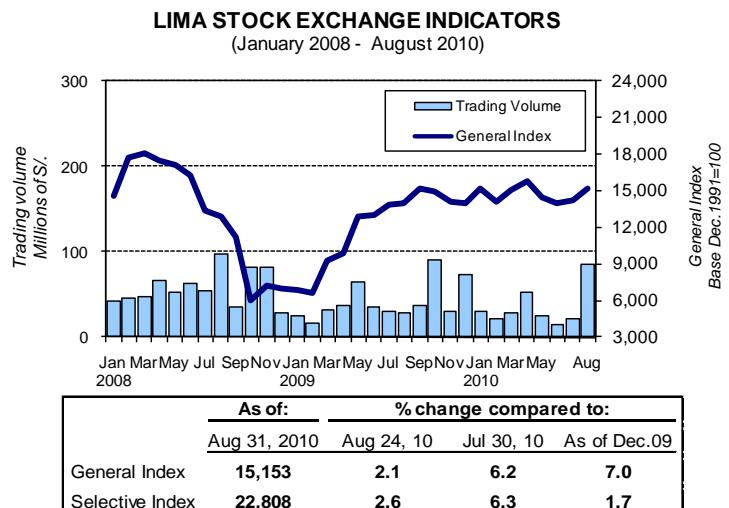

The drop in the yield on the US Treasury bonds was associated with unfavorable data of activity in the United States, which encouraged a higher demand for US debt bonds.

Lima Stock Exchange grew 6.2 percent in August

In August, the **General Index** and the **Selective Index** of the LSE showed a positive performance, recording rates of 6.2 and 6.3 percent, respectively.

The better performance of these indices during the month of August was due to the higher gains of mining and industrial shares which were favored by the positive evolution of both basic and precious metals.

Year to date, the General Index records a gain of 7.0 percent and the Selective Index registers a gain of 1.7 percent.
