* As of November 15, 2010.

** Preliminary data.

1/ Includes Swaps auctions in FC and operations outside the counter.

2/ Includes overnight deposits and Deposit Insurance Funds.

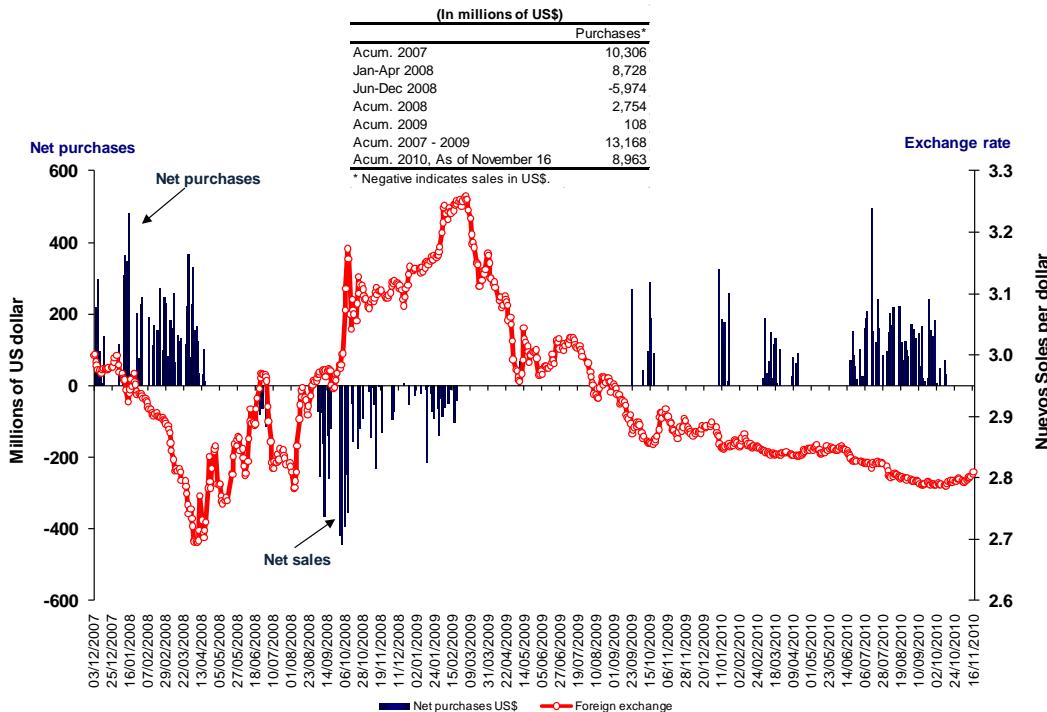

3/ Includes BCRP operative expenses, interest by deposits in the BCRP (overnight, terms and specials), net interest by CDBCRP placements and Central Bank profit transfers to the public sector.

resumen informativo

Exchange rate: S/. 2.810 per dollar

Between November 9 and 16, the average interbank ask price of the dollar rose from S/. 2.798 to S/. 2.810, which represented a depreciation of the nuevo sol of 0.42 percent. The BCRP did not intervene in the foreign exchange market in this period.

EXCHANGE RATE AND NET DOLLAR PURCHASE

Between November 9 and 16, banks' balance of net forward purchases of foreign currency declined by US\$ 410 million. So far this month, the balance of net forward purchases of FC has accumulated a decline of US\$ 72 million.

BALANCE OF NET FORWARD PURCHASES OF FOREIGN CURRENCY (January 2008 - November 2010)

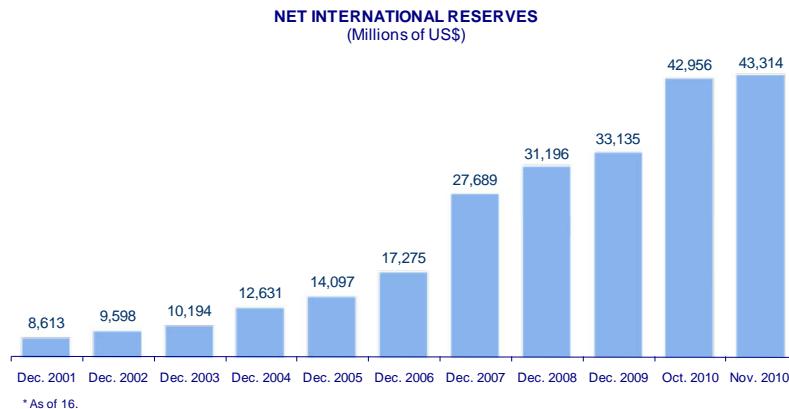

International reserves amounted to US\$ 43,314 million

On November 16, net international reserves (NIRs) amounted to US\$ 43,314 million. This level of reserves is US\$ 358 million higher than the one recorded at the close of October.

The increase of NIRs observed so far this month was mainly due to banks' higher deposits at the Central Bank (US\$ 571 million) and swap operations (US\$ 112 million). This was offset by the lower valuation of investments (US\$ 329 million) and by lower public sector deposits at the Central Bank (US\$ 1 million).

The international exchange position of the BCRP at November 16 was US\$ 32,492 million, a sum lower by US\$ 217 million than the one recorded at the close of October.

GDP grew 10.4 percent in September

GDP recorded a growth rate of 10.4 percent in September and thus accumulated an expansion of 8.7 percent so far this year. The growth of GDP in September was mainly associated with the dynamism of non primary sectors, especially non primary manufacturing (19.8 percent), construction (23.0 percent), and commerce (11.0 percent).

1/ At 1994 prices.

Production in the agriculture sector grew 4.1 percent due to the higher production of hard yellow maize, garlic, coffee, onion, and rice –among other crops oriented to both the domestic and the external market–, which offset the lower production of potatoes and corn. Moreover, the livestock sub sector showed a positive contribution to the sector's growth with an increased supply of poultry and beef. Year-to-date, the agriculture sector accumulates an expansion of 4.2 percent, which reflects mainly the higher production of coffee, olives, and poultry.

The fishing sector registered a drop of 36.1 percent due to the impact of lower sea-surface temperatures associated with La Niña Event, which affected especially the catch of fish for the

resumen informativo

production of frozen fish products. So far this year, production in this sector accumulates a fall of 14.3 percent.

The sector of mining and hydrocarbons showed a contraction of 2.7 percent and thus accumulated a decline of 0.5 percent year-to-date. The month's result reflects the lower production registered in metal mining (-8.5 percent) due to the lower content of gold obtained in Barrick and Yanacocha's production, although this was partially offset by a higher production of iron and zinc. Moreover, the sub sector of hydrocarbons grew 38.5 percent due to the higher extraction of natural gas destined to exports through Peru LNG's recently inaugurated gas liquefaction plant.

Non primary manufacturing grew 19.8 percent in September. With this result, the sector accumulates a growth of 20.8 percent in Q3 and 17.6 percent so far this year, and thus becomes one of the more dynamic sectors in the economy together with construction.

After having recorded growth rates of 12.3 percent in July and 14.2 percent in August, construction showed a significant rebound in September growing 23.0 percent. The strong dynamism of the sector was reflected in the implementation of commercial, hotel, and real estate construction projects, as well as in public and private infrastructure projects. So far this year, construction accumulates an expansion of 18.2 percent.

Indicators – October 2010

Preliminary data available to date of indicators on the sectors of fishing, mining and hydrocarbons, construction, electricity and water, relevant for economic activity include the following:

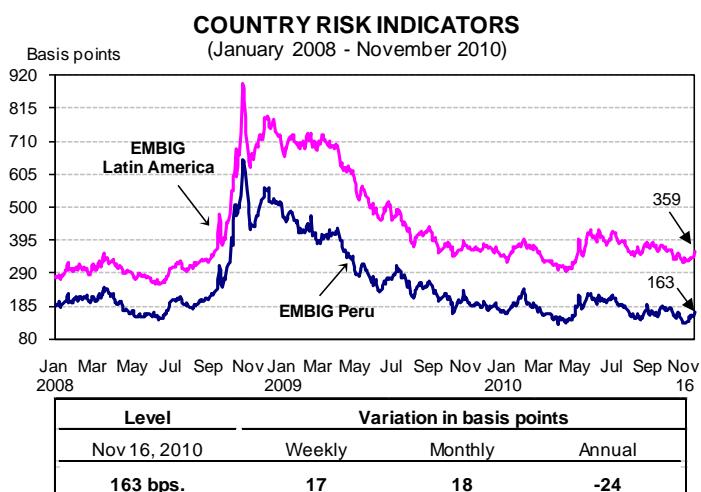

- IMARPE reported that there was no catch of anchovy in October due to the fishing closed season established for the coastal northern and central areas of the country.
- The production of hydrocarbons grew 44.3 percent, according to Perupetro.
- According to ASOCEM, local dispatches of cement increased from 670.9 to 730.3 thousand tons between October 2009 and October 2010.
- The production of electricity grew 9.6 percent in October according to the Comité de Operación Económica del Sistema Interconectado Nacional (COES). Furthermore, this indicator shows an increase of 9.3 percent in the first 14 days of November.

International Markets

Country risk at 163 basis points

Between November 9 and 16, the country risk indicator, measured by the **EMBIG Peru** spread, rose from 146 to 163 basis points.

The spread of the Latin American debt rose by 26 basis points due to increased risk aversion in financial markets, given uncertainty about the fiscal position of some countries in the Eurozone.

resumen informativo

Price of gold fell to US\$ 1,349 per troy ounce

In the same period, the price of **gold** fell 4.8 percent to US\$ 1,349/troy ounce.

The price of gold corrected down after hitting a record high level of US\$ 1,417/troy ounce during the week. The initial upward trend, which was boosted by the announcement of quantitative easing in the U.S. early in November and by the increased seasonal demand for gold for jewelry, corrected down in a context of a strengthening dollar and investors' profit taking.

Between November 9 and 16, the price of **copper** fell 4.1 percent to US\$ 3.85 a pound.

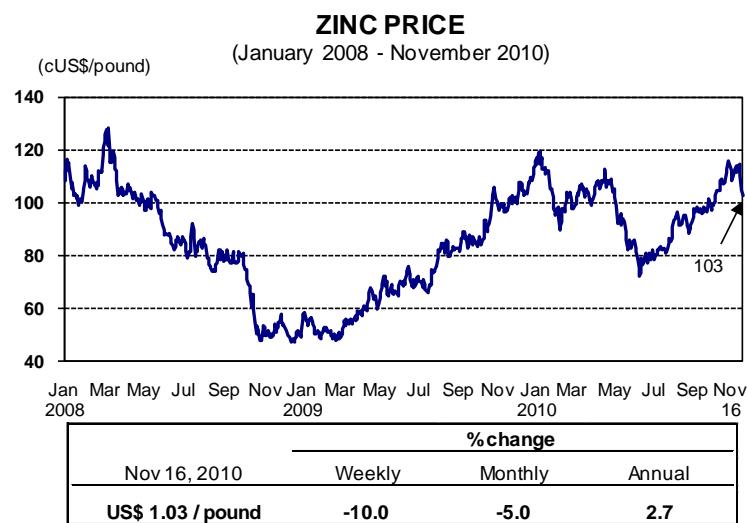

The price of copper fell influenced by the rise of inventories in metal exchange markets, the strengthening of the dollar, and inventors' profit taking.

In this period, copper inventories in metal exchange markets increased to 546 thousand tons (up 0.9 percent), a level of inventories equivalent to 11 days of demand.

Between November 9 and 16, the price of **zinc** dropped 10.0 percent to US\$ 1.03 per pound.

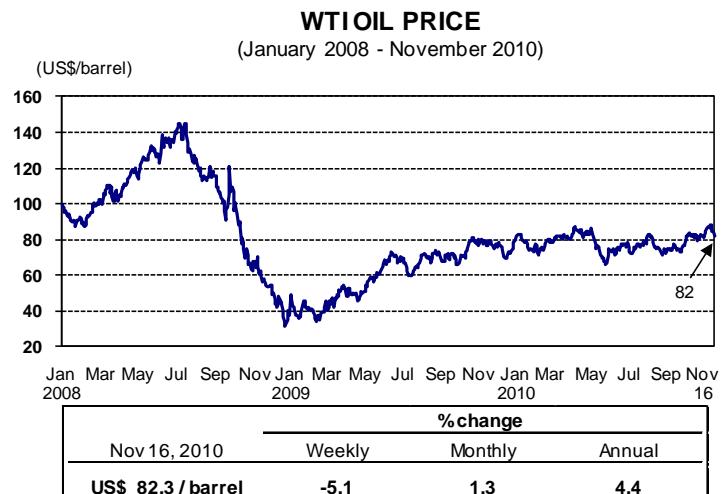

The downward evolution in the price of this basic metal was associated with demand constraint measures, which weakened the outlook for global demand.

resumen informativo

The price of **WTI** oil fell 5.1 percent to US\$ 82.3 per barrel between November 9 and 16.

This fall in the price of crude is mainly explained by the possibility that China may raise its interest rates due to higher-than-expected inflation levels. The impact of the latter outweighed other factors that favored the rise of the price of crude early in the week, such as the decline of production in Norway and the drop of inventories in the United States.

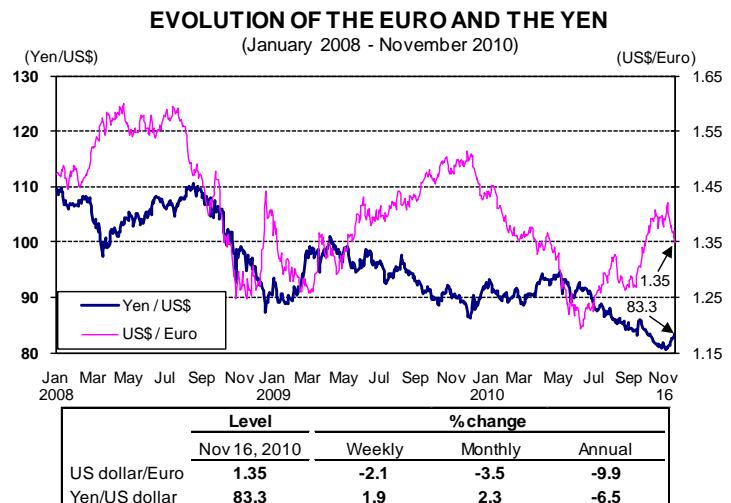

Dollar appreciated against the euro and the yen

Between November 9 and 16, the **dollar** appreciated 2.1 percent against the **euro**.

Fears of a possible sovereign debt crisis in some economies of the Eurozone accounted mainly for the negative evolution of the euro against the US currency.

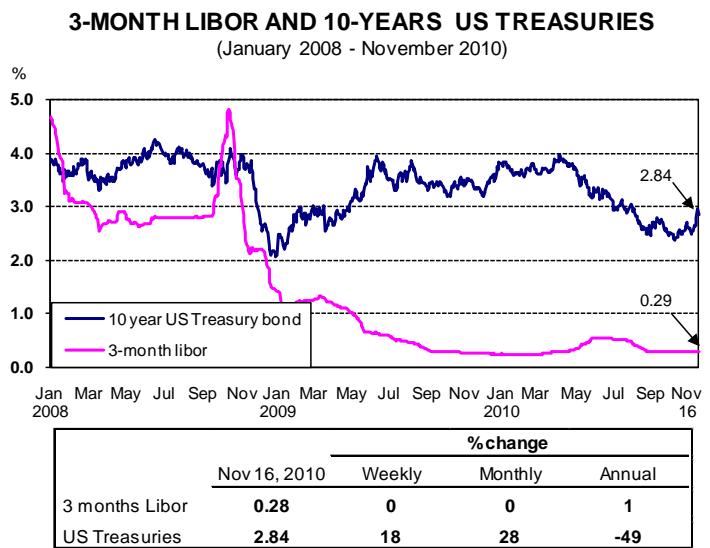

The dollar appreciated 1.9 percent against the **yen**.

Yield on 10-year US Treasuries rose to 2.84 percent

Between November 9 and 16, the **3-month Libor** remained at 0.29 percent, while the yield on the 10-year **US Treasury bond** rose from 2.66 to 2.84 percent.

During the week the yield on US Treasuries rose favored by positive indicators of activity in the United States and expectations that the Federal Reserve will not complete its bond-purchase plan entirely.

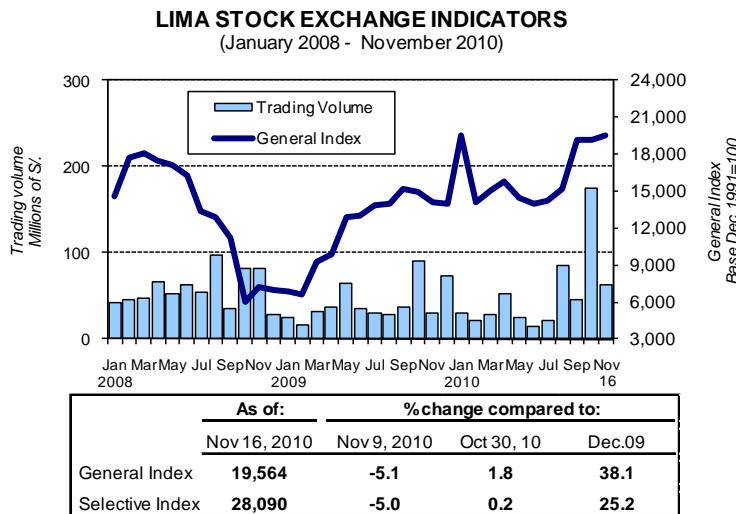

resumen informativo

Annual profitability of the Lima Stock Exchange reaches 38.1 percent

So far this month, as of November 16, the **General** Index and the **Selective** Index of the Lima Stock Exchange (LSE) have grown 1.8 and 0.2 percent, respectively.

During the week of analysis (November 9-16), both indices fell (5.1 and 5.0 percent, respectively), affected by the performance of the major stock markets. The latter registered losses due to fears of further adjustments in China's interest rates, as well as due to the drop observed in the international prices of commodities.

Year-to-date, the General and the Selective Indices have accumulated gains of 38.1 percent and 25.2 percent, respectively.
