# resumen informativo

## Exchange rate: S/. 2.616 per dollar

Between August 7 and 14, the average **selling price of the dollar** in the interbank market fell from S/. 2.620 to S/. 2.616 per dollar, which represents an appreciation of the nuevo sol of 0.16 percent. In this period, the Central Bank intervened in the foreign exchange market purchasing foreign currency for a total of US\$ 219 million.

## Net international reserves at US\$ 59.15 billion

**Net international reserves** (NIRs) at August 15 amounted to US\$ 59.15 billion. This amount of reserves is US\$ 1.17 billion higher than the one recorded at the close of July 2012.

The increase in NIRs registered so far this month is mainly explained by higher deposits of both banks (US\$ 975 million) and the public sector (US\$ 2 million), by the Central Bank's net purchases of foreign currency (US\$ 329 million) and investment profits (US\$ 2 million). This increase was in

part offset by lower valuation of investments (US\$ 107 million) and by the decline of deposits in the Deposit Insurance Fund (US\$ 19 million).

The **foreign exchange position** of the BCRP at August 15 was US\$ 40.55 billion. This amount is US\$ 214 million higher than the one recorded at the close of July 2012.

### GDP grew 7.1 percent in June

GDP recorded a growth rate of 7.1 percent in June and accumulated an expansion of 6.1 percent both in Q2 and in the first six months of the year. Growth in June continued to be driven by the dynamism of construction, commerce, and services, even though the primary sectors, especially fishing and agriculture, also showed a pace of growth worth pointing out.

In June **agriculture** grew 8.1 percent. This rate reflects a strong increase in the growth rate of the agricultural sub sector (10.5 percent) due to the high volume of rice produced as a result of the normalization of production in the north of the country, as well as due to the increased production of potatoes, olives, and hard yellow maize. It should be pointed out that these four products account for nearly 80 percent of the increase recorded in this sub sector in June. On its side, the livestock sub sector grew 3.7 percent. With this, production in the sector of agriculture accumulates an expansion of 4.5 percent in the first six months of 2012.

**Fishing activity** registered a growth rate of 17.9 percent in the month due mainly to an increased catch of anchovy for industrial consumption and a higher catch of giant squid for the production of frozen seafood products. The higher anchovy catch is explained by increased efforts to capture this resource given that the fishing season in this period was shorter than in the previous year (3 months instead of 4 months),<sup>1</sup> while the higher catch of giant squid is explained by the greater availability of this species in coastal areas.

<sup>1</sup> In 2011 the fishing period was from April to July, while in 2012 it was only from May to July.

# resumen informativo

Production in the **sector of mining and hydrocarbons** registered a growth rate of 4.8 percent. This increase results from the greater production of copper associated with the expansion of Antamina and the higher metal content obtained by Southern in its unit of Cuajone, from the greater production of zinc derived from the investment made by Milpo in its Ica unit of Cerro Lindo in 2011 and from the expansion of Antamina, as well as from the greater production of natural gas at lots 88 and 56. With this, the sector accumulates an expansion of 3.8 percent in the first six months of the year.

The **manufacturing sector** grew 1.3 percent in the month. This rate reflects an increased production in non-primary manufacturing (up 2.1 percent) as a result of greater activity in the branches of explosives, natural and chemical essences, electrical machinery, and milling and bakery. On the other hand, manufacturing based on raw materials contracted 2.6 percent due to the lower production of canned and frozen fish products and to the lower refining of non-ferrous metals and oil, even though this was in part offset by a higher production of fishmeal and fish oil and meat products. With this, this sector accumulates a decline of 7.7 percent in the first semester of this year.

The **construction sector** grew 20.6 percent in June and accumulated an expansion of 14.7 percent in the first semester. The growth in this sector reflects the continued construction activity observed in mining projects, malls (Mall Aventura, Plaza Santa Anita, and San Borja Plaza), housing projects both in Lima and in other cities in the country, as well as the onset of important public infrastructure projects, such as Vía Parque Rímac and section 2 of Line 1 of Lima's Metro.

## Indicators – July 2012

Preliminary data available to date of indicators on the sectors of fishing, mining and hydrocarbons, construction, electricity and water, include the following:

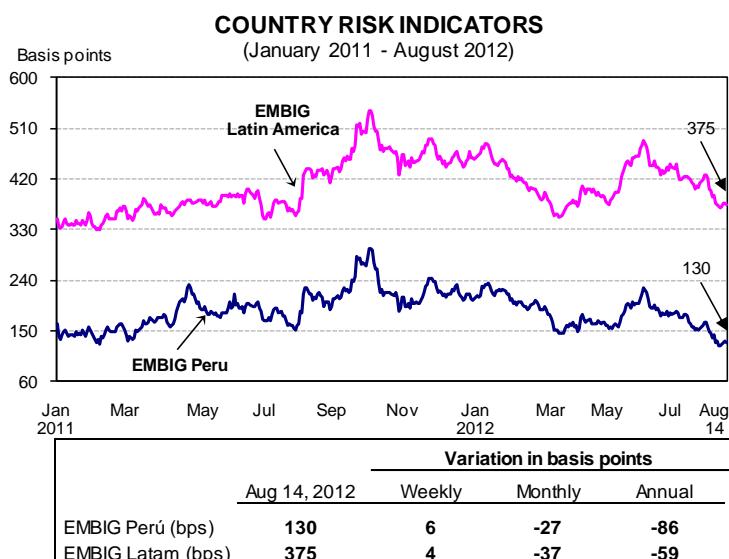

- According to IMARPE, 568.3 thousand tons of anchovy has been captured in the Northern-center region as part of the 2,700 thousand tons quota for the first fishing season in this region.
- The production of hydrocarbons rose 3.6 percent, according to Perupetro.
- According to ASOCREM, local dispatches of cement increased from 662 to 829 thousand tons between July 2011 and July 2012.
- The production of electricity grew 6.3 percent in July according to the Comité de Operación Económica del Sistema Interconectado Nacional (COES).

## International Markets

### Country risk at 130 basis points

Between August 7 and 14, the country risk indicator, measured by the **EMBIG Peru** spread, rose from 124 to 130 basis points.

Moreover, the **EMBIG Latin America** spread rose by 4 basis points due to the continuous global risk aversion observed in the last days of the period of analysis as a result of renewed fears of a global slowdown.

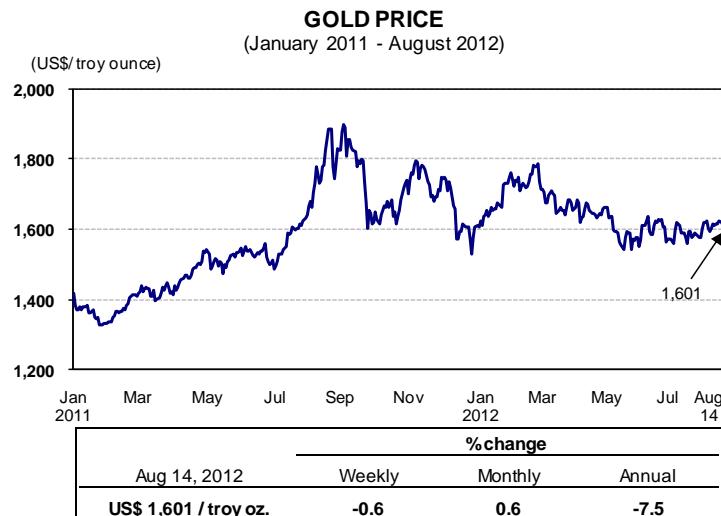

# resumen informativo

## Price of gold fell to US\$ 1,601.2 per troy ounce

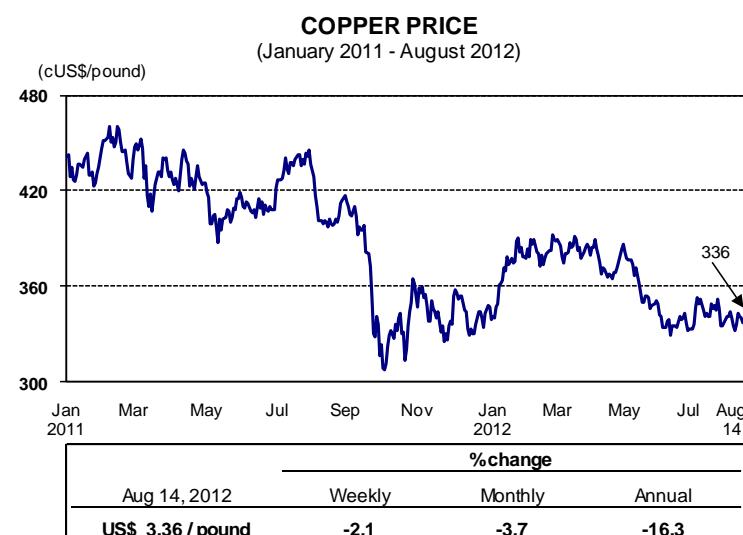

Between August 7 and 14, the price of **gold** fell 0.6 percent to US\$ 1,601.2 per troy ounce.

The price of gold continued to show a downward path due to the appreciation of the dollar against the euro, which reduced the appeal of gold as a hedge asset.

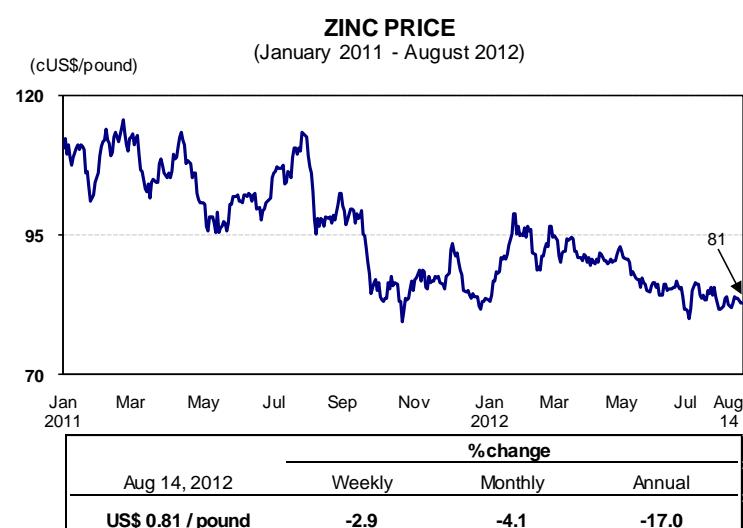

In the period of analysis, the price of **copper** dropped 2.1 percent to US\$ 3.36 per pound.

The decline in China's international trade, which would be indicating a slowdown in the demand for metals, and the increase in copper inventories in the major metal exchange markets continued pushing down the price of this basic metal.

In the same period, the price of **zinc** declined 2.9 percent to US\$ 0.81/pound.

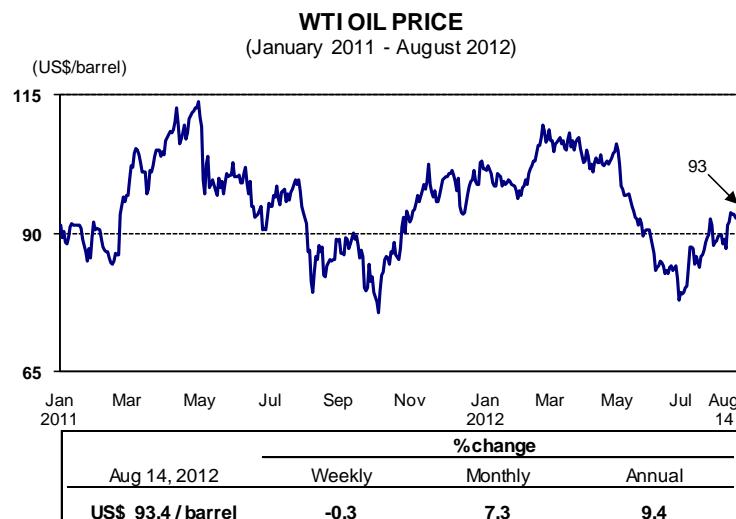

The price of zinc was affected mainly by fears of a drop in the global demand for metals after the publication of negative data of activity and trade in Japan and China.

# resumen informativo

Between August 7 and 14, the price of WTI oil fell 0.3 percent to US\$ 93.4 per barrel.

The fall in the price of crude was in line with fears of a decline in the global demand for crude after the publication of growth data in Japan. Moreover, reports of the International Energy Agency (IEA) estimating a lower-than-expected global demand for crude in the rest of the year contributed also to this price fall, even though the latter was offset by a greater than expected reduction in crude inventories in the United States.

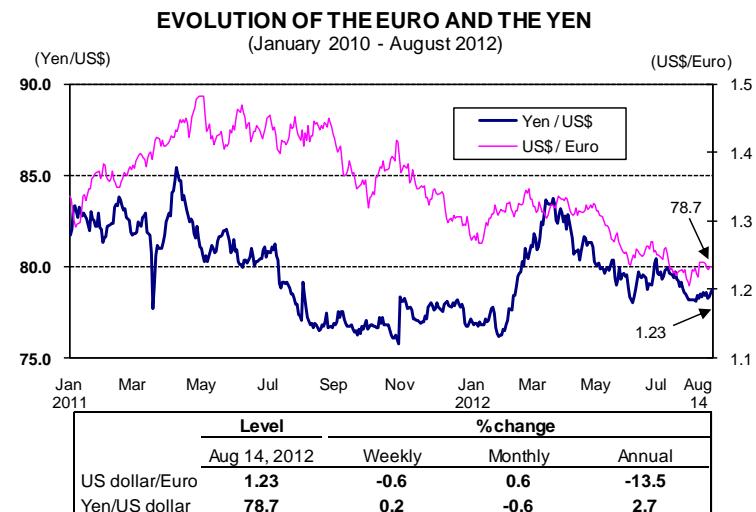

## US dollar appreciated against the euro and the yen

Between August 7 and 14, the **dollar** appreciated 0.6 percent against the **euro**.

The dollar gained ground against the euro favored by fears of a slowdown in Europe after both the European Central Bank and the Bank of England gave signs of lower economic growth forecasts.

The dollar appreciated 0.2 percent against the **yen**.

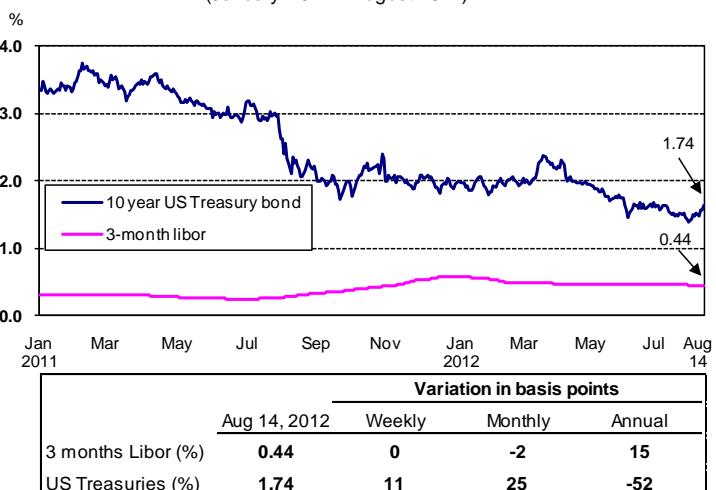

## Yield on 10-year US Treasuries rose to 1.74 percent

In August 7-14, the **3-month Libor** remained at 0.44 percent, while the yield on the **10-year US Treasury bonds** rose from 1.63 to 1.74 percent.

The rise in the yield on the US Treasury bonds was associated with the publication of mostly favorable economic indicators in the United States during the week.

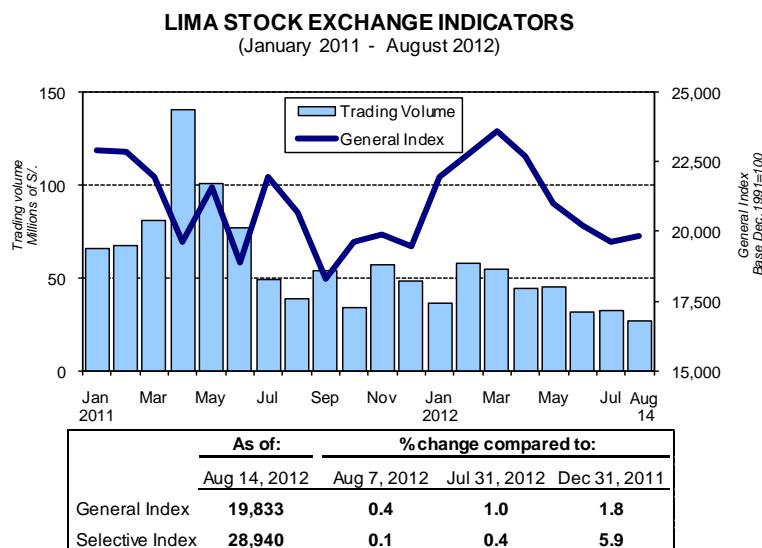

**3-MONTH LIBOR AND 10-YEAR US TREASURIES**  
(January 2011 - August 2012)

## Accumulated profitability at the Lima Stock Exchange: 1.8 percent

So far this month (at August 14), the **General Index** and the **Selective Index** of the LSE have increased 1.0 and 0.4 percent, respectively.

In the week of analysis (August 7 to 14), both indices rose 0.4 and 0.1 percent, respectively, influenced by good economic data in the United States, even though investors continued to expect the Federal Reserve to take action to stimulate the U.S. economy.

Year-to-date, the indices of the LSE have accumulated gains of 1.8 and 5.9 percent, respectively.
