This index provides information on the prices of a basket of 758 goods and services based on the data collected each month using a sample of 117 food markets and 21,200 commercial and services establishments in the country. Approximately 115,790 price data are collected each month.

The index provides information on consumer prices in the urban areas of 26 of the country's major cities, including 24 departmental capital cities and 2 non-capital cities (Chimbote and Tarapoto).

The base period for the new national consumer price index is December 2011 = 100. The weights reflect the importance of households' expenditure in goods and services relative to their total consumption based on data collected in the 2008-09 consumption survey (ENAPREF 2008-2009).

In January, the national CPI index registered a variation of 0.12 percent and thus accumulated a variation of 2.81 percent in the year.
