Exchange rate and foreign exchange intervention

The US dollar has been appreciating against most other currencies in recent months, as reflected in the evolution of the FED index since January 2013. This appreciation of the dollar is associated with expectations that the Federal Reserve (Fed) will start normalizing its interest rates.

Country risk at 170 basis points

In the week of April 21-28, the country risk indicator –measured by the **EMBIG Peru** spread– declined from 179 to 170 bps.

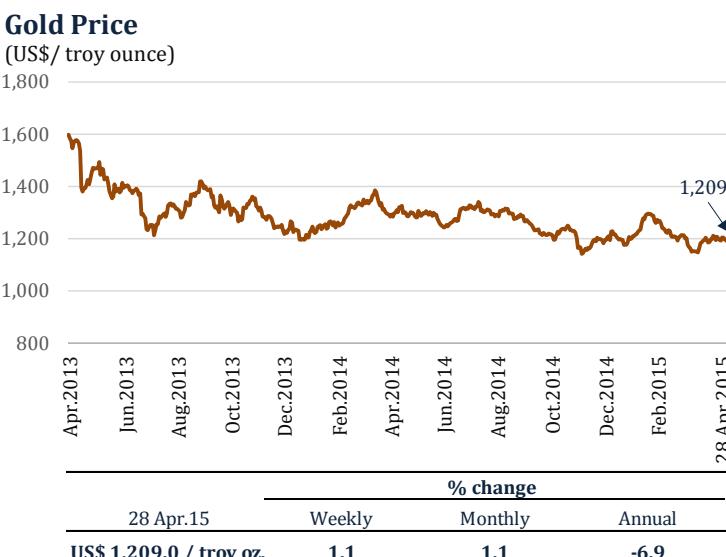

Similarly, the **EMBIG LatAm** spread declined 14 basis points amid less uncertainty about Greece and mostly positive corporate results in the USA and Europe.

Price of gold at US\$ 1,209.0 per troy ounce

In the same period, the price of **gold** rose 1.1 percent to US\$ 1,209.0 per troy ounce.

In April 21-28, the price of **copper** rose 1.9 percent to US\$ 2.76 per pound.

This rise in the price of copper was favored by an increase in China's seasonal demand, by the decline of inventories in the Shanghai exchange market, and by expectations of new economic stimulus measures in this country.

In the same period, the price of **zinc** rose 5.2 percent to US\$ 1.04 per pound.

This increase in the price of zinc is explained by signals of a tight supply, showed up in a continued drop on inventories in the main metal stock markets in the world

In the week of April 14 to April 21, the price of **WTI oil** rose 3.3 percent to US\$ 57.1 per barrel.

The rise in the price of crude was associated with geopolitical risks due to conflicts in Yemen and with the reduction of the number of oil platforms in the United States.

US Dollar depreciated against the euro

In the same period, the **US dollar** depreciated 2.3 percent against the **euro** amid reports of mostly negative indicators in the United States while awaiting for signals from the FED and for the GDP growth rate in the first quarter of 2015.
