- 1/ Se considera el crédito total en ambas monedas, para lo cual los saldos en dólares se valúan a un tipo de cambio constante de diciembre de 2024. La información de este cuadro se ha actualizado en la Nota Semanal N°30 (28 de agosto de 2025). El calendario anual de estadísticas se presenta en la página vii de esta Nota. A partir de la Nota Semanal N° 16 (27 de abril de 2012), los datos desde enero de 2001 no incluyen los saldos de activos y pasivos de las entidades del sistema bancario en liquidación.
- 2/ A partir de la Nota Semanal N° 32 (27 de agosto de 2010), la estructura de este cuadro ha sido modificada, debido a que la Superintendencia de Banca, Seguros y AFP (SBS), en aplicación de la Resolución SBS N° 11356-2008, ha variado la definición de crédito a la microempresa. Hasta junio de 2010, esta categoría incluía deudores cuyas deudas podían llegar hasta USD 30 mil. A partir de julio de 2010, se ha excluido a aquellos deudores cuyo nivel de endeudamiento supere los S/ 20 mil. Por tanto, para facilitar la comparación estadística, todas las categorías distintas a créditos de consumo y créditos hipotecarios han sido agrupadas bajo el rubro de "Creditos a empresas".
- 3/ A partir de diciembre de 2008, en aplicación de la Resolución SBS N° 11356-2008, se incluyen en la categoría de créditos hipotecarios a los créditos inmobiliarios carentes de hipoteca individualizada. Antes de dicha fecha, estos créditos estaban clasificados como créditos de consumo. Se estima que dicha reclasificación, en diciembre de 2008, fue equivalente a S/ 1 111 millones, aproximadamente.

- 1/ La información de este cuadro se ha actualizado en la Nota Semanal N°30 (28 de agosto de 2025). El calendario anual de estadísticas se presenta en la página vii de esta Nota. A partir de la Nota Semanal N° 16 (27 de abril de 2012), los datos desde enero de 2001 no incluyen los saldos de activos y pasivos de las entidades del sistema bancario en liquidación.
- 2/ A partir de la Nota Semanal N° 32 (27 de agosto de 2010), la estructura de este cuadro ha sido modificada, debido a que la Superintendencia de Banca, Seguros y AFP (SBS), en aplicación de la Resolución SBS N° 11356-2008, ha variado la definición de crédito a la microempresa. Hasta junio de 2010, esta categoría incluía deudores cuyas deudas podían llegar hasta USD 30 mil. A partir de julio de 2010, se ha excluido a aquellos deudores cuyo nivel de endeudamiento supere los S/ 20 mil. Por tanto, para facilitar la comparación estadística, todas las categorías distintas a créditos de consumo y créditos hipotecarios han sido agrupadas bajo el rubro de "Créditos a empresas".
- 3/ A partir de diciembre de 2008, en aplicación de la Resolución SBS N° 11356-2008, se incluyen en la categoría de créditos hipotecarios a los créditos inmobiliarios carentes de hipoteca individualizada. Antes de dicha fecha, estos créditos estaban clasificados como créditos de consumo. Se estima que dicha reclasificación, en diciembre de 2008, fue equivalente a S/ 627 millones, para el crédito en moneda nacional, y USD 168 millones, para el crédito en moneda extranjera, aproximadamente.

1/ La información de este cuadro se ha actualizado en la Nota Semanal N° 31 (4 de setiembre de 2025).

El calendario anual de publicación de estas estadísticas se presenta en la página vii de esta Nota.

2/ Datos preliminares a partir de enero de 2025. El índice de tipo de cambio real bilateral mide el poder adquisitivo de nuestra moneda en relación a la de otro país, tomando como base de comparación un período determinado. No es una medida de atraso o adelanto cambiario absoluto. Un índice mayor a 100 indica subvaluación relativa al período base y uno menor a 100 señala sobrevaluación relativa. Se calcula en base a los tipos de cambio promedio compra-venta y los índices de precios al consumidor reportado al FMI.

3/ Considera la inflación nacional para todos los países, salvo Argentina que incluye solo la correspondencia al Gran Buenos Aires.

4/ Se retira la información de Venezuela debido a que no se cuenta con información oficial.

5/ Dado el esquema de dolarización, a partir de enero de 2000 se asume un tipo de cambio fijo del sucre frente al dólar.

1/ La información de este cuadro se ha actualizado en la Nota Semanal N° 31 (4 de setiembre de 2025). El calendario anual de estas estadísticas se presenta en la página vii de esta Nota.  
2/ Desde enero 2022 el INEI ha realizado el cambio de base a dic21=100. Además, ha cambiado el uso de la Clasificación en 8 Grandes Grupos de consumo (de acuerdo con el Sistema de Cuentas Nacionales) a la Clasificación del Consumo Individual por Finalidades (CCIF) utilizando 12 divisiones. Para adecuar las series presentadas en este cuadro a dichos cambios, se han realizado los empalmes utilizando las nuevas categorías disponibles.  
3/ A partir de la Nota Semanal N° 31 (31 de marzo de 2005) corresponde al IPC excluyendo los alimentos que presentan la mayor variabilidad en la variación mensual de sus precios, así como también pan, arroz, fideos, aceites, combustibles, servicios públicos y de transporte. Medida de tendencia inflacionaria que reduce la volatilidad del indicador de aumento de precios sin sub o sobre estimarlo en períodos largos. Una serie histórica de esta medida de inflación subyacente se encuentra en la página web del BCRP ([www.bcrp.gob.pe](http://www.bcrp.gob.pe)).  
4/ A nivel nacional.  
5/ Ajuste estacional de los índices mensuales mediante el algoritmo Tramo Seats considerando efectos outliers y de calendario. Los factores de estacionalidad son calculados considerando la muestra ene.2002 - dic.2024 y proyectados para el 2025. Método directo.  
6/ Las variaciones porcentuales han sido calculadas tomando el mayor número de decimales del Índice de Precios al Consumidor.

1/ Preliminar. Actualizado con información proporcionada por los ministerios y el INEI al 15 de setiembre de 2025. La información de este cuadro se ha actualizado en la Nota N° 33 (18 de setiembre de 2025).  
2/ Se calcula a partir del ratio entre la producción corriente de cada agrupación industrial (CIIU a 4 dígitos) y la máxima producción mensual histórica. Este indicador debe ser utilizado de manera referencial, debido a que: a) el indicador máximo de producción podría estar reflejando situaciones transitorias o estacionales que sesgarían la tasa de utilización y b) no incorpora inversiones recientes que han realizado las empresas.

1/ Preliminar. Información actualizada con datos al 8 de agosto de 2025 en la Nota Semanal N° 29 (21 de agosto de 2025). El calendario anual de publicación de estas estadísticas se presenta en la página vii de esta Nota.

2/ Debido al redondeo de los datos parciales, los totales pueden diferir de la suma de las partes.

3/ El ahorro público está definido como la diferencia entre ingresos y gastos corrientes.

4/ Inversión bruta interna del sector privado. La variación de inventarios incluye un ajuste principalmente por el efecto de las exportaciones de oro informal.

5/ Desde 2012 se incluyen actualizaciones, nueva información y se presentan las estadísticas de acuerdo con las recomendaciones metodológicas de la sexta edición del Manual de Balanza de Pagos. Respecto al cambio de manual, en la cuenta corriente, hay nuevas denominaciones de las subcuentas (antes balanza comercial, servicios, renta y transferencias), reclasificaciones de algunas partidas entre las subcuentas y nuevos conceptos. Por su parte, la cuenta financiera es expresada en términos de activos netos (antes pasivos netos) y la Inversión Directa Extranjera sigue el principio de activos y pasivos globales (antes el direccional), lo que implica algunas reclasificaciones de partidas entre las subcuentas.

6/ Deuda externa del sector público no financiero.
